HEADQUARTERS, DEPARTMENT OF THE ARMY
JUNE 1981

WARNING

HIGH VOLTAGE

is used in the operation of this equipment.

DEATH ON CONTACT

may result if personnel fail to observe safety precautions.

Never work on electronic equipment unless there is another person nearby who is familiar with the operation and hazards of the equipment and who is competent in administering first aid. When the technician is aided by operators, he must warn them about dangerous areas.

Whenever possible, the power supply to the equipment must be shut off before beginning work on the equipment. Take particular care to ground every capacitor likely to hold a dangerous potential. When working inside the equipment after the power has been turned off, always ground every part before touching it.

Be careful not to contact high-voltage connections of 220-volt ac input connections when installing or operating this equipment.

Whenever the nature of the operation permits, keep one hand away from the equipment to reduce the hazard of current flowing through vital organs of the body.

Do not be misled by the term "low voltage". Potentials as low as 50 volts may cause death.

For artificial respiration, refer to FM 21-11.

REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in the back of this manual direct to: Commander, US Army Armament Materiel Readiness Command, ATTN: DRSAR-MAS, Rock Island, IL 61299. A reply will be furnished to you.

CHAPTER 2

WIRE LIST

Section I. GENERAL

2-1. SCOPE

This chapter contains detailed wiring information for FADAC.

2-2. PURPOSE

The purpose of this information is to assist maintenance personnel in troubleshooting the FADAC utilizing the test set AN/GSM-70 (FALT) and control box C-4020/GSM-70.

Section II. FADAC WIRE LIST REMARKS

2-3. GENERAL

The wire list is printed such that the logic term located in the Remarks column is in alphanumerical order for all wires in FADAC.

column, the number of points bussed together will be known; for example 2A indicates two points of the wire are bussed together.

2-4. EXPLANATION OF COLUMNS IN SECTION III

- a. **Color.** Table 2-1 explains the numerical code used in the Color column of section III to represent wire color. A combination of digits is used for multicolored wire; for example, 90 indicates a white and black wire.

Table 2-1. Wire Color Code

Code	Color	Code	Color
0	Black	5	Green
1	Brown	6	Blue
2	Red	7	Violet
3	Orange	8	Gray
4	Yellow	9	White

- b. **Size.** A number in this column indicates the wire gauge of the wire, unless there is an A in the Type column.
- c. **Type.** Table 2-2 explains the numerical code used in the Type column of section III. An A in the Type column indicates that points of the wire are bussed together. When this A is combined with the number in the Size

Table 2-2. Wire Type Code

Code	Type
28	300v insulation
14	Two-conductor, shielded 2TW26 low capacitance
15	Two-conductor, shielded, 600v insulation
61	Single-conductor, shielded, 600v insulation
1	Type S, tin-coated
29	20 gauge white

- d. **From and To.** All connectors are designated by three digits, a letter A or B, and two digits. For example, 234A-12 is connector 234, side A, pin 12. The A side of the connector is the side corresponding to the side of the circuit board on which detailed parts are mounted. A connector pin letter preceded by a slash (/) indicates a lower case-lettered pin; for example J013-/A means J013, pin a.
- e. **End FIT.** Any term in this column represents the end of that particular term's flip-flop 1 test.

f. **Code.** The Code column is not used by direct support and general support personnel.

g. **Remarks.** Logic terms, grounds, power levels, etc are listed for each wire. The symbols used are as follows:

(1) A minus sign (−) following the term indicates a prime or a negation of the term.

(2) A minus sign (−).

(3) A decimal point (.).

(4) A slash (/) on each side of the term indicates output of a logic driver.

2-5. PRINTOUT

The electronic accounting machine printout of the wire list is given in section III.
