MEMO

DATE: July 15, 1975

TO: Internal Literature Users

FROM: Literature & Distribution Services

SUBJECT: Internal Literature Catalog

Attached is the July 1975 Internal Literature Catalog. Please read all instructions in the front section of this catalog before placing orders. Take special notice of the Automatic Backorder Guidelines shown on page I-6.

A new catalog is now available for International customers. A limited quantity is available so please be sure of your needs before ordering. This publication number is M90310700.

Tranex Users Guide, Publication No. 60436500 will not be available under Kronos V2.1. This document will be available under NOS V1.0 but not until 11-15-75.

Batch Users Guide, Publication No. 60436300 will not be available until 10-22-75.

T-S Users Guide, Publication No. 60436400 will not be available until 9-15-75.

G. F. Moore, Manager
Literature & Distribution Services

GFM/sku

INTRODUCTION

The Literature and Distribution Services Department is responsible for the publishing of this catalog and the distribution of the items contained therein, with the exception of those items listed in the <u>Other Sources of Control Data literature section</u>. The purpose of LDS is to provide a central Control Data ordering and distribution service for literature, corporate forms, office supplies, marketing specialty items and other miscellaneous commodities. In doing this LDS handles on the average of 7,000 orders per month received from internal Control Data Corporation and external customers throughout the world.

There has been confusion in the past as to what the literature responsibilities of LDS are and how LDS interfaces with the publications departments of the various divisions. LDS <u>does</u> <u>not</u> have control over the content of literature inventoried in LDS nor does LDS control the ordering cycles or availability of new manuals, advertising brochures etc. This responsibility is solely that of the individual divisional technical publication or advertising sections. Updates on manuals or frequency of revision update is also the responsibility of the cognizant publication departments. LDS <u>does</u> have the responsibility for monitoring inventory levels for all repeat literature and weekly informs the various publication departments of the need for reordering specific literature.

Because LDS is a service organization, we solicit recommendations, suggestions and constructive criticism as to how LDS may better serve Control Data. These comments in written form or via phone should be directed to the Administrative Manager or the Department Manager.

MANUAL DEFINITION

The following general description of manuals, operator guides
and handbooks is provided to allow the catalog user to more
quickly identify categorically, the type of book he requires.
With this information the user can then relate more easily to
the section of this catalog which contains the required manual.
Should you require additional information as to the contents of
the literature, refer to the Publication Content Responsibility
section, page I-5 for the name of the divisional publication contact.

Hardware Reference Manual - This manual provides functional and
operational descriptions and general programming capability infor-
mation on Control Data hardware products and systems. This manual
is written to the level of a knowledgeable prospective customer,
professional programmer, and equipment operator.

Customer Engineering Manual - This manual provides the technical
information necessary to maintain Control Data hardware products.
Categories of information presented, in one or more volumes, are:
General Description, Operation and Programming, Installation and
Checkout, Theory of Operation, Diagrams, Maintenance, Maintenance
Aids, Parts Data, Wire Lists, and Equation Summary (or equivalent).

Hardware Reference/Customer Engineering Manual - This combined
manual, usually for less complex devices that require minimal pro-
gramming information, contains the same information as that in
separate Reference and Customer Engineering manuals.

Site Preparation Manual - This manual presents technical informa-
tion with which to plan and prepare sites for computer installa-
tion. Three sections make up this manual:

>   Section I: General Information - Two Section I manuals
>   are available: One for small systems; the other covers
>   large and medium-scale systems.
>
>   Section II: System Information - Section II manuals cover
>   site planning information for specific systems; e.g.,
>   3300, 6400, etc.
>
>   Section III: Peripheral Equipment - Section III provides
>   site planning data on all Control Data peripheral equipment.

Hardware Diagnostic Reference Manual - This manual provides a
functional description and detailed operating instructions for
diagnostic programs.

System Operator's Manual - This manual provides operating instruc-
tions to the system operator. Instructions in this manual normally
include system start-up, message formats, error recovery procedures,
and general system information. This manual is written to the
level of computer operators who do not have a detailed knowledge of
programming.

<u>System Reference Manual</u> - This manual describes the system in terms of function, applications, and capabilities. Provides a configuration of the hardware that makes up the system with a brief description of the system function of each product. May also include a description of the software available with the system. Written to the level of the prospective customer who does not have a detailed knowledge of either the hardware or software.

<u>Software General Information Manual</u> - This manual provides introductory descriptions of functional and operational characteristics of Control Data software products.

<u>Software Reference Manual</u> - This manual provides complete descriptions of external functional and operational characteristics of Control Data software products.

<u>Software Operator's Guide</u> - This manual provides detailed instructions for operating Control Data software systems.

<u>Software Diagnostic Handbook</u> - This manual provides the messages issued by all programs in a software product set, together with the recommended action.

<u>Software Installation Handbook</u> - This manual provides installation and modification instructions for Control Data software products.

<u>Software User's Guide</u> - This manual provides the layman with the instructions on how to use a software product.

<u>Software Instant Manual</u> - This pocket-size manual provides summary information {deck structures, etc.} for system programmers and operators of software systems.

The individuals listed below are responsible for providing literature
content information upon request. The three digit division code for
each individual is also included in the literature listing to reflect
responsibility for each manual, handbook, brochure, etc. Questions
concerning the content of the literature should be directed to the
listed contacts and not to LDS.

GENERAL LITERATURE ORDERING GUIDELINES PERTAINING TO
DOMESTIC AND INTERNATIONAL ORDERS

In order to assure that the orders received move through LDS
with the least amount of delay, it is important that certain
guidelines be followed. Adherence to these guidelines will
eliminate many of the difficulties which complicate and delay
the normal handling of orders and will mean better service
to LDS customers.

PHONE ORDERS - Phone orders are not accepted from CDC Offices.
LDS does, however, recognize the necessity for periodic RUSH
orders and will accept bonafide RUSH phone orders from any
domestic location outside the Mpls./St. Paul area. Orders must
be cleared through the Administrative Manager or Department
Manager and must be backed up with a memo stating the reason
why a phone order was necessary.

TWX ORDERS - The same guidelines used for phone orders pertain
to TWX orders. If you do order by TWX, see page I-12 for a
telememo sample and instructions.

GENERAL RUSH ORDERS - LDS currently maintains a priority status
for the handling of ▽RUSH▽ orders received via U.S. or interplant
mail. All of these Rush orders require special handling which
slows the normal handling of other orders. This special handling
should be asked for only on an exception case basis and for
orders of less than six items.

LEADTIME/ORDER STATUS - Normal processing time from that point
which an order is received by LDS and the order is shipped
should be approximately four working days for both domestic and
international orders. Take into consideration the time required
for your order to travel to and from LDS to project the probable
lead time for your order. Allow at least the aggregated time to
lapse before you request an order status check. Time spent in
checking specific order status only delays the handling of other
orders.

 AUTOMATIC BACKORDERS - DOMESTIC/INTERNATIONAL - In response to
internal customer request for automatic backordering by LDS for
out of stock manuals and binders, LDS offers a backorder service.
This service provides for the automatic backordering by LDS for
stated commodities on direction of the internal requisitioner.
Those items for which the requisitioner has a continuing need
should be indentified on the requisition with a ▽B▽ in the ▽See
Code Below▽ column which tells LDS to place that item on back-
order if the item is out of stock. {See example on page I-16}.
The backorder itself will be filled out by LDS with no further
activity required by the requisitioner. Be sure to identify each
item you wish backordered on an individual basis as LDS will not
backorder items not identified with the required ▽B▽. Note that
this service does not include advertising literature {Data Sheets
and Brochures} due to ever changing marketing emphasis which delays
reprint cycles.

LITERATURE ORDERING PROCEDURE

<u>DOMESTIC ORDERS</u> - are orders placed by Control Data personnel within the territorial limits of the United States. Order requesters must use the Literature and Stock Forms Request Form AA1538-2, Rev 9/73. The form must be filled out completely as shown in example on page I-11 with special emphasis placed on:

{1} Account or project number.

{2} Publication number and full description of material on order.

{3} In the deliver to section, be sure to reference the name of the person responsible for the receipt of the order.

{4} <u>NUMERICAL SEQUENCING OF LITERATURE</u> - YOU MUST LIST IN NUMERICAL SEQUENCE, ALL NUMBERS IF THE TOTAL ITEMS REQUESTED PER REQUISITION EXCEEDS EIGHT MANUALS. LDS stocks all manuals in numerical sequence on the shelves. Large orders which do not list manuals in numerical sequence take from four to six times as long to fill. The lost time in filling out of sequence orders delays considerably the processing of other orders. Requisitions of nine items or more not listed in numerical sequence may be returned to the requisitioner. When ordering revision packet updates please list each revision as a separate line item on the requisition.

<u>IMPORTANT</u> - IN SOME CASES, THE REVISION PACKET REQUESTED ON YOUR ORDER IS NOT AVAILABLE AND THE REVISION HAS BEEN PRINTED IN BOOK FORM ONLY. UNLESS YOU SPECIFY THAT YOU WILL ACCEPT THE REVISION IN THE BOOK FORM, LDS WILL REGARD YOUR REQUEST FOR THE PACKET TO MEAN YOU WISH ONLY THE PACKET AND NOT THE UPDATED BOOK. IF YOU WILL ACCEPT THE UPDATED BOOK, LDS REQUESTS THAT YOU WRITE ╝╝REVSIONS IN BOOK FORM ACCEPTABLE╝╝ IN THE SPECIAL INSTRUCTION SECTION.

The backorder policy for domestic orders is explained in the General Order Guidelines section on page I-6.

LDS in filling orders, uses a number of phrases which reflect the status of specific material. These phrases or their related numbers are written on the orders across from the item in question. The list of phrases and their meaning is as follows:

{1} <u>OUT OF STOCK</u> - This item is currently out of stock, but is expected to be available within a four week period. If an actual due date for the item is available, it will be reflected on the order. See backorder policy on page I-6.

{2} <u>BOOK FORM ONLY</u> - Revision packet no longer available. Packet is included in updated book only.

{3} <u>TRANSFERRED TO</u> _ _ _ _ _ _ -Item not stocked at LDS. The facility which handles this item has been directed an order to ship the item to the requestor.

{4} <u>UNKNOWN PUBLICATION</u> - This item is not known to LDS and LDS does not know where it can be obtained.

{5} <u>NOT YET AVAILABLE</u> - Indicated that the item is expected to be received and released in the near future.

{6} <u>OBSOLETE</u> - Publication is no longer in print. If another publication has replaced it, we have marked in the superseding number and have included the replacement.

INTERNATIONAL ORDERS - are orders placed by Control Data personnel
who are located outside the territorial limits of the United
States. All international orders must be placed with LDS using
the International Literature and Stocked Forms Request AA1538-2
and filled out as shown in example on page I-13. Do not direct
your own purchase orders to LDS as they will be returned to the
sender. Read the domestic ordering instructions on page I-5
for additional pertinent information concerning general ordering
information. The back order policy for international orders is
explained in the General Order Guidelines section on page I-6.

RETURNS TO STOCK - Return orders are accepted if any of the
following occurs.

      {1} LDS misfills an order and the requestor receives an
           unwanted item.

      {2} Excessive delay in delivery has eliminated the need
           for the literature ordered.

      {3} Literature of a reasonable quantity {five books or
           more}, which LDS has a current demand for, will be
           accepted back but only if the books have not been
           used and prior approval for return has been given
           by LDS. LDS will not award credit to those individuals
           who arbitrarily return books without LDS approval.

The value of the literature being returned to stock must be
determined prior to shipment to avoid expending more dollars
for freight than the literature is actually worth. On returning
material to stock, the following procedure should be used.

      {A} Complete form AA1538-2.

      {B} Show the publication number, quantity returned and
           description.

      {C} On the next line, write "RETURN TO STOCK" in large
           letters, indicate the original order number - order
           date and reason for return.

AUTOMATIC SOFTWARE REVISION PACKET DISTRIBUTION SERVICE -
On July 1, 1972, LDS began a revision packet distribution pro-
gram which provided for free software revision packet distri-
bution for external customers placing literature orders directly
with LDS. This program was initiated solely for Control Data's
external customers and at this time LDS does not have the
capacity to provide the same service for internal users. Eligible
domestic orders for the automatic revision packet distribution
must be sent directly to LDS by the customer on his own purchase

order.   Complete instructions are contained in the LDS External
Customer Literature Catalog.

International Procedure - Because external customers in
foreign countries order their literature through CDC
literature coordinators, ordering instructions have been
established for international activity.   It is important
that the LDS responsibilities under this distribution
service be understood.   In the past, some of the European
literature coordinating functions have continued to operate
the ADORE {Automatic Distribution of Revision Europe} pro-
gram.   The LDS automatic revision packet distribution service
is designed to augment and not replace ADORE or any other
individualized international regional program.

All international external customers are eligible for this
service for orders placed with LDS.   This means that Inter-
national customers following the guidelines stated below will
be entered on the LDS distribution file.   The customers name,
publication numbers and quantity along with other information
will be retained.   As succeeding revision packets are printed,
LDS will then ship the packets automatically to the customer
on a No Charge basis and in the same quantity as the initial
manual order.   The LDS automatic distribution service inter-
national operating guidelines are as follows:

International Orders {orders from operations outside the
Territorial Limits of the United States}

{1} All international orders received by LDS with a drop
    ship address to an external customer will be placed
    on the LDS distribution file if it is marked with a
    large A/D {See page I-15 for sample order form}.

{2} Combined internal and external literature orders
    will be scanned by LDS personnel.   All external
    customer order requirements which you wish to be
    placed on file should be marked with a large A/D
    {see page I-14 for sample order form}.   LDS will then
    add these publications to the distribution file.

{3} The automatic distributions of revision packets will
    be shipped directly to the customer if the initial
    order had a drop ship address.   If the initial order
    was combined with internal CDC requirements, LDS
    will ship the packets to the appropriate literature
    coordinator for final distribution, with the indica-
    tion that the packets are intended for an external
    customer.

{4} Only software literature will be included in this
    automatic distribution service.

REVISION PACKET DISTRIBUTION CONTINUED

{5} Only update or corrective revision packets will
be distributed free of charge. The individual
publication departments are responsible for
identifying the packets to be distributed.

{6} Only Software publications listed in the LDS catalog
and stocked by LDS will be distributed within this
service.

{7} There will be no retroactive distribution of packets
due to guidelines not being followed by International
Offices.

{8} This service is provided for external customer orders
only.

{9} Because of the use of some of the manuals, it may be
possible that the customer need not be placed on
this distribution. Be sure to indicate on the order
when the distribution is not required. An example
of this would be a sale of manuals to a University
for one time use in class instruction. In this case,
automatic distribution of packets would not be
required.

This section is an accumulation of all literature revisions, additions and deletions which have taken place since the issuance of the January 1975 Literature Catalog. The manuals are listed numerically by product number.

The legend for columns one through six is as follows:

1-New or revised literature published since last edition.
   A. N-New Publication
   B. R-Revision in packet form only
   C. RM-Revision in manual form only
   D. RMP-Revised manual/packet available
   E. RO-Revised publication obsoletes all previous editions.
2-Publication number of literature
3-The latest revision level
4-Indicates size of hard cover binder that may be used for manuals
5-Publication division responsible for contents of literature

OBSOLETED PUBLICATIONS

This section lists publications which have become obsolete since
the January 1975 Catalog. The publications which replaces the obsolete
items are also shown and if no manual replaces an obsoleted item,
the replacement is listed as "none".

SECTION 1

This section contains Customer Engineering Manuals for individual equipments arranged in equipment designator sequence. Product numbers are included in parenthesis after the equipment designator. Additional manuals may be found in Section 2 by looking up the Product Number.

SECTION 2

The manuals in this section are listed by Product or System Number. Many entries include a product to equipment cross reference; e. g. 1742 (CL309-A/B, FF511-A/B). Since Customer Engineering Manuals for equipment developed after November, 1967 are categorized by equipment designator, always look up the equipment designator in Section 1 as well as the Product Number.

SECTION 3

PLEASE NOTE:

A number of Software Manuals are listed in more than one location
because of the fact that specific software products will run on
various operating systems.

Manuals in this section

The format in this section uses a machine line heading with a
listing of manuals for each operating system version and the
appropriate product set members printed beneath the heading.

TABLE OF ABBREVIATIONS

All Titles for software manuals have been reviewed and standardized.
The following table lists all abbreviations and their full wording.

ADB	Applications Development Bulletin
BIN	Binary
BSIPP	Simultaneous Peripheral Processor
COMPAT	Compatible
COMPARATIVE	Used with FORTRAN, notes the similarities and differences among the FORTRAN for 3000 and 6000 machine lines and USASI
EXT	Extended
FTN	FORTRAN
FUNCT	Functions
GENERIC	Algol, applicable to all 3/6 machine line
HS	High Speed
IHB	Installation Handbook
LIB	Library
META	Procedure Oriented Source Language Assembler
MP	Memory Protect
MS	Mass Storage
MSIO	Logical Input/Output On Mass Storage
REF	Reference
OP	Operating System
REGINA 1	Linear Programming Package
RESPOND	Multiaccess Subsystem For Remote And/Or Local Ter
SAINT	1401 Simulator And Interpreter
SASY	31/32 Satellite For Standard File Processing-3600
SDPS	Seismic Data Processing System
SFP	Standard File Processor
SIPP	Simultaneous Peripheral Processor, Batch Execution
SMT	Summit
TSORT	Tape Sort

OTHER SOURCES OF CONTROL DATA LITERATURE

This section was established to list literature of all types which are generated by individuals and departments within Control Data but which are referenced in any specific catalog. LDS wishes to make clear that the items contained in this section ARE NOT AVAILABLE THROUGH LDS but that they can be obtained by contacting those responsible individuals as shown in this section. LDS expects to enlarge this miscellaneous category as more people become aware of its existence and add to it. We are primarily looking to include that literature which may have meaning and value to other people within the Corporation regardless of subject matter. Because of the wide content span of this literature, most of the items have been listed alphabetically by their generating department or division.

SCHOOL COMPUTER USE PLAN

(A technique that provides textbooks and unique card kits to enable students to write programs and send prepunched cards -- without keypunching -- for actual computer runs.)

Various school enrollment plans in this program are available. School classes can participate in programming courses - including individual student computer runs - without the school having any computer equipment, keypunching, or teletype.

	Int. Price	Ext. Price
Orientation Course - FORTRAN		
Text	$2.00	$4.00
Card Kit	$5.00	$6.00
Answer Text	$2.00	$4.00
Competence Course - FORTRAN		
Text	$2.00	$4.00
Card Kit	$5.00	$6.00
Answer Text	$2.00	$4.00
Orientation Course - COBOL		
Text	$2.00	$4.00
Card Kit	$5.00	$6.00

Ordering Information:

All internal CDC orders must be accompanied by a department number (project/account numbers are optional). Out-of-stock or
not-yet-printed items are backordered automatically. External orders must be channeled through, and billed from, sales offices.

Manuals not listed below were written for a single customer and are probably no longer available.

COMPUTERS - NATIONAL STANDARDS ON COMPUTERS AND INFORMATION PROCESSING

Reference copies of the standards listed below, together with certain
ECMA and ISO information processing standards are maintained by the
Systems Standards Department of CDC Technical Standards. Files of the
standards listed above are maintained in division libraries. CDC
employees interested in the content of these standards are urged to use
their divisional library facilities. CDC employees who require standards
for continued reference may obtain them from the Systems Standards
Department. Others may obtain the listed standards from the following
sources:

> American National Standards Institute, Inc.
> 1430 Broadway
> New York, New York 10018
>
> Federal Information Processing Standards
> Superintendent of Documents
> U. S. Government Printing Office
> Washington, D. C. 20402
>
> or locally {Twin Cities}
>
> United States Department of Commerce
> 306 Federal Courts Building
> Minneapolis, Minnesota 55401

American National Standards on Computers and Information Processing:

ANSI X3.1-1969   Signaling Speeds for Data Transmission

ANSI X3.2-1963   Print Specifications for Magnetic Ink Character Recognition

ANSI X3.3-1963   Bank Check Specifications for Magnetic Ink Character Recognition

ANSI X3.4-1968   Code for Information Interchange

ANSI X3.5-1968   Flowchart Symbols and Their Usage in Information Processing

ANSI X3.6-1965   Perforated Tape Code for Information Interchange

ANSI X3.9-1966   FORTRAN

ANSI X3.10-1966   Basic FORTRAN

ANSI X3.11-1969   Specifications for General Purpose Paper Cards for Information Processing

ANSI X3.12-1966   Vocabulary for Information Processing

ANSI X3.14-1969   Recorded Magnetic Tape for Information Interchange {200 CPI, NRZI}

ANSI X3.15-1966   Bit Sequencing of the American National Standard Code for Information Interchange in Serial-by-Bit Data Transmission

ANSI X3.16-1966   Character Structure and Character Parity Sense for Serial-by-Bit Data Communication in the American National Standard Code for Information Interchange

ANSI X3.17-1966   Character Set for Optical Character Recognition

ANSI X3.18-1967   One-Inch Perforated Paper Tape for Information Interchange

ANSI X3.19-1967   Eleven-Sixteenths Inch Perforated Paper Tape

ANSI X3.20-1967   Take-Up Reels For One-Inch Perforated Tape For Information
                   Interchange

ANSI X3 21-1967   Rectangular Holes in Twelve-Row Punched Cards

ANSI X3.22-1967   Recorded Magnetic Tape for Information Interhcnage {800 CPI, NRZI}

ANSI X3.23-1968   COBOL

ANSI X3.24-1968   Signal Quality at Interface Between Data Processing Terminal Equip-
                   ment and Synchronous Data Communication Equipment for Serial
                   Data Transmission

ANSI X3.25-1968   Character Structure and Character Parity Sense for Parallel-by-Bit
                   Data Communication

ANSI X3.26-1969   Hollerith Punched Card Code

ANSI X3.27-1969   Magnetic Tape Labels for Information Interchange

American National Standards on Office Machines and Supplies:

ANSI X4.6-1966   10-Key Keyboard for Adding and Calculating Machines

ANSI X4.7-1967   Typewriter Keyboards

Federal Information Processing Standards:

FIPS PUB 0   General Description of the Federal Information Processing Standards
             Register

*FIPS PUB 1 Code for Information Interchange

TERMINAL SUBSYSTEMS DIVISION (RVLOPS)

This portion of the Literature Calog lists publications which are stocked at the Terminal Subsystems Division bookstore. Information is also included concerning revision level interpretation, ordering procedures, and the abbreviations which are used.

CONTENTS

The following nomenclature classifications are represented as sections:

1) Equipment numbers

2) Product numbers

3) OEM numbers

4) QSE numbers

5) Miscellaneous

6) Assembly numbers

Each section is arranged in alphanumeric order. If there is no publication given after a listing, the reference column will indicate under what nomenclature and section it may be found.

HOW TO INTERPRET MANUAL REVISION LEVEL

The revision column in the catalog indicates the present revision level of the manual.
A comparison of this revision with that of a manual in possession can be made by
checking the revision record page in the front of the manual. Currently the common
single-designator method of identifying revision level is being used on all new and
revised manuals. However in the past, two other methods of identifying the revision
level were used. These old methods used a two-or three-part revision level designator.
A brief explanation of each method follows.

Three-Part Designator Method

Under this method, both a formal and interim change existed. An interim change
was a quick and temporary way of documenting FCO's, corrections, etc., while the
formal change constituted a reprint of interim changes in a permanent fashion. All
existing changes were incorporated into the manual when it was reprinted and the
first part of the revision designator upgraded. For example, a manual with the
designation "A-1-2" would become "B-0-0" at the next reprint.

```
                        PD-0-3

        PD              0                3
    Preliminary Draft   No Formal        Three Interim
    Publication         Changes          Changes

                        A-0-4

        A               0                4
    Original            No Formal        Four Interim
    Publication         Changes          Changes

                        B-1-2

        B               1                2
    Revised             One Formal       Two Interim
    Publication         Change           Changes
```
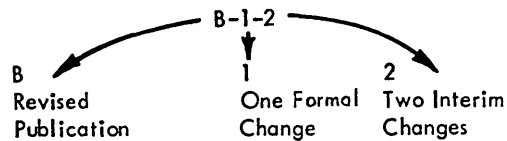

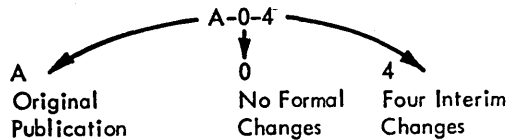

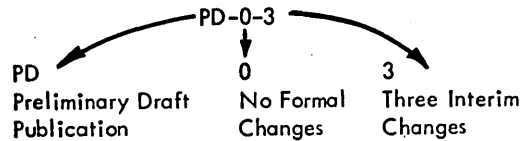

Two-Part Designator Method

The formal change was eliminated with this method and all changes were of the interim change variety. The interim changes were incorporated into the manual upon reprint and the first part of the revision designator upgraded. For example, a manual with the designation "01-4" would become "02-0" at the next reprint.

Single Designator Method

With this method the revision is upgraded whenever a change is made to the manual. The change may be done in revision packet form or in the form of a revised version of the complete manual. If a reprint of the manual incorporates previous revision packets, the revision of the manual is not upgraded. In this case, the reprint of the manual represents the same contents as would a user's manual had the user incorporated the packets into his manual and discarded the obsolete pages.

ORDERING INFORMATION

When requesting manuals listed in this catalog, a Literature and Stocked Forms Request (CDC form AA1538) should be completed and sent to either of the following addresses.

Control Data Corporation
Literature and Distribution Services
8100 34th Avenue South, P.O. Box 0
Minneapolis, Minnesota 55440

OR

Control Data Corporation
Technical Publications Bookstore

COMMUNICATIONS DEVELOPMENT DIVISION

RESPONSIBLE INDIVIDUAL:

        ALEX CIAVOLA
        PUBLICATIONS MANAGER
        3519 W. WARNER AVE.
        SANTA ANA, CA 92704
        (714) 540-2820, X341

ORDERING INFORMATION:

ALL INTERNAL CDC ORDERS MUST BE ACCOMPANIED BY DEPARTMENT NUMBER, A
PROJECT OR ACCOUNT NUMBER AND BE APPROVED BY THE RESPONSIBLE MANAGER.
BILLING WILL BE PROCESSED AGAINST THE INDICATED ACCOUNT.

ORDERS EXTERNAL TO CDC MUST BE PROCESSED THROUGH THE LOCAL CDC SALES
OFFICE. THE SALES OFFICE WILL INITIATE THE LITERATURE ORDER FOR THE
REQUESTED CDD LITERATURE.

CDD REQUESTS THAT ORDERING LITERATURE FROM THE DIVISION BE IN ACCORDANCE
WITH "GENERAL LITERATURE ORDERING GUIDELINES PERTAINING TO DOMESTIC AND
INTERNATIONAL ORDERS" FOUND AT THE FRONT OF THIS CATALOG. WHEN REVIEWING
THE ORDERING GUIDELINES, SUBSTITUTE "CDD" FOR "LDS" WHERE APPLICABLE. THE
ONLY EXCEPTION TO THE GUIDELINES IS THE "AUTOMATIC SOFTWARE REVISION PACKET
DISTRIBUTION SERVICE"; THIS SECTION WILL NOT APPLY TO CDD LITERATURE.
