Digital Hardware Maintenance Training

Solutions At Hand

In Step With Hardware Technology

Your job as a technical specialist demands knowledge and skills that you have to keep razor sharp and up-to-date! Hardware technology changes quickly with new applications and diagnostics—and so do the exciting hardware maintenance training courses from Digital Educational Services.

Learn From the Experts

Because our hardware maintenance instructors are experts on maintaining Digital's equipment, they're able to teach you the most contemporary skills necessary to keep your system up and running. Our instructors have seen the evolution of hardware maintenance, and can tell you where it's going—and how you can keep up with it.

Variety of Learning Formats

Keeping up with Hardware Maintenance Training from Digital is easy with the variety of learning formats available from Educational Services.

Whether you prefer to learn at your site or ours—Digital offers training that is appropriate. Learn at your location with self-paced products, attend a Digital

Training Center for hands-on classroom instruction, or, learn with the entire staff at your own facility or ours with On-Site or Exclusive training.

With Digital, you'll get the expert instruction needed to maximize your product knowledge. Our variety of learning formats and choice of training centers are the key to your success. Refer to the Educational Services pages in Section Two of this catalog for a complete listing of hardware maintenance courses. Refer to page seven to learn more about new hardware maintenance training courses and the Training Centers that offer them.

Welcome to Digital's Self-Maintenance Services

Digital's Self-Maintenance Services (SMS) Group, a part of Digital Field Service, is dedicated to providing assistance to our customers who need to manage their own maintenance for their Digital computers.

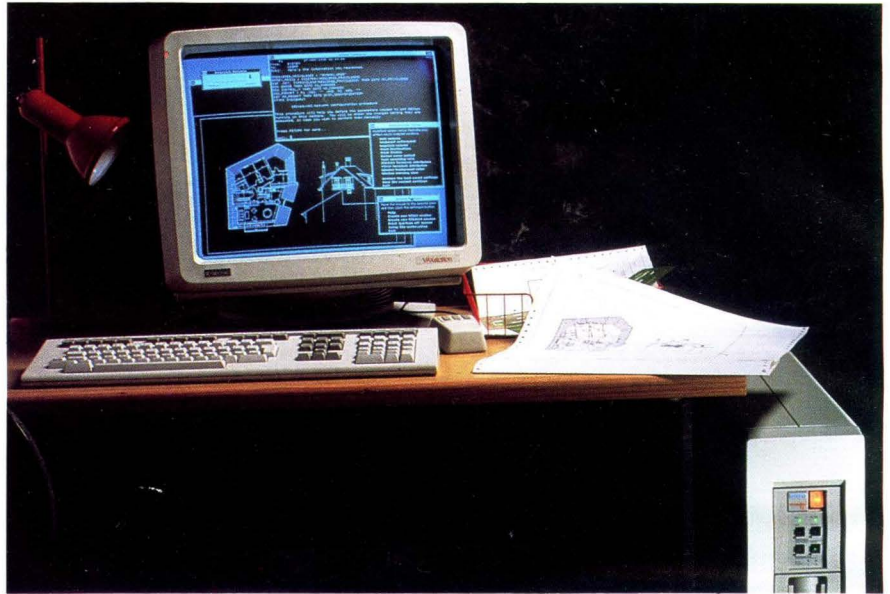

Digital's Self-Maintenance Program offers a complete menu of products and services to assist customers performing their own maintenance. We believe it is the best self-maintenance program in the industry. Components of the program include:

- Economically priced spare parts and kits for all major CPUs and options.
- Comprehensive, high-quality training programs from Digital's Educational Services organization.
- Extensive maintenance documentation in hard copy or microfiche formats.
- Diagnostics of the same quality and scope as those used by our Field Service engineers.
- A variety of part-repair services.
- A maintenance product recommendation program.
- A variety of helpful ordering services as well as convenient ordering channels and product discounts.
- Backup support from Digital's outstanding Field Service organization.

The Self-Maintenance Services Price Book

One of the most valuable tools in implementing and running a successful self-maintenance program for your Digital computer systems, is this *Self-Maintenance Services Price Book*. Published twice each year, the price book provides up-to-date part number and pricing information for all of our self-maintenance products and services.

The book is organized into three major sections. Section One is this color section at the front of the book. In it, you will find summaries of our major products and services. Each edition of the

price book will feature some of our new products in Section One. This section also tells you how to order the parts and services you need, and describes the several channels (phone and mail) of ordering available to you.

What Products Do You Need?

Section Two of the book tells you what maintenance products you should order, given *your* system configuration. It has five subsections:

- **Matrices** — where you can quickly determine what service products we recommend for a given *system configuration*.
- **Diagnostics** — where you can determine which diagnostics are appropriate for your system and what sort of licensing is required for the diagnostics.
- **Educational Services** — Where you will find the training programs we recommend for your maintenance personnel.
- **Peripheral Products and Associated Spares** — where the appropriate spares kits for our terminals, printers, communication products, and storage products are detailed.
- **Kits** — Where the contents of our hardware spares kits and documentation kits are detailed.

The Price Lists

Section Three contains the maintenance product price lists. Once you have determined what products you need and their part numbers in Section Two, you can refer to Section Three to find the price of the products as well as some additional ordering information. Section Three is organized *alphanumerically by part number*.

Section Three is organized into four parts. Part A, Hardware Spares, and Part B, Diagnostics and Documentation, provide pricing, ordering, and discount information for these products. Part C, DECmailer, and Part D, Factory Repair, provide the prices for repairing qualified products under these programs.

Page 91 provides a detailed guide to using the pricing information in Section Three, while page 92 provides an index to the various sections of the pricing information.

Purchase Policies

Finally, at the back of the book, you will find Digital's Policies containing the terms and conditions of sale for our maintenance products and services.

What To Consider When Setting Up Your Operation . . .

Planning and Manpower Management

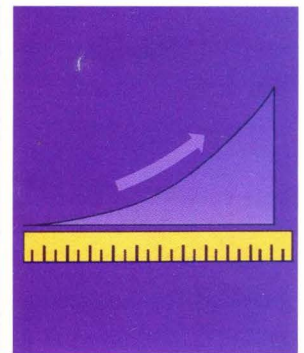

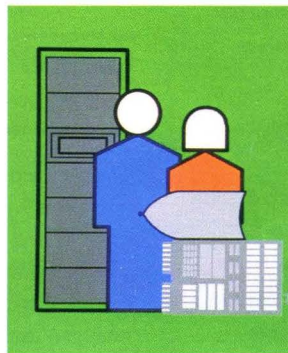

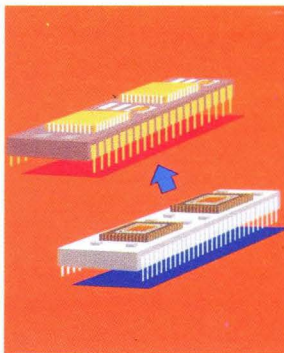

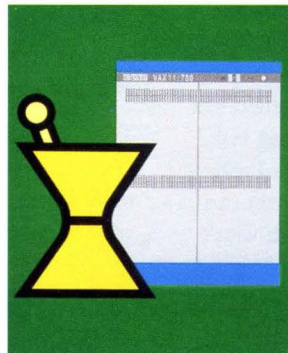

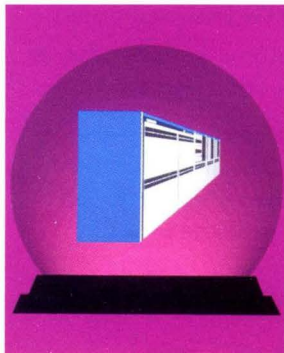

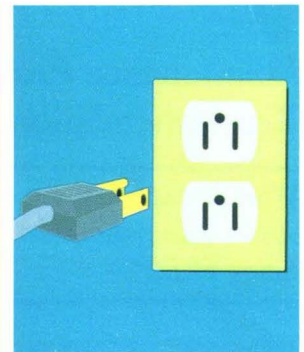

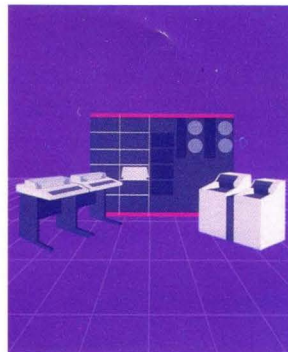

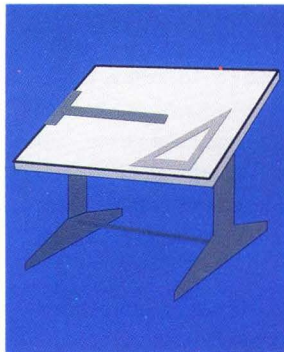

- Determine needs and resources
- Inventory and repair control
- Training
- Service call management
- Measuring performance

Installation and Site Management

- Configuration control
- Growth planning
- Power and environmental factors

Preventive and Unplanned Maintenance

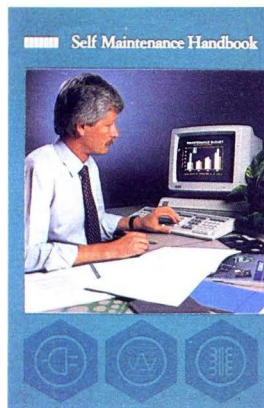

- Field Change Orders (FCOs)
- Routine maintenance
- Emergency service
- Problem escalation (Back-up)

Important Planning Tools

Self-Maintenance Handbook

The first complete handbook that deals with the complex subject of computer maintenance and logistics management. Included is a chapter devoted to Electrostatic Discharge (ESD) with suggestions made to eliminate or minimize product exposure. Part number is EB-29448-94. Price is \$19.99.

At Your Service Newsletter

Offered free of charge to our self-maintenance customers, this quarterly newsletter communicates important product information. Return the subscription card in this book to obtain this valuable publication.

The help you'll need to maintain your system is only a Phone Call away!

Maintenance Products Recommendation Service

What products will you need to service your system? Get a complete listing. FREE!

Maintenance requirements vary significantly from one customer to another, and even within one organization from site to site. Making decisions about the particular products that are needed can become a complex and confusing task. But with Digital's Maintenance Products Recommendation Service you can get the answers you need, and it won't cost you a thing!

Simply call your local Digital Sales Representative, and within seven days you'll get a complete list of the products you need to effectively service your equipment.

Your customized response includes a list of:

- **Spare parts** — the modules, sub-assemblies and associated kits needed for on-site repair.
- **Tools and Test Equipment** — the most commonly used maintenance aids for both off-line and on-line diagnosis and exercising at the option level.
- **Preventive Maintenance Parts** — parts that require routine replacement on a scheduled basis. For example, air filters.
- **Hardware Documentation** — associated hardcopy drawings, manuals and guides for individual options.

Please provide us with a system configuration. Our response listing can be sorted either by option or system configuration. A system sort will optimize sparing by combining redundant spares into a single requirement.

You will also need to determine the appropriate level of service required to meet your maintenance objectives. This is expressed as a percentage of expectancy that a replacement part will be in stock when a failure occurs. Choose between:

- 98% (A complete list of recommended spares will be provided)
- 95% (Excludes the least used spares)
- 90% (Minimum level recommended for effective on-site self-maintenance)

Take advantage of this *free* service and make sure you have all the necessary tools for effective maintenance. Call your sales representative today!

Self-Maintenance Program Information Line

Questions about Self-Maintenance? Call the experts!

Chances are you'll be faced with some questions you just can't answer on your own. When that happens, call on us. The Self-Maintenance Information Line is staffed with knowledgeable personnel who can assist you in many aspects of planning and implementing your maintenance program.

Call (603) 884-5000 and get the answers you need:

- Suggestions for planning your maintenance strategy
- Literature References
- Information about any of Digital's self-maintenance programs and customer support services

There is no cost to you for this service. Call us! The Maintenance Information Line is open Monday through Friday from 8:30 AM to 5 PM (ET).

Spares Part Number Assistance

You know the part you need, but don't know the part number? We'll find it for you!

Tracking down a part number can slow down your maintenance efforts. Instead of losing valuable time, call for Spare Part Number Assistance at (603) 884-5000. Our specialists can quickly find the right number for you. You can also call on them to:

- Identify the spares kit which contains the item
- Interpret and distinguish mechanical specifications
- Identify critical spare part numbers for high volume products
- Do spares technical research
- Cross reference to identify replacement
- Cross reference vendor part numbers for Digital products
- Identify associated next higher assembly
- Assist in making the appropriate spare part buying decision
- Determine whether a field replaceable unit is available
- Refer to the appropriate illustrated parts breakdown

Part Number Assistance lines are open Monday through Friday from 8:30 AM to 5 PM. For this *free* service call (603) 884-5000.

Unlisted Parts Service

It's an unlisted maintenance part, but it may still be available. Call us! We will provide you with a quote to help you place your order.

Some lower level assemblies and non-critical parts are not included in this directory. To request such a quotation, call the Unlisted Parts Service (UPS) at (603) 884-5001. Within ten working days you will receive a quotation with a price and delivery.

The following information must be provided with all requests:

- Your name, company name, address and phone number
- Part number, description and quantity requested item
- Digital option on which item is used

Responses to requests will be based on the current availability of requested material.

This service is **not an expedited parts delivery service**. For fastest response time and delivery, we recommend you order parts listed in the price book.

Unlisted Parts Terms and Conditions

- Orders for Unlisted Parts must be placed as a separate order referencing a UPS quotation number
- Discounts do not apply
- \$50 minimum per line item
- Quotations are valid as stated on the quote
- Unlisted part requests can be made for the following part classes only: 12, 17, 18, 23, 29, 30, 36, 54, 57, 70, 74, 90, and some alpha series (i.e. BCXXX-XX, MXXXX-XX).

- Purchaser must accept partial delivery and partial payments
- All orders received will be processed under both Unlisted Parts' and Digital's Standard Terms and Conditions.
- Orders will be filled providing material is available on receipt of order.
- Unlisted Parts Service is open Monday through Friday from 8:30 AM to 5 PM (ET).

Emergency Order Service

Keep a crisis under control. Our lines are open 24 hours a day!

A system has gone down that's critical to your organization. Get the parts you urgently need. Call the Emergency Order Service anytime, 24-hours a day.

Call at Any Hour

Customers in the U.S. call (603) 884-7063 Monday through Friday, 8:30 AM to 5 PM (ET). At any other time, call (508) 369-5900. Customers outside the U.S. should contact their local Digital subsidiary.

Shipping Commitments

Shipping commitments will be given only between 8:30 AM and 5 PM (ET), Monday through Friday! For orders received on any other day, shipping commitments will be given on the following work day.

For orders received during the normal work week, you'll get the status of your order within three hours. In the rare event that the part is out of stock, we will recommend alternative action. For example, we may suggest calling on Digital Field Service, or ordering the next highest assembly.

Here's what we need to process your order:

- Digital device type that is inoperable
- Machine serial number
- Billing, shipping information and stocking location
- Purchase order number
- Tax status
- Insurance by customer or Digital
- Part number (limit 2)
- Quantity (limit 2; more at Digital's discretion)
- Customer's name and phone number

Delivery and Service Fees

For all U.S. emergency orders, charges include current list price for part(s), shipping charges, and a \$100 service charge per order. In subsidiaries, charges include local price for part(s), air freight, custom charges, and a service charge determined by the subsidiary.

Restrictions

- Only domestic U.S. orders can be serviced
- Limit of two orders per month per customer stocking location
- Parts limited to those designated as spares by Digital
- Limit of two part types per order, maximum quantity of two each
- Service provided for a machine down situation only
- Non-U.S. customers contact their local Digital subsidiary
- No discounts apply
- Parts are not returnable

This service is available to U.S. customers who are providing hardware maintenance service on Digital products that are owned, leased or resold by the purchaser.

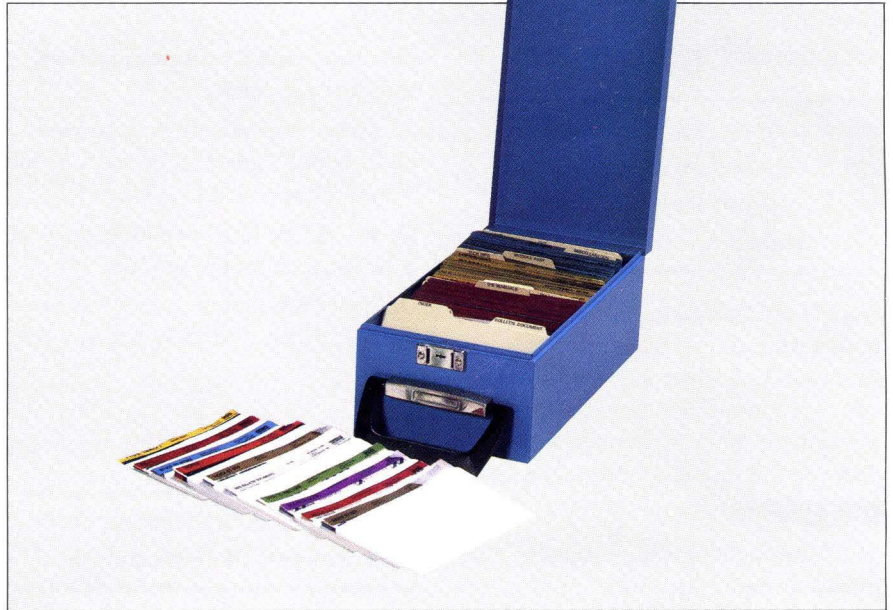

Maintenance Documentation Service

A compact tool to keep your maintenance documentation current!

Having the proper documentation and knowing where to find it is essential. With that in mind, Digital developed Maintenance Documentation Service (MDS).

All the information you need in one compact file box. The MDS library is on easy-to-use microfiche. So you no longer have to sift through cumbersome volumes of information.

Documentation on the devices you service. Your MDS library gives you complete, current information on entire "families" of Digital products, whether you service VAX or PDP-11 systems, terminals, or other systems.

- Each MDS library includes:
- Hardware Manuals
 - Illustrated Parts Breakdowns
 - Revision Matrix
 - Preventive Maintenance Manuals
 - Diagnostic Listings
 - DEC-O-LOG (FCO Synopsis)
 - FCOs (Field Change Orders)

Something New! A small change with extra savings built in

We have made it easier for you to order the MDS Libraries and Update Subscription Service. When you decide which MDS product you want to purchase, one order number will automatically combine a library with the correct update subscription service.

You need not worry which Update Subscription Service should be ordered with your library. Just consider whether you want to receive one year of Update service or two.

For example:

MD-VAX-01 Orders the library plus one year of updates.

MD-VAX-02 Orders the library plus two years of updates.

The MDS part numbers have changed and so have some of the prices. Refer to the Documentation Price List in Section Three of this book for a complete list

of new order numbers and prices, or contact Part Number Assistance at 603-884-5000.

Self-Maintenance Support for the New MicroVAX 3300/3400 Systems Features “Kernel Kits”

The MicroVAX 3300/3400 system is a higher performance, replacement product for the highly successful MicroVAX II computer. The MicroVAX 3300/3400 system offers more than two times the CPU performance, increased memory capacity, and new DSSI storage devices in BA213 and BA215 packaging.

The MicroVAX 3300/3400 system enhances the growth of the very successful MicroVAX family of products.

Digital's Self-Maintenance Services organization is pleased to support this new system family with the products highlighted in the accompanying spares matrix.

Once again our support for this new computer family features kits that consider the commonality of spares across a large number of systems. Our “Kernel Kits” will provide base-level spares for these systems. Additional spares are available in an *a-la-carte* fashion depending on your specific configuration.

This support concept is intended to eliminate sparing redundancies across systems and to help reduce the number of decisions in your service planning and ordering process.

Kernel Kits

Four “Kernel Kits” have been configured to support all 72 of the new MicroVAX 3300/3400 series packaged systems. Their content and commonality are detailed in the following matrix. The hardware spares included in each are indicated by an “X” in the column directly below the kit part number.

Announcing Service Products for Digital's New, State-of-the-Art, Thin Film Disk Drives

RA70 Disk Drive

The RA70 disk drive launches a new generation of Digital's high-technology disk products. The RA70 is a 5.25-inch form factor, random access, moving head Winchester disk drive that utilizes thin film media technology. It has a formatted capacity of 280 MB and is designed for I/O intensive applications. It features full DSA/SDI functionality, dual ports, high reliability, high performance, and high capacity in a 5.25-inch format.

The RA70 disk drive is made up of two major replaceable spares: the HDA assembly, and the Electronics Control Module Set (ECM). The ECM is a combination of two modules which must not be separated. This is partly because of ESD sensitivity, but mainly because the drive's internal error log is only on one of the modules. In order to interpret and analyze the error log information the two modules must remain together as a set.

The table on this page shows the maintenance products that Self-Maintenance Services currently offers to support the RA70 disk drive.

Hardware Spares Kit

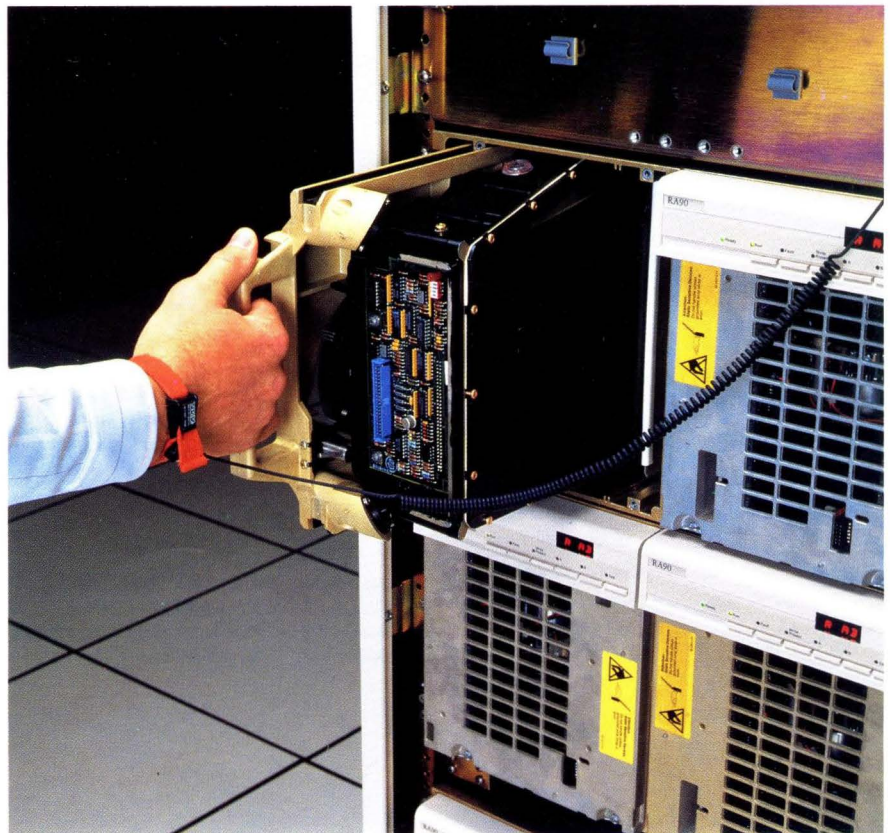

| Part Number | Description | Quantity | Unit Price |
|-------------|-------------------------------|----------|------------|
| 4A-RA70-A | RA70-A Spares Kit | | \$8,117.00 |
| 70-21946-01 | HDA Assembly | 1 | 5,394.40 |

| EK-RA70A-IP | Illustrated Parts Breakdown | 1 | 20.00 |
| MP-01428-01 | Printset | 1 | 358.00 |

Repair Services

| Part Number | Description | DECmailer Price | Factory Repair Price |
|-------------|---------------------------|-----------------|----------------------|
| 70-21946-01 | Head Disk Assembly | \$4,315.00 | \$4,099.00 |
| 70-22494-01 | Electronic Control Module | 1,125.00 | 1,069.00 |

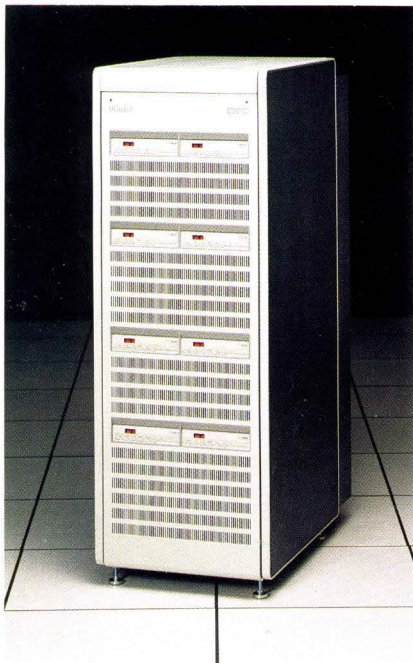

SA600 Storage Array

The SA600 Storage Array is based on the 1.2GB random access, moving head RA90 component disk drive. The RA90 uses state-of-the-art thin-film heads and media. It also occupies half the physical space of an RA81 disk drive.

Each SA600 storage array can have up to eight fully independent DSA/SDI compatible RA90 component drives mounted in it. The 60-inch high SA600 storage array cabinet has the same physical dimensions and is electronically similar to the SA482.

Each RA90 is made up of six major replaceable spares: Power Supply, Operator Control Panel, Preamp Control Module, Blower/Bezel Assembly, Head Disk Assembly, and the Electronics Control Module (ECM). Like the RA70, the RA90 ECM set must not be separated.

The table on this page shows the maintenance products that Self-Maintenance Services currently offers to support the SA600 Storage Array.

Hardware Spares Kit

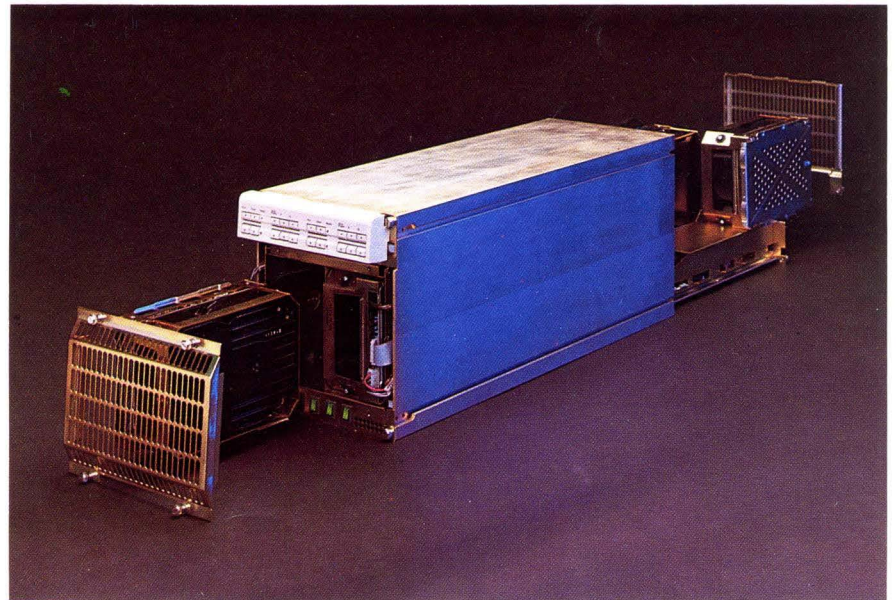

| Part Number | Description | Quantity | Unit Price |
|-------------|---------------------------|----------|-------------|
| 4A-RA90-00 | RA90 Spares Kit | | \$23,701.00 |

RA8X Head Disk Assembly (HDA)

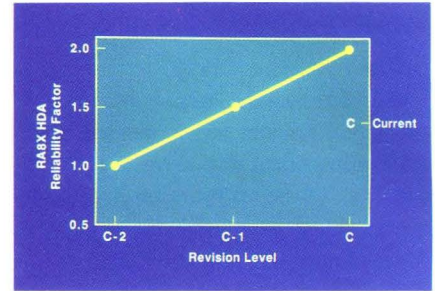

Long Term Investments Can Pay Big Dividends

Digital is committed to using only the highest quality replacement parts in providing service to our customers. As part of our ongoing research on improving the quality of our products and spare parts, we discovered that we could achieve a substantial improvement in reliability by ceasing to repair our HDAs and employing only brand new, or “new build” HDAs. While this did increase the cost of the replacement

HDAs, the cost was far more than offset by the reliability improvements.

In the past, our research revealed that each repair cycle on an HDA decreased the reliability of the HDA. The mean time between failures of repaired HDAs was increasing creating costly downtime.

This graph charts the reliability improvements over the last three revisions of HDAs. The reliability has doubled over just the last two revisions.

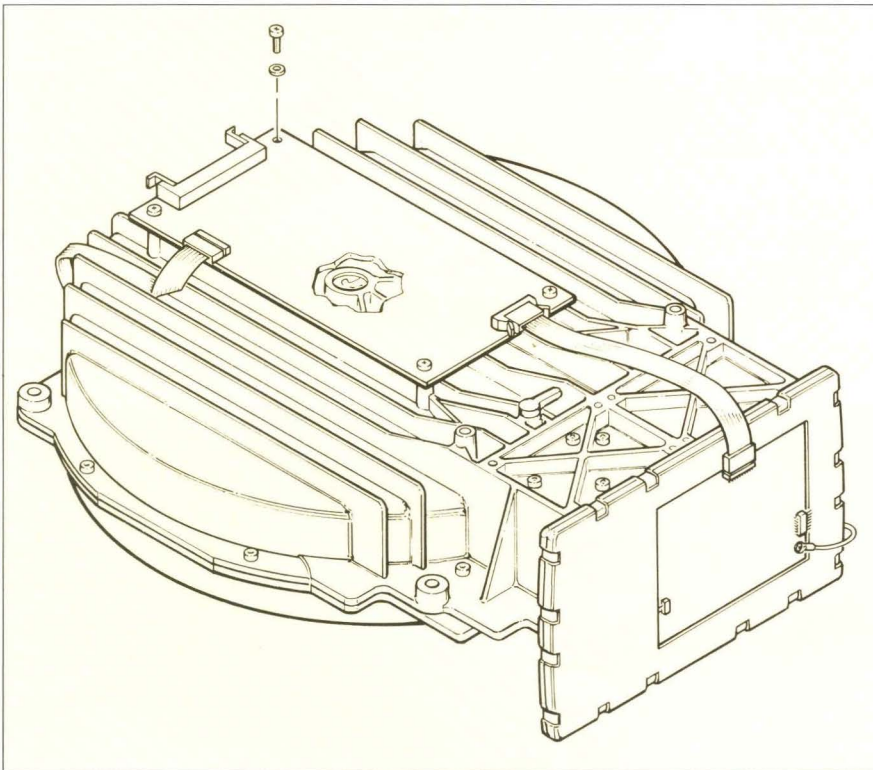

New Build HDAs Offer the Best Deal

Another point to consider is HDA life. These are electro-mechanical devices and eventually they “wear out.” A new HDA delivers all new parts. When you buy an HDA that is repaired, you really don’t know how old the HDA and each of its components are, or how long it will be until the next part wears out.

All Digital replacement HDAs are subjected to the same extensive test processes as our new disk drives.

This analysis clearly demonstrates that “new build” results in a superior replacement HDA in terms of Quality, Reliability, and Life.

Don’t be misled by vendors offering lower prices for repaired HDAs. In light of the facts, the choice is clear: new build HDAs are a better deal, the best deal.

DECmailer — Convenience and Cost Savings!

DECmailer

DECmailer is Digital's fast, reliable and economical mail-in parts replacement service. We designed DECmailer to help you stretch your maintenance budget by providing the repair resources you need — spare parts and skilled technicians — so you can allocate your maintenance resources for the most critical repairs.

Take a look at some of the features:

- **Fast Turnaround.** Within five days of receiving your faulty part we will send you a replacement.
- **Larger Repair Menu.** Over 2,000 replacement parts are eligible.
- **Emergency Dispatch.** In an emergency, available parts will be shipped to you within 24 hours of your call. (There is an additional fee for this service.)
- **90-Day Warranty.** We will replace free of charge any repaired part that malfunctions within three months of shipment.
- **Transaction or Monthly Billing.** Choose either an open account with a monthly invoice or an invoice for each line item to help you manage your repair budget.
- **Reference Number for Tracking Orders.** (optional) We help you track replacement part orders by using your designated reference number when we receive your part. This number is printed on both our shipping document and invoice.
- **Pre-addressed Shipping Labels.** A more convenient way to mail the defective parts back to us.
- **Technical Improvements.** Your replacement part will be updated with the current technical improvements.
- **Fast Return Freight Paid by Digital.** We will send a replacement part via a two-day package delivery service — and we pay the cost of return shipping.

- **Quarterly Activity Report.** This report summarizes all DECmailer activity for a 3-month period, including the amount of time it takes to turn around your order. This report is a valuable tool for reconciling your account and planning your inventory needs.

DECmailer is available for all qualified customers who maintain their equipment to the module and subassembly level. Call us at 1-800-225-5385 for a complete application kit!

Another feature for DECmailer customers!

DECmailer Emergency Dispatch Service

Follow these instructions for your emergency repair needs:

1. Check the price listing, to be sure the part is available under DECmailer.
2. Call our facility in Woburn, Massachusetts, between 8:30 AM and 8 PM (EST) at 1-800-225-5385.
3. Specify that you want to use the Emergency Dispatch feature of your DECmailer account. Be prepared to provide the following:
 - DECmailer account number
 - Type of machine
 - Machine serial number
 - Ship-to information
 - Special instructions (hold at airport, etc.)
 - Part(s) required
 - Requester's name and phone number
4. Within three hours of the phone call, we will contact you about the availability of the part(s).

5. Available parts will be shipped via air freight within 24 hours of the initial phone call. For emergency orders confirmed after 4 PM, this means the first available commercial flight on the next working day.
6. Return the defective part to our facility within 10 working days, referencing the DECmailer line number and using the Emergency Dispatch label.
7. If the defective part is not returned, or if the board you returned is unrepairable or below acceptable etch level, you will be charged 100% of the manufacturer's list price.
8. If you return your defective part within 10 working days and we meet our obligations, your next invoice will include charges for the Emergency Dispatch Service (50% uplift plus \$125 handling charge).

90-day Warranty Provisions

We will replace free of charge any part shipped under DECmailer if it fails within 90 days.

If this occurs, *do not* return the part against your DECmailer reference number. Please follow these instructions to prevent duplicate charges.

1. Call the CRC at 1-800-225-5385. Be prepared to provide the following:
 - Your DECmailer number
 - Part and serial numbers of defective item
 - DECmailer line number on which part was shipped to us
2. We will provide you with a Return Authorization Number for return of the part and will ship a replacement at no charge to you after we receive the faulty part.

Factory Repair

Factory Repair (and Same Board Repair) Service is an economical and convenient way to supplement your maintenance efforts. This service provides the same quality repair service as DECmailer, but with an extended turnaround time and a lower cost. This program is available for all Digital customers who maintain their equipment to the module or sub-assembly level.

On a limited number of parts under this program, we repair your part, upgrade it to the current revision level, and return it within six to eight weeks. For the remaining items we reserve the right to ship a replacement part within the six- to eight-week time frame.

How to Use Factory Repair/ Same Board Repair Services

1. Call the CRC at 1-800-225-5385 for a Return Authorization number. Be prepared to provide your full "bill to" and "ship to" address, purchase order number, quantity, part number and serial number.
 2. Pack the defective part(s) to prevent damage during shipping.
 3. Include a packing list showing your return address and Return Authorization number.
 4. Ship the part prepaid to the CRC (by a traceable method of transportation) to the address listed below. To ensure a prompt receipt, make sure to include the RA# on the outer carton and all associated paperwork.
- Digital Equipment Corporation
 33 Cabot Road
 Woburn, MA 01801
 Attn: Stockroom 26
 RA# _____
5. If repair time exceeds a reasonable period, we reserve the option to ship a replacement part with your approval.

The Customer Returns Center and Digital's Hardware Product Foundation Warranty

FRU Repair/Replacement Service

The Hardware Product Foundation Warranty is a limited warranty consisting of one-year return of a system's or option's field replaceable units (FRUs) to the Customer Returns Center (CRC) with free repair or replacement of the FRU. Each system or option has a defined set of FRUs. The list is available on request from your local Digital sales representative.

FRUs as defined by Digital are the only parts eligible for coverage. FRUs in need of repair due to improper treatment or use are not eligible for return. If FRUs are returned and are subsequently deemed ineligible, Digital may demand return of any replacement FRUs or charge for the full List Price value of the replacement FRU(s) and will return the ineligible FRU(s) upon receipt of payment or the replacement FRU(s).

Before returning any FRU to Digital for replacement, you must call the CRC at 1-800-225-5385 to obtain a Return Authorization Number (RA#). The following information will be required:

- Your full Ship-to and Bill-to Address
- The Part Number(s) and Serial Number(s) of the FRU(s)
- The System or Option and Serial Number
- The Original DEC Order Number (DEC#)

The RA# which you are given should be placed on the shipping label, on the packing list, and on all associated paperwork and correspondence. The eligible FRUs should be protected against Electro-Static Discharge (ESD), packaged to prevent damage in shipment, and shipped pre-paid to Digital. The CRC will use best efforts to, at its option, repair or replace eligible FRUs within 15 working days of their receipt and acceptance at the CRC receiving dock. Return shipment of replacement FRU's will be F.O.B. Digital shipping point.

All repairs/replacements are warranted against defects in workmanship and material until the completion of the original, one year warranty.

Repaired and/or replacement parts will be at the current revision level. In the event newly installed Field Engineering Change Orders (FCOs) cause an incompatibility or other interference within your system the resolution for such incompatibility or interference is your responsibility.

If you have questions concerning the return of FRUs under the Hardware Product Foundation Warranty, call the CRC.

Computer Site Environmental Surveillance Products

There When You Can't Be

Emergencies can occur at any moment. You won't always be there when a serious power fluctuation disturbs your computer room, or a water leak short circuits your hardware. Digital's Environmental Products offer protection for your computer investment.

For more information about Environmental Products please complete and return the business reply card in this book.

EMS and REMS...Two New Products

The Environmental Monitoring System (EMS)

Timely Warnings Against Environmental Threats

EMS is an advanced, microprocessor-based data collection system built to handle the electronic environmental surveillance of any computer site and its supporting equipment. The unit uses from one to 112 external sensors/probes to provide real-time sampling of physical environmental changes.

It then compares these changes to user-established thresholds. When a predefined threshold is exceeded, EMS will indicate that an alarm is present, and record the alarm data chronologically until it is retrieved manually.

EMS (H7310) functions as a stand-alone unit or daisy chains together with up to seven additional EMS units to form a monitoring network. It can also be daisy-chained to Power Conditioning Systems Plus (H7318) and Power Distribution Systems Plus (H7317) to expand network monitoring capabilities. The EMS unit is an economical solution for computer room surveillance needs and is easily installed at conventionally wired computer sites.

VAX Remote Environmental Monitoring Software (REMS)

Real-Time Centralized Reporting

Building on the power of the VAX/VMS operating system, REMS layered software allows you to monitor every room in your computer network from one place. You can monitor local or remote computer sites from any VT100-compatible terminal. REMS receives collected environmental monitoring information from either the new Environmental Monitoring System, the PCS+, or the PDS+. It then communicates that information, in real-time, to a central location. REMS' centralized reporting feature allows you to have a network of environmental products at your fingertips.

REMS continuously collects information and stores it in an indexed sequential file, creating a database on power conditions, temperature, water, air conditioning, and other probes that you may specify. REMS can then generate statistical reports, send mail, or call up subroutines to prevent environmental failures and, in turn, prevent problems from recurring. For example, REMS can call up an operator-programmed, logical computer shut down in response to an abnormally high temperature in your computer room.

Digital's Solutions to Power-Related Problems

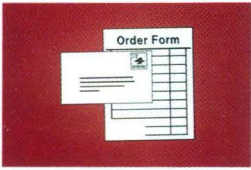

- **HA3000 Uninterruptible Power System (UPS)** — Three-phase UPS provides battery back-up and full power conditioning for mid-sized to large systems. Designed to support non-linear power loads, it features microprocessor-controlled operations, PWM inverter technology, static and maintenance bypass, and online diagnostics. A small footprint and sealed maintenance-free batteries allow the HA3000 to fit the computer room environment.
- **PCS+ /PCS** — Conditions, distributes, monitors. Protects from high energy, transients, impulses, voltage sags and surges; phase rotation; improper wiring or grounding; electrical noise.
- **PDS+** — Distributes, monitors. Protects from phase rotation; improper wiring or grounding; electrical noise.
- **CVC** — Conditions, distributes. Protects from high energy, transients, impulses; voltage sags and surges; improper wiring or grounding; electrical noise.
- **TVSS** — Suppresses. Protects from high energy, transients, spikes.
- **Standby UPS** — Protects against black-outs; high energy; transients; impulses; spikes; electrical noise.

Save time and money! Order all your spares and maintenance products directly from Digital

Order by Phone

Call 1-800-344-4825. For your convenience, lines are open from 8:30 AM to 8:00 PM (ET).

Order by Mail

Orders by mail may be placed by sending your purchase order direct to:

Digital Equipment Corporation
P.O. Box CS2008
Nashua, NH 03061

Sales Office

Purchase orders may be placed directly at any Digital Sales Office.

Minimum Order. Minimum order is \$35 unless you prepay by check, money order or credit card. (Phone and mail orders only.)

Credit Cards. MasterCard and VISA accepted. (Phone and mail orders only.)

Terms. Terms are payment with order. Or, if you have an approved account, terms are net 30 days.

Prices. Prices are listed in U.S. dollars and are subject to change without notice. The price charged will be the price in effect when Digital receives the order.

F.O.B. Shipping Point.

Shipping Information. Pay for your order in advance, and Digital will prepay and absorb all UPS or other surface freight shipping charges within the continental U.S. including Alaska, Hawaii and Puerto Rico. When Digital is required to invoice you for your order, transportation charges will be prepaid and added to your invoice.

We will make partial shipment to speed your order along, unless you specify "must ship complete."

Discounts. Your order may qualify for substantial discounts in conformance with the Digital Corporate Discount structure. All Spares, Diagnostics, Documentation, and Environmental Products are eligible for discount under the Digital Business Agreement (DBA).¹ Refer to the Spares Parts List Index (page 92) in this book for specific discount information.

To receive your discount, please be sure to reference the correct Discount Agreement Number and your Customer Account Number when placing your order.

Product Availability. To ensure that you are prepared, we recommend that you have an inventory of Spares Kits for your CPUs and options. These are shipped within 30 days. See the Diagnostics and Kits sections in this book, or contact your local sales office to obtain a suggested list of kits for your equipment.

Loose piece parts, to replace inventory as the Spares Kit contents are consumed, are shipped within 30 days. Software diagnostics products are shipped within 60 days.

Returns. To ensure prompt service for credit or exchange, call your Customer Service Representative for the required return authorization number. Report any order discrepancies promptly, within 30 days of ship date.²

Call for Service

We're available by telephone. Call us for the following services:

- **Self-Maintenance Information Line**
(603) 884-5000

For recommendations of the products you need or to answer your questions. (See the description of this service on page 4.)

- **Spares Part Number Assistance**
(603) 884-5000

When you know the part you need, but not the part number. (See the description of this service on page 4.)

- **Unlisted Parts Service**
(603) 884-5001

To determine if an unlisted part is still available. (See the description of this service on page 5.)

- **Emergency Order Service**
(603) 884-7063 8:30 to 5:00 weekdays
(508) 369-5900 other times

For service 24 hours a day in "machine-down" situations. (See the description of this service on page 5.)

- **DECmailer**
1-800-225-5385

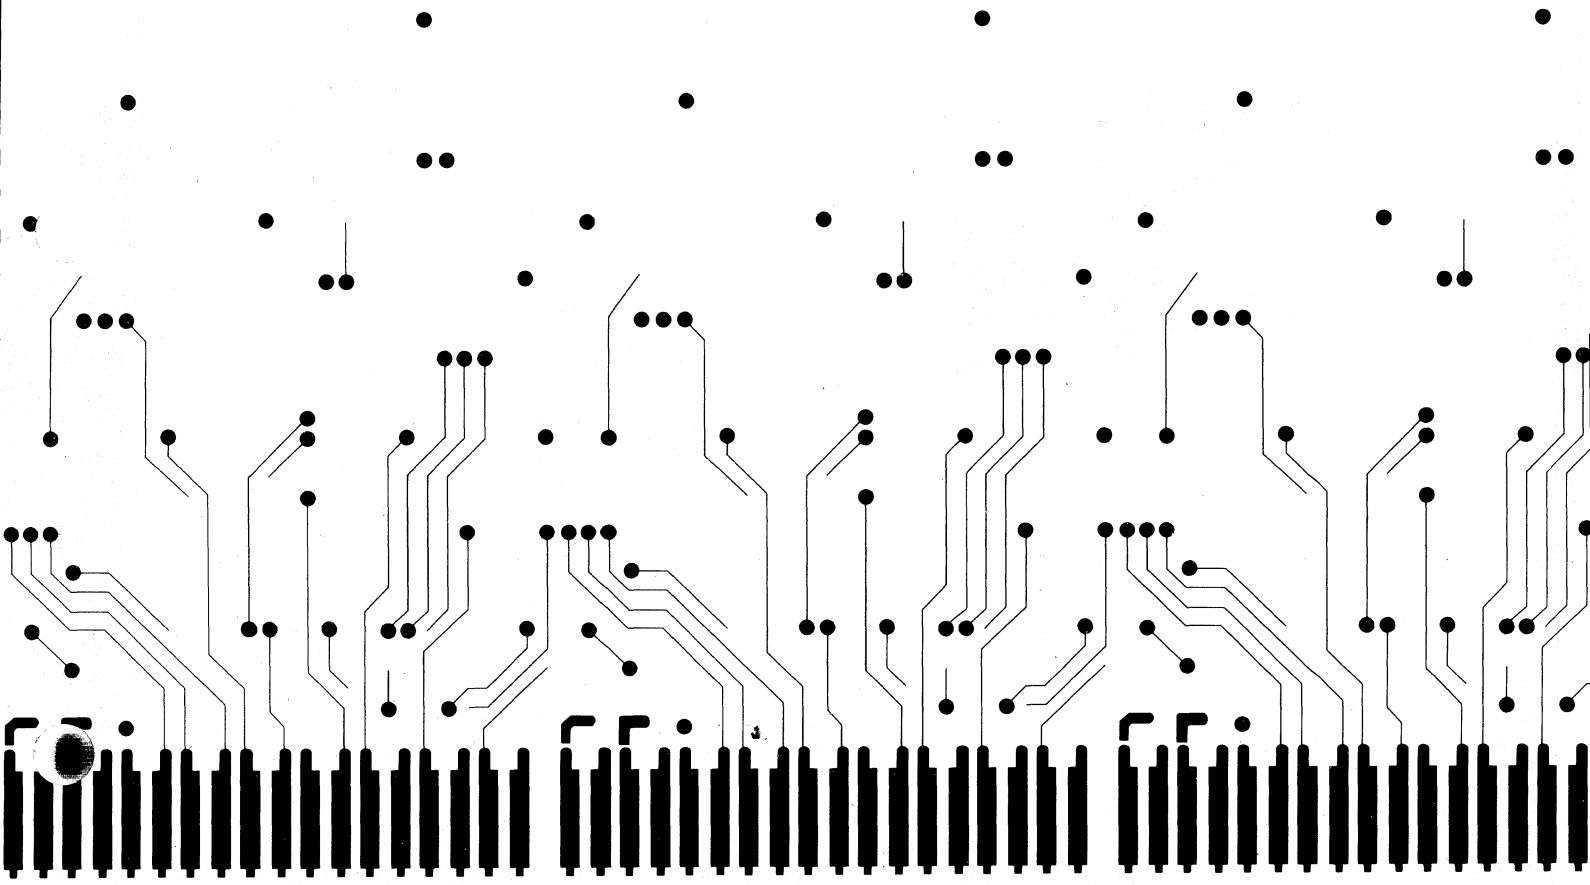

In MA, AK, or HI call
(617) 938-2280 collect

When you need a part repaired. (See the description of this service on page 13.)

¹Discountable under the DBA End User Volume Curve "A."

²Documentation products may not be returned for credit.

System Spares Matrices

How to Use the System Spares Matrices

The matrices on the following pages are a reference tool to help with your inventory planning. These matrices help you to see the commonality of spares across systems, and thus allow you to plan the most effective inventory of spares for your systems. The basic structure of each matrix is the same, and it is easy to interpret.

Simply scan the left column for your designated system. The spares that are recommended for that system are indi-

cated by an "X" in the adjacent boxes. The part numbers to use in ordering the recommended spares are positioned along the base of the matrix. The options that the spares support are listed at the top of the matrix.

In the case of hardware spares and documentation, the "X" signifies that these are recommended support items. An "X" in the license column under "diagnostics" indicates that diagnostics are available, and proper licensing is required.

The shaded areas in the matrices indicate one of two situations:

- A single system option requires more than one spare for support. The shading will cover all of the columns of spares recommended for that option, with the option designation repeated at the top of the matrix and the part numbers for the different spares at the bottom.
- A single spare part services more than one system option. The shading will cover all of the columns of options that the spare services, with the part number for the spare repeated at the bottom, and the different system option designations at the top.

Diagnostics

Digital's Self-Maintenance Services offers diagnostics products of the same quality and scope as those used by our own Field Service engineers.

Licensed maintenance diagnostics are available for the VAX-11 family systems,

VAX 8600/8650 systems, MicroVAX systems, and VAXBI systems. Copyrighted diagnostics are available for the PDP-11 and MicroPDP-11 systems.

The following sections describe which diagnostics are appropriate for your sys-

tem. More detailed information on the restrictions governing the purchase and use of Digital's licensed diagnostics and copyrighted diagnostics is available in the Policies Section at the back of this book.

Diagnostics for VAX-11 Family Systems, VAX 8600/8650 Systems and MicroVAX II Systems

"C" and "DZ" License Codes

Diagnostics for these systems are sold by ordering a single use, end-user license. When the diagnostics are ordered, license prerequisites are verified and registration takes place. The following information will be helpful in answering any questions you have about purchaser requirements.

Who can order these products?

The customer must be the owner, lessee or end user in physical control of the computer system for which licensed diagnostics are being ordered.

What is the minimum first order?

To run diagnostics on a single CPU system, (dual processors are considered a single CPU,) you must order a license code "C" category diagnostic kit (for example, part #ZXXXX-CX). The kit includes a license to use the program on a single system, plus machine-readable diagnostic software on either tape, floppy, or disk.

What if I have additional systems?

If you want to use the diagnostics on additional systems you must also order a license code "DZ" category kit. (For example, part #ZXXXX-DZ.) With this license you can copy the diagnostic software from the original "C" kit and use it on a single additional computer system. There is no media or documentation included with the "DZ" category kit. Verification of the primary "C" license order for the same CPU type is required.

What about Diagnostic listings?

Diagnostic listings must be ordered separately from the kit. The listings can be ordered as part of the Maintenance Documentation Service (MDS) Library. For a description of all that's included in MDS see page 6. (Refer to Section B of the Price List in this book for MDS part numbers and prices.)

How do I keep my diagnostics current with hardware changes?

Because new products are released regularly, existing diagnostics may be enhanced at any time. Digital's Diagnostic Subscription Update Service helps you keep diagnostic software current with your hardware. Updates are available for each computer family. (For example, part #ZXXXX-HX.) Verification of the primary "C" license order for the same CPU type is required.

What are the specific diagnostic products I need for my system?

See the charts below.

NOTE: All "C" licenses are in binary form. No diagnostic listings or support services are included in the purchase of the license. Diagnostic Module L0006-YA is a prerequisite for the VAX-11/750. It must be ordered separately.

VAX-11 Family Diagnostics

|--|------|----------|----------|----------|---------|----------|---------|
| VAX 8600/8650 SPD #26.82.01 | RL02 | ZK200-CH | \$18,000 | ZK200-DZ | \$1,890 | ZK200-HH | \$5,250 |
|--|------|----------|----------|----------|---------|----------|---------|

MicroVAX II Diagnostics (MDM)

| Product | Media | Single System License Part # | Price | Additional System License Part # | Price | Annual Update Service Part # | Price |
|---|---------|------------------------------|----------|----------------------------------|--------|------------------------------|--------|
| MicroVAX II SPD #28.09.03 KA630 CPU | RX50 | ZNABX-C3* | \$ 2,625 | ZNABX-DZ | \$ 158 | ZNABX-H3 | \$ 714 |
| | TK50 | ZNABX-C5* | 2,625 | ZNABX-DZ | 158 | ZNABX-H5 | 714 |
| MicroVAX Development SPD #28.16.00 KA630/650 CPU | Magtape | ZNA03-CM** | \$10,500 | ZNABX-DZ | \$ 158 | ZNA03-HM | \$ 420 |
| | TK50 | ZNA03-C5** | 10,500 | ZNABX-DZ | 158 | ZNA03-H5 | 420 |

The MicroVAX Development (MDM) kit can be purchased in addition to MicroVAX II diagnostics. It will help you develop customized diagnostics for

your MicroVAX system. Because these will be based on Digital diagnostics, you must purchase an additional code

“DZ” license if you wish to copy the developed diagnostics (in whole or in part) for use on an additional system.

*Purchase of license and media includes loopback connector.

**Customer must have purchased ZNABX-C3 or ZNABX-C5 in order to purchase this kit.

digital To Order, Call DECdirect at 800-344-4825. 8:30 AM to 8:00 PM (ET) in the Continental USA.

VAXBI System Diagnostics

“UZ” License Codes

Diagnostics for all VAX systems require a license to operate, which is valid only for the specific CPU. Self-Maintenance Services introduces a new policy with the introduction of the VAXBI Diagnostic Family. (The existing policy of ordering licenses “C” and “DZ” still applies for the MicroVAX II, the VAX-11 series, the VAX 8600 and VAX 8650).

With the introduction of diagnostics for the VAXBI family, a customer must order a “UZ” license code category diagnostic license for each CPU. This is an end-user license only, and it is required for each system using Digital diagnostics. An “HW” media kit contains the required media and User’s Guides supporting the specific licensed CPU. This is usually ordered in conjunction with the “UZ” product license.

In order to ensure license holders a means of keeping their diagnostic software current with their systems hardware/software, Digital provides an Annual Diagnostic Update Service which carries the “WW” category code.

This yearly subscription provides media updates upon release (several times a year). The subscription service is ordered for each licensed CPU to be updated. It is recommended that customers order the update subscription service with the “UZ” license purchase.

When you order diagnostics for your system, be aware that you actually order two separate parts: the media kit and the license to use the diagnostics contained on the media. The “UZ” license must be ordered first, then the media can be ordered by specifying the appropriate “HW” kit.

Do you have an additional CPU? You must order a “UZ” license for each additional CPU. If appropriate, the “HW” kit already ordered may be copied onto additional CPUs for which “UZ” licenses have been ordered. This authorization to copy is included in the “UZ” license ordered for each additional CPU.

Example of Minimum Order Data for Diagnostics

This example uses VAX 8200 system diagnostics as an example. The first order would be:

- Z5200-UZ License
- Z5200-HW Media Kit
- *Z5200-WW Update Subscription

For each subsequent order of the same type of CPU:

- Z5200-UZ License
- *Z5200-HW Media Kit
- *Z5200-WW Update Subscription

*The starred items are optional.

Update Service Note

Licensed users of VAX Diagnostics may order the Annual Subscription Update Service at the prevailing rate for such updates. The update is distributed in binary form on the appropriate medium and includes no installation or other services unless specifically stated. In order to keep your diagnostics current you must order the update service when you order the “UZ” license.

VAXBI
DIAGNOSTICS

PDP-11 Family Diagnostics

PDP-11 Diagnostic software can be ordered in the same way as any of the other products in this book. You are not required to purchase a single-use, end-user license. However, the software is protected by U.S. copyright. The copyright laws prohibit the user from copying software programs except for archival purposes.

All PDP-11 Diagnostics contain media only. Diagnostic listings are available through the MDS library. (Refer to Part B in the Price List section of this book for MDS part numbers and prices.)

The following media contain diagnostics for the entire PDP-11 or MicroPDP-11 family, including all supporting devices.

In the following listing, there is a * in the Part Number. This star replaces a letter that indicates the current revision of the product. Refer to Part B in the Price List to get the actual current revision letter for the part number you desire.

PDP-11 and MicroPDP-11 Diagnostics

| Product | Media | Part # | Price |
|-----------------------------|----------------|--------------------------------|------------|
| PDP-11 | RK06 | AM-FJ44*-MC | \$750 |
| | RK07 | AY-T539*-MC | 750 |
| | RL02 | BC-FH95*-MC | 750 |
| | 1600 BPI MT | BB-FF99*-MC | 750 |
| | 800 BPI MT | AP-FK21*-MC and AP-FK22*-MC | 375 375 |
| | TU81, 6250 BPI | BM-FJ93*-MC | 850 |
| MicroPDP-11 Only: | RX50 | ZYA05-P3 | 714 |
| | TK50 | ZYA05-P5 | 714 |
| MicroPDP-11 Formatter Only: | RX50 | BL-FN7AC-MC | 89 |
| | RX33 | ZYA06-P3 | 89 |

PDP-11 Family Diagnostics on TU58 or RX02 Media

If you need TU58 or RX02 media you must purchase individual diagnostics for each CPU and device. Use the chart below and on the following pages to determine the appropriate part numbers.

Refer to Part B of the Price List for the prices of these products, and for the current revision letter that replaces the asterisk shown in the part number.

PDP-11 Family Diagnostics on TU58 or RX02 Media

| Device | TU58 Part # | RX02 Part # |

Section Three
Self-Maintenance Products Price Lists

How to Read the Price List

The following pages list all the Self-Maintenance Products, both kits and individual items, in alpha/numeric order by part number. Each part number listing includes extensive information as shown in the following example:

| Part Number | Description | Unit Order | Unit Price | Rep | D | L | Replacement Part No. |
|-------------|--------------------|------------|------------|-----|---|---|----------------------|
| 70-18491-01 | Head/Disk Assembly | Each | \$5882.00 | Y | | | 3 |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |

1. Part Number—70-18491-01

The part number is formatted as follows:

Class Field: 70

Basic Field: 18491

Variation Field: 01

The 'basic field' and the 'variation field' are left-justified if alphanumeric, and right-justified with leading zeros if numeric.

2. Description—Head Disk Assembly

The description will tell you what the part number is for.

3. Unit Order

QTY: If a quantity is indicated here, the part must be ordered in multiples of that number. For example, "QTY OF 10," means you must order the part in groups of ten.

EACH: If "EACH" is indicated here, the item is ordered in individual units.

Prices are always indicated for a *single unit*, even if the order quantity is more than one. Always multiply the price given times the total quantity ordered.

4. Unit Price—\$5882

The price of a single unit of the part. Even if the unit order is more than one, the price given is for a single unit.

5. Repair

A "Y" here indicates that the part can be repaired. The cost of repairing one of these items is listed in the DECmailer or Factory Repair sections of the price list. If the part is not repairable, this column will be blank.

6. Discount

3 For end-users, a "3" in this column indicates that the part is discountable under the DBA End User, Category A (0 to 21%) Discount.

3 For OEMs, a "3" in this column indicates that the part is discountable under the DBA Reseller Volume, Category A (0 to 21%), and 0% Product Discount.

U For OEMs, a "U" in this column indicates that the part is discountable under the DBA Reseller Volume, Category B (12% to 21%), and 10% Product Discount.

If this column is blank, the part is not discountable.

7. License

This is for diagnostic products. A "B" indicates that a binary license is required. An "N" indicates that no license is required.

8. Replacement Part Numbers

If the part you are looking up is no longer available, the word "replaced" will appear in the Unit Price column. The new part number that has replaced the old will appear in this column.

Diagnostic Software Ordering

Check the information in the Diagnostics Part of Section Two to be sure that you order the software product that matches your media, service, and system requirements.

Price List Sections

A. Hardware Spare Parts and Kits

B. Documentation and Diagnostics

C. DECmailer

D. Factory Repair

E. Terms and Conditions of Sale

Part E
Purchase Policies/Terms and Conditions

Digital Equipment Corporation U.S. Standard Terms and Conditions

The following are the Terms and Conditions under which Digital Equipment Corporation ("DIGITAL") sells and licenses Products, Services, and Distributed Software in the United States of America.

1. Definitions

1.1 "Equipment" refers to computer systems (excluding software), related hardware, accessories, and spare parts listed in the Price List. Equipment may be manufactured using refurbished components or may have been used internally for ongoing reliability testing. Spare parts may be refurbished.

1.2 "Software" refers to software products (including databases), listed in the Price List, supplied with Equipment, or otherwise supplied or developed by DIGITAL including packaged application software and software supplied in connection with Services. The term "Software" applies to all parts of Software, and to new releases, updates, and modifications of Software, but does not include Distributed Software.

1.3 "Distributed Software" refers to third-party software products, including databases, licensed directly to Purchaser by a third party and identified as such.

1.4 "Documentation" refers to manuals, handbooks, maintenance libraries, and other publications listed in the Price List or supplied with Software or Equipment listed in Price List or supplied in connection with Services. The term "Documentation" does not include Software Product Descriptions, Service Descriptions, Software, or Distributed Software.

1.5 "Services" refers to DIGITAL standard software services, equipment services and educational services, for which there is a Service Description, but does not refer to custom services.

1.6 "Products" refers to Equipment, Software, and Documentation or other products furnished under these Terms and Conditions, but not to Services or to Distributed Software. For Software, other licensed Products and Distributed Software, the term "purchase" means "license" and the term "Purchaser" means "Licensee."

1.7 "Price List" refers to the DIGITAL published price list: i) applicable to the Products or Services that are the subject of a particular order, and ii) that is current when the order is accepted.

1.8 "Software Product Descriptions" ("SPDs") refers to documents of this name and any addenda thereto which provide Software specifications, warranty, and license information for Software described therein.

1.9 "Service Descriptions" refers to documents of this name which provide information regarding DIGITAL's and Purchaser's obligations for Services provided under these Terms and Conditions.

2. Orders, Prices and Fees

Prices and fees for Products, Distributed Software, and Services will be as specified in an authorized DIGITAL quotation that is current at the time an order is accepted, or in the absence of a quotation, shall be DIGITAL's standard prices and fees specified in the Price List. Fees for and services included with Software licensed under a Periodic Payment License ("PPL") may be changed by DIGITAL upon ninety (90) days' written notice.

3. Taxes

Prices and fees are exclusive of and Purchaser is responsible for all applicable taxes on the sale, license, or use of Products and Distributed Software or on the provision of Services, except for taxes based on DIGITAL's net income.

4. Delivery

Products and Distributed Software will be delivered F.O.B. DIGITAL's plants. Purchaser will be responsible for constructed transportation charges, and for insurance at rates in effect at the time an order is accepted. Purchaser may elect to provide its own insurance by providing specific written notice to DIGITAL.

5. Security Interest

DIGITAL reserves a purchase-money security interest in each Product delivered and, in the case of authorized resellers, in any proceeds of the Product including accounts receivable. Purchaser agrees to sign upon request, any document necessary to perfect DIGITAL's security interest.

6. Payment

Payment for Products and Distributed Software is due thirty (30) days from the date of delivery, provided Purchaser maintains credit arrangements satisfactory to DIGITAL. Payment for Services and of fees for which no "delivery" of Products is involved is due upon receipt of invoice.

7. Cancellation and Rescheduling Charges

Cancellation or rescheduling by Purchaser of an order for Products or Distributed Software thirty (30) days or less prior to the acknowledged delivery date will be subject to a charge to Purchaser of five percent (5%) of the list price of the Products or Distributed Software to a maximum of ten thousand dollars (\$10,000). Rescheduling of an order is subject to acceptance by DIGITAL.

Cancellation charges for regularly scheduled courses conducted at a DIGITAL facility are fifty percent (50%) of the course price if cancelled fourteen (14) days or less prior to the scheduled start date. Cancellation charges may also be incurred as specified in the applicable Service Description in the event of Purchaser's cancellation of Services furnished under agreement.

8. Installation

Products or Distributed Software will be installed by DIGITAL at Purchaser's facility in the United States if the price includes installation or if Purchaser separately purchases installation services. Availability of installation is specified in the Price List. Installation shall be deemed complete upon the successful execution of DIGITAL's diagnostic programs. Purchaser is responsible for preparation of a safe and suitable site in accordance with DIGITAL's site specifications. Additional installation charges may be imposed if DIGITAL is prevented from installing the Products for more than thirty (30) days after delivery.

9. Warranty

9.1 Equipment

Equipment is warranted by DIGITAL to Purchaser against defects in workmanship and material during the applicable warranty period.

9.1.1 The warranty period for Equipment is specified in the Price List. The period begins on the date installation is completed, or upon delivery if the Equipment is not installed by DIGITAL.

9.1.2 Warranty service will be provided in the United States at either Purchaser's facility or a DIGITAL repair facility, as specified in the Price List.

9.2 Software

DIGITAL warrants to Purchaser that Software designated as warranted in the SPD or the Price List will conform to the SPD applicable to the Software at the time an order is accepted. The term of the warranty and the manner in which DIGITAL will remedy any nonconformance is specified in the SPD or the Price List. All other Software is provided "as is." DIGITAL does not warrant that the execution of Software shall be uninterrupted or error free.

9.3 Distributed Software and Documentation

DIGITAL does not warrant the form or content of Distributed Software or Documentation, both of which DIGITAL provides "as is." Certain Distributed Software is warranted by the third party.

9.4 Limitation of Warranty

The warranties provided in Subparagraphs 9.1 and 9.2 are limited warranties and do not apply to:

- a) any Products, other than Equipment or Software, which may be sold or licensed by DIGITAL. The above are sold or licensed "as is," or are warranted directly to Purchaser by a third party, or
- b) conditions resulting from improper use of the Equipment or Software or operation of the Equipment outside the specified environmental conditions, or
- c) conditions resulting from causes external to the Equipment after delivery, or
- d) conditions resulting from modifications to Equipment or Software other than modifications made by DIGITAL.

9.5 Service Warranty

DIGITAL warrants that Services will be provided in a workmanlike manner in accordance with the Service Description applicable at the time of order.

9.6 Remedies

Purchaser's remedies for DIGITAL's obligations under Paragraph 9 are as set forth in Paragraph 15.

9.7 Disclaimer of Warranties

THE ABOVE WARRANTIES ARE THE EXCLUSIVE WARRANTIES, AND NO OTHER WARRANTY, EXPRESS OR IMPLIED, SHALL APPLY. DIGITAL SPECIFICALLY DISCLAIMS THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

10. Patents and Copyrights

10.1 Defense and Indemnification

DIGITAL shall defend, at its expense, any claim (including any suit) brought against Purchaser alleging that any Equipment, Software or Documentation furnished hereunder infringe a United States patent, copyright, or mask work right, and shall pay all costs and damages finally awarded, provided that Purchaser gives DIGITAL prompt written notice of such claim, and information, reasonable assistance and sole authority to defend or settle the claim. In the defense or settlement of the claim, DIGITAL may obtain for Purchaser the right to continue using the Equipment, Software or Documentation replace or modify the Equipment, Software or Documentation so they become non-infringing, or, if such remedies are not reasonably available, grant Purchaser a credit for the Equipment, Software or Documentation as depreciated and accept their return. DIGITAL shall not have any liability if the alleged infringement is based upon the use, license or sale of the Equipment, Software or Documentation in combination with other products (including software) not furnished by DIGITAL. DIGITAL DISCLAIMS ALL OTHER LIABILITY FOR VIOLATION, MISAPPROPRIATION OR INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS, AND FURTHER DISCLAIMS ANY LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.

10.2 Patent License

For Equipment which has a UNIBUS or Q-BUS interconnection bus, DIGITAL grants to Purchaser a non-transferable license under U.S. Patent 3,815,099, effective on DIGITAL's acceptance of Purchaser's order for the Equipment, to manufacture, but not to have manufactured, up to ten (10) Devices (as defined below) for connection to the Equipment through the bus, and to use or, to the extent that Purchaser is authorized by DIGITAL to resell the Equipment under a written agreement and any applicable addendum thereto, to sell a system containing the Equipment and the manufactured Devices. The term "Device" means a memory or peripheral unit adapted to be directly connected to the bus, or an interface for a memory or peripheral unit enabling it to be connected in such a way that the connected memory or peripheral unit is covered by one or more claims of U.S. Patent 3,815,099.

11. SOFTWARE LICENSE

Purchaser receives no right to use any Software except by the grant of a Software license by DIGITAL. A Software license identifies the Software and the processor or equipment configuration on which the Software may be executed and may identify additional license terms.

11.1 Grant of Software License

On DIGITAL's acceptance of Purchaser's order for a Software license DIGITAL grants Purchaser a Software license as provided below. For Software supplied by DIGITAL with Equipment or in connection with Services (except the Software indicated in Paragraph 13) or for Packaged Applications Software, Purchaser's order for Equipment or Services or the Packaged Application Software shall constitute the order for a Software License.

Purchaser's license shall continue unless terminated as provided herein.

These Terms and Conditions govern the license granted by DIGITAL to Purchaser and Purchaser's obligations thereunder. DIGITAL grants no Software licenses whatsoever, either explicitly or implicitly, except by acceptance of an order for a Software license. Storage media which Purchaser receives from DIGITAL may contain certain Software for which DIGITAL has not accepted an order from Purchaser for a Software license. If Purchaser desires to license this Software, Purchaser must obtain the appropriate Software licenses from DIGITAL. Technical means may be incorporated in Software to prevent Purchaser's access to unlicensed Software.

11.2 Standard License Terms

11.2.1 Software Execution

Purchaser may execute the Software on the Licensed Processor, and may load, copy or transmit the Software, in whole or in part, only as necessary for execution on the Licensed Processor, except that: i) Purchaser may execute the Software (except diagnostic Software) on another single processor or equipment configuration on a temporary basis during a malfunction which prevents execution of the Software on the Licensed Processor, and may load, transmit, or copy the Software as necessary for such temporary execution; and, ii) Purchaser may make archival copies of the Software as provided in the Copyright Law of the United States.

The term "Licensed Processor" shall mean a processor or equipment configuration of the type specified in the license: i) the serial number of which is specified in the DIGITAL license certificate furnished by DIGITAL or in the Software license order acknowledged by DIGITAL, or, if none is so specified, ii) on which the Software is first executed pursuant to the license grant.

11.2.2 Modification and Merger

Purchaser may i) modify the Software (in machine readable form only), or ii) merge modified Software or unmodified Software into other software, to form adaptations intended solely for execution by Purchaser on the Licensed Processor. Any part of the Software included in such adaptations will continue to be subject to these Terms and Conditions and of the applicable Software license.

11.2.3 Access to Software

Purchaser may make the Software available to its employees and agents to the extent needed to exercise its license hereunder. Purchaser may also make the Software available to eligible related parties (as defined in a Shared Access Agreement) which have executed a Shared Access Agreement agreeing to be bound by all the terms of Purchaser's license, and to their employees and agents in accordance with the terms of the Shared Access Agreement. Purchaser shall not make the Software available in any form to any parties except those identified in this Subparagraph 11.2.

To the extent that the Software contains any confidential or trade secret information, the Software and the information it contains are licensed to Purchaser pursuant to a confidential relationship. Purchaser expressly acknowledges this confidential relationship and agrees to keep the Software and information in confidence as provided herein.

11.2.4 Personal, Nonexclusive Licenses

Purchaser's license is personal and non-exclusive, and may not be transferred without DIGITAL's express consent, except as provided in DIGITAL's Software License Transfer Policy stated in the Price List in effect at the time of transfer.

11.2.5 Record Keeping

Purchaser shall keep complete and accurate records a) uniquely identifying the Software and the Licensed Processors (through retention of the DIGITAL issued license certificate or otherwise) and b) indicating where the Software is located. Within thirty (30) days after receiving a request from DIGITAL, Purchaser shall provide copies of the applicable records to DIGITAL, and if DIGITAL reasonably believes that the Software has been made available to any third party or executed (except as permitted by these Terms and Conditions) on any other processor or equipment configuration during the term of the license, Purchaser shall provide an explanation.

Purchaser agrees to reproduce DIGITAL's copyright and all other legal notices, including but not limited to other proprietary notices and notices mandated by governmental entities, on all complete or partial copies, adaptations, or transmissions of the Software.

11.2.6 License Limitation, Reverse Engineering

DIGITAL transfers no title to or ownership of any Software to Purchaser or any third party. Except as explicitly set forth in these Terms and Conditions, Purchaser shall not execute, use, copy, or modify the Software or take any action inconsistent with DIGITAL's intellectual property rights in the Software. Purchaser shall not decompile or reverse assemble the Software, or analyze or otherwise examine it for reverse engineering the Software or for reverse engineering any hardware or firmware implementation of the Software.

11.3 Additional License Terms

If Purchaser orders certain Software licenses, additional or modified terms may apply as indicated or referenced as follows:

11.3.1 Software License Order Without Media

If Purchaser's order specifies a Software license for which no corresponding media order is required by DIGITAL, then on DIGITAL's acceptance of the order, DIGITAL will grant to Purchaser the additional right to load, copy, or transmit a version of the Software already licensed to Purchaser and in Purchaser's possession for execution only on the Licensed Processor specified in Purchaser's order.

11.3.2 Sources

Additional terms apply to all Software license orders for source code Software. Purchaser must execute an appropriate source license agreement to obtain a license for source code Software.

11.3.3 New Versions

Applicable license terms and fees, if any, for new versions of the Software are specified in the Price List.

11.3.4 PPL

Software orders specifying a PPL license require payment of initial fees and ongoing periodic fees. Purchaser may terminate a PPL license effective at the end of any payment period on ninety (90) days prior written notice to DIGITAL.

11.3.5 Terms in Price List or SPD

For certain licenses additional or modified terms may apply as indicated and/or referenced in the Price List, the applicable SPD or Service Description.

11.4 License Termination

DIGITAL may terminate any licenses granted and any Software orders placed hereunder if Purchaser neglects or fails to perform or observe any of its obligations to DIGITAL under these Terms and Conditions, and such condition is not remedied within ten (10) days after written notice has been given to Purchaser.

Termination, whether by DIGITAL or Purchaser, shall apply to all versions of the Software licensed for execution on the Licensed Processor.

Before any termination by Purchaser becomes effective, and in the event of any termination by DIGITAL, Purchaser shall i) return to DIGITAL any license certificate furnished by DIGITAL, ii) destroy all copies of all versions of the Software in Purchaser's possession, iii) remove all portions of all versions of the Software from any adaptations made by Purchaser and destroy such portions, and iv) certify in writing that all copies, including all those included in Purchaser's adaptations, have been destroyed in accordance with DIGITAL's standard Destruction of Software certification.

11.5 Distributed Software

Distributed Software is licensed in accordance with the terms and conditions of the third-party license agreement accompanying the Distributed Software. Purchaser shall not load, execute, modify, copy, disclose, transfer, or otherwise use the Distributed Software except as provided in the applicable third party license agreement.

12. Reservation of Property Rights

12.1 The purchase or license of DIGITAL Products does not convey any right to combine or connect DIGITAL Products, protocols, or system architectures with products other than Authorized Products where DIGITAL has one or more patents covering such combination or connection. Authorized Products are: 1) products covered by an express license between DIGITAL and Purchaser, 2) products distributed directly or indirectly by DIGITAL, or 3) products distributed directly or indirectly by any Licensee of DIGITAL whose license includes the right to resell or sublicense such products.

12.2 Except as expressly set forth in these Terms and Conditions, DIGITAL grants no right, title, or interest in its intellectual property rights to Purchaser.

13. Maintenance Material

Diagnostic Software, Documentation, equipment or other material used by DIGITAL in the performance of installation, warranty, or Services may be furnished with Products or stored at Purchaser's facility. DIGITAL grants no title or license to such material, and it remains the exclusive property of DIGITAL. Purchaser agrees to properly secure such material and not to use it in any manner or make it available to third parties without DIGITAL's prior consent.

14. Export

Purchaser hereby acknowledges that it will not export any DIGITAL Products, Distributed Software or technical data (e.g., any technical information relating to Products or Distributed Software, written or otherwise), or any product incorporating Products, Distributed Software, or DIGITAL technical data, without first obtaining required U.S. Government export licenses. Purchaser further acknowledges that it is knowledgeable about U.S. Government export licensing requirements or that it will become so prior to engaging, directly or indirectly, in any export transaction involving Products, Distributed Software, or DIGITAL technical data.

15. Remedies and Limitations

15.1 DIGITAL's entire liability and Purchaser's remedies are set forth in this Paragraph 15, except as provided in Subparagraph 10.1. These remedies are Purchaser's exclusive remedies and are in lieu of any other remedy at law or in equity.

15.2 In all situations involving performance or nonperformance of Equipment and Software furnished hereunder, Purchaser's remedy is 1) repair or replacement by DIGITAL (at DIGITAL's option) of defective Equipment if notified by Purchaser of the defect within the warranty period, or 2) remedy, by DIGITAL in the manner specified in the SPD, of a nonconformance of Software to the applicable SPD during the stated warranty period. If DIGITAL fails to perform its warranty or service responsibilities, or if Purchaser has any other claim related Products or Services purchased or licensed from DIGITAL, Purchaser shall be entitled to recover only direct damages and only up to the limits set forth in Subparagraph 15.3.

15.3 DIGITAL'S LIABILITY TO PURCHASER FOR ANY CAUSE WHATSOEVER SHALL BE LIMITED TO THE GREATER OF ONE MILLION DOLLARS (\$1,000,000.00) OR THE PURCHASE PRICE PAID TO DIGITAL FOR THE PRODUCTS AND SERVICES THAT ARE THE SUBJECT OF PURCHASER'S CLAIM. THIS LIMITATION WILL APPLY REGARDLESS OF THE FORM OF ACTION, WHETHER CONTRACT OR TORT, INCLUDING WITHOUT LIMITATION NEGLIGENCE. THE FOREGOING LIMITATION DOES NOT APPLY TO DAMAGES RESULTING FROM PERSONAL INJURY CAUSED BY DIGITAL'S NEGLIGENCE.

15.4 IN NO EVENT WILL DIGITAL BE LIABLE FOR ANY DAMAGES RESULTING FROM LOSS OF DATA OR USE, LOST PROFITS OR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES.

15.5 Any action against DIGITAL must be brought within eighteen (18) months after the cause of action arises.

16. General Provisions

DIGITAL Products are manufactured for standard commercial uses and are not intended to be sold or licensed for use in critical safety systems in nuclear facilities. DIGITAL may require additional contractual safeguards for other nuclear, mass transportation, and aviation applications.

DIGITAL is not responsible for delay or failure to perform its obligations due to causes beyond its reasonable control. Installation, warranty, and Services to be performed at Purchaser's facility may not be performed if DIGITAL reasonably believes conditions at the Purchaser's facility represent a safety or health hazard to any DIGITAL employee.

Neither party may assign or transfer any of the rights, duties and obligations listed above without the written consent of the other party.

Service Descriptions, SPD's, and the provisions in the Price List applicable to Products, Services or Distributed Software that are the subject of Purchaser's order shall be considered part of these Terms and Conditions and are provided to Purchaser, or if not provided, are available to Purchaser on request. DIGITAL's acceptance of Purchaser's order will form an agreement subject only to these Terms and Conditions. These Terms and Conditions will supersede any previous communications, representations, or agreements by either party whether verbal or written including any terms and conditions on Purchaser's order. Any modification to these Terms and Conditions must be in writing and signed by authorized representatives of DIGITAL and Purchaser. This agreement is governed by and construed under the laws of Massachusetts.

4/1/87

Diagnostic Software License Policy

It is DIGITAL's policy to control the use of and access to proprietary diagnostic software. Provisions, allowing DIGITAL's customers the right to use certain diagnostics, are explained in this policy.

1. Definition of Diagnostics

Diagnostics are computer programs that recognize, identify and locate faults in equipment and indicate a need for repairs.

2. Digital's Property Rights Notices

The following notice is included in DIGITAL's Standard Terms and Conditions of sale and service.

"Diagnostic Software, Documentation, equipment or other material used by DIGITAL in the performance of installation, warranty, or Services may be furnished with Products or stored at Purchaser's facility. DIGITAL grants no title or license to such material, and it remains the exclusive property of DIGITAL. Purchaser agrees to properly secure such material and not to use it in any manner or make it available to third parties without DIGITAL's prior consent."

3. Source Code

Source Code for DIGITAL's proprietary diagnostic software, whether in human or machine-readable form, is not sold, licensed or otherwise distributed without prior approval of the Corporate Vice President—Field Service.

4. Object Code (Binary)

Object code, in binary form, for DIGITAL's proprietary diagnostic software is available for sale or license, as applicable, under DIGITAL's Standard Terms and Conditions of sale and service. Certain limitations apply to DIGITAL's licensed trade secret diagnostic software (see following section).

5. Licensed (Trade Secret) Diagnostics (e.g., VAX-11 Family, VAXBI Family, DECsystem-10/20, MicroVAX)

Licensed diagnostics are trade secrets of Digital Equipment Corporation and are made available solely for Licensee's use in maintaining the specified computer system. They always remain the exclusive property of DIGITAL. They are made available only to owners, lessees and end-users of corresponding DIGITAL computer systems and only under a license to use the diagnostics on the single identified computer system.

Licensed diagnostics which are left on customer's site for use by DIGITAL Field Service Personnel may not be used or copied by the customer unless the customer has been appropriately licensed by DIGITAL.

Upon completion or termination of DIGITAL's on-site service obligations (e.g., Installation, Warranty, or Service Agreement), the diagnostic software will be physically removed from the customer's site by DIGITAL personnel. Diagnostics for which the customer has purchased a license will not be removed.

In order to control the distribution and maintain the security of its trade secret diagnostic software, it is DIGITAL's policy only to license such diagnostic software to owners, lessees or end-users who have physical control of the system on which the diagnostics are installed and who respect the proprietary and confidential nature of the diagnostics and do not misuse them. DIGITAL does not license its trade secret diagnostic software to brokers for resale or to independent maintenance suppliers for use on their customer's systems. However, DIGITAL's licensee may permit its employees and agents to use the diagnostic software on the licensee's behalf on the designated computer system.

5A. CPU Model Licensing—VAX-11 Models (700 Series), VAX 8600, VAX 8650, 8650, MicroVAX, DECsystem 10/20.

VAX diagnostic software is not interchangeable among the various VAX-11 CPU models because of significant differences in each of the CPU's hardware and dedicated diagnostics (VAX-11/780 diagnostic software will not function on a VAX-11/750 or VAX-11/730 CPU). Consequently, VAX-11 diagnostic licenses are not interchangeable among the various VAX-11 CPU models.

An end-user intending to maintain various VAX-11 CPU models, using VAX-11 diagnostic software, must purchase the appropriate "C" license for each initial CPU model. "DZ" licenses must be purchased for each additional VAX-11 CPU of the same model.

DIGITAL's diagnostic software licenses are issued to the customer division, subsidiary, or organization specified on the license invoice, license certificate or other license document. Each subsidiary or division would be eligible to purchase "License Only" (DZ) licenses to copy software provided under a Primary license (C) previously purchased by the subsidiary or division.

When the customer is a Federal, State or Local government, the license is issued to the government user activity (e.g., Base, Facility, University, Department) specified on the license invoice, license certificate or other license document. In all instances, each license permits installation and use of the diagnostic software only on a single CPU as identified by its individual CPU serial number.

5B. CPU (Model Licensing)—VAXBI Models (8000 Series), VAX 8200/8300, 8500/8800 and MicroVAX 3000 Series.

An end-user intending to maintain various VAXBI CPU models, using VAXBI diagnostic software, must purchase a "UZ" license for each CPU. In addition, a customer must purchase the appropriate "HW" media/documentation kit for the initial CPU.

5C. Dual Processor Licensing

Dual processors are functionally a single CPU which require a single license. The appropriate diagnostic license is determined by the basic model diagnostic support required. A VAX-11/782 System is comprised of two VAX-11/780 CPU's and therefore requires a single VAX-11/780 Diagnostic License. Two CPU's operating in parallel (one being a "hot backup") require two licenses.

5D. Cluster Licensing

Since many of the diagnostic programs for each CPU model are functionally different and operate under unique diagnostic supervisors, each CPU within a "CLUSTER" must be individually licensed—there are no provisions for "CLUSTER LICENSING" of multiple model types within a cluster.

5E. Sublicensing and License Transfer

A sublicense contains the same rights and responsibilities as a direct license from DIGITAL. In accordance with the terms of its DIGITAL OEM Agreement, an OEM who purchases computer systems and appropriate diagnostic licenses may sublicense the diagnostic software to its end-user. The OEM cannot sublicense the diagnostic software to a customer to which the OEM has not sold a corresponding hardware system. The OEM must always obtain a signed sublicense agreement from its customer for the sublicense to be valid.

A license transfer is a mechanism DIGITAL has created to permit a licensee to transfer diagnostic software to another user as part of a system sale or transfer. DIGITAL must approve the transaction before the diagnostic software is transferred. The new customer/licensee must sign a DIGITAL license agreement and be registered by DIGITAL for the diagnostic software to be transferred.

5F. Licensed Diagnostics Subscription Update Service

New products are released regularly and existing diagnostics may be enhanced at any time. In order to ensure license holders a means of keeping their diagnostic software current with their systems hardware/software, DIGITAL provides an annual Diagnostic Subscription Update Service for purchase. The service provides selected media updates as new "releases" become available. There is a separate service for each corresponding CPU model license.

6. Copyrighted Diagnostics (e.g., PDP-8 AND PDP-11)

Diagnostic software for certain hardware systems (e.g., PDP-8 and PDP-11) is protected by copyright and does not require the purchase of a single-use, end-user license. The U.S. copyright laws prohibit the customer from making copies of copyrighted software programs except for archival purposes.

It is DIGITAL's intention in making these diagnostics available to its customers that they may be used on a single system at a time and not be reproduced. Accordingly, customers may not make copies for use on multiple systems or for further distribution without express reproduction authorization from DIGITAL (see Reproduction Agreement). This diagnostic software may be provided by DIGITAL directly to customers with their systems or may be purchased separately under DIGITAL's Standard Terms and Conditions of sale and service.

6A. Reproduction of Copyrighted Documentation and Copyrighted Diagnostics

Where an End-User or OEM has a legitimate need to reproduce Copyrighted DIGITAL hardware/software documentation or Copyrighted diagnostic software, a Reproduction Agreement is available for purchase from DIGITAL.

7. Personal Computer

Diagnostic software for personal computers (e.g., Professional 300 Series) is included in the Country Kit for the personal computer. This software is distributed directly to customers with the personal computer system under the Terms of DIGITAL's personal computer Software Product License. This personal computer single-use end-user license permits the customer to transfer the software (including the diagnostics) with the personal computer to another party provided the customer properly notifies DIGITAL.

The customer accepts the license terms when the seal on the box of software is broken (this is DIGITAL's standard practice for personal computer software).

8. Ordering and Other Information

To order refer to the Diagnostics Section of this catalog.

NOTE: For a complete description of each diagnostic product and information on how to order, refer to the specific Software Product Description (SPD).

All VAX micro and macro diagnostics are provided in single kit from for each CPU model.

9. Warranty

Diagnostic software is provided "AS IS" without any warranty of any kind, either expressed or implied. DIGITAL does not warrant that the execution of diagnostic software shall be uninterrupted or error-free.

Self Maintenance Services Warranty and Installation Availability

1. SPARES are warranted against defects in workmanship and material for a period of ninety (90) days from the date of delivery. SPARES are customer installable. For return instructions contact your Customer Services administrator at the location where you placed your order.
2. DECMAILER and FACTORY REPAIR repairs are warranted against defects in workmanship and material for a period of ninety (90) days after date of shipment by DIGITAL.
3. DIAGNOSTIC software is provided "as is" without any warranty of any kind, either expressed or implied. DIAGNOSTIC software is customer installable.
4. DOCUMENTATION is provided "as is" without any warranty of form or content.
5. ENVIRONMENTAL PRODUCTS are warranted against defects in workmanship and material for a period of one (1) year from the date installation is completed, or upon delivery if the equipment is not installed by DIGITAL. The level of warranty service is equivalent to DECservice. ENVIRONMENTAL PRODUCTS will be installed by DIGITAL at no charge when installed at time of initial installation of DIGITAL-installed systems. Add-on installation charges will be specified in the U.S. or Country Price List.
6. Products are sold solely for the remedial maintenance of DIGITAL hardware systems and options. DIGITAL reserves the right to refuse or cancel orders intended for any other purpose.

Policy for Reproduction of Digital Copyrighted Publications

Where an end-user or OEM has a legitimate need to reproduce copyrighted DIGITAL hardware documentation, or copyrighted diagnostics which do not require a software license, a reproduction agreement is available for purchase from DIGITAL. These reasons include:

- translation to a foreign language;
- incorporation or adaptation into a unique customer format;
- only limited portions of the publication are to be reproduced;
- urgent need DIGITAL cannot fulfill.

Reproduction Agreements are available to end-users and OEMs for the sole purpose of supporting products owned or distributed by the end-user or OEM.

The rights granted will not include the right to copy restricted documentation, licensed software, or micro form products.

The requester will determine the quantity needed of the particular publication(s) (minimum quantity 20). DIGITAL, in turn, grants a license to copy the publication(s). The requestor may, within a one year period, reproduce the documentation, in whole or in part, up to the specified quantity. The terms and conditions of this agreement can be found in the back of this price book.

The royalty fee paid to DIGITAL is twenty-five percent of the list price of the publication multiplied by the quantity to be reproduced.

EXAMPLE:

$$\begin{aligned} & \$10.00 \text{ (Manual List Price)} \times 100 \text{ (Qty)} \\ & \quad = \$1000.00 \text{ (Total List Price)} \end{aligned}$$

$$\begin{aligned} & \$1000.00 \text{ (Total List Price)} \times 25\% \\ & \quad = \$250.00 \text{ (Net Price)} \end{aligned}$$

NOTE: You must purchase the initial copy of any manual/tape that you are planning to reproduce.

No other discounts or pricing adjustments apply.

Submit request in writing to:

Reproduction Policy for Digital's Copyrighted Publications

Policy

Customers who require an alternative method of providing hardware manuals, diagnostic documentation and copy-righted diagnostics are eligible to purchase authorization to locally reproduce the items. The rights granted will not include the right to copy restricted documentation, software media, micro form products.

Terms and Conditions

Digital Equipment Corporation (Digital) and Purchaser agree that the terms and conditions of the Agreement shall be effective only upon execution by both parties; shall govern the reproduction of copyrighted material (Documentation); and shall only apply to a single purchase order as described in Paragraph 5, Ordering Procedures, below. Reproduction of Documentation may only be made during the one (1) year term commencing on the Effective Date hereof.

1. Purchaser

Purchaser for the purposes of the Agreement is a single business entity (excluding subsidiaries, corporate parent and affiliated subsidiaries) at a single buying location.

2. Documentation

The right to copy is limited to hardcopy manuals, software manuals and engineering drawings (with the purchase of aperture cards, contact positives, 11"x 17" negatives or mylar washoffs), and PDP-11 Diagnostics. The rights granted do not include the right to copy restricted Documentation (i.e., "Company Confidential," "Digital Use Only," etc.) software media or micro form. Purchaser, as an OEM of Digital, may transfer copies of the Documentation in the ordinary course of

such business, to its customers. Otherwise, such right to copy is limited to use by and distribution to employees of the Purchaser and no rights are granted to reproduce Documentation for sale to any other party.

3. Prices

Prices shall be based upon the list price as specified in the applicable Price List prevailing at the time Digital accepts an order or on an authorized quotation in force at the time Digital accepts the applicable order. Prices for the right to copy Documentation shall be equal to twenty five percent (25%) of such list prices. Prices for the Documentation to be copied shall be equal to such list prices. Prices for PDP-11 Diagnostics shall be fixed price (non-based on media and number of copies requested).

4. Ordering Procedures

The Purchaser shall attach to the executed Agreement a purchase order specifying the Documentation to be copied by part number and title; the maximum quantity to be copied, the list price of each Documentation and the net price to be paid. Such purchase order shall also specify any Documentation to be purchased by part number, title, list price and net price. The minimum number of copies per Documentation shall not be less than twenty (20). No credit shall be made for unused Documentation or rights to copy.

5. Payment

Net 30 (thirty) days from date of invoice from Digital. Payment shall be based upon the Documentation and number of copies ordered.

6. Delivery

Any deliveries requested shall be FOB origin. Digital reserves the right to make partial deliveries.

7. Taxes

Prices are exclusive of, and purchaser is responsible for, all sales, use and like taxes.

8. Copyright Legends

On the first page of each reproduced copy of the Documentation, the purchaser shall include a Digital copyright notice as follows: "Copyright © (year) Digital Equipment Corporation Reproduced under Agreement Number (the number of this Agreement) granted by Digital Equipment Corporation."

NOTE: The year in the above notice is the year appearing in the copyright reservation notice in the Documentation to be copied.

9. Assignment

Either party may terminate the Agreement or any orders by notice sent registered mail if the other party (a) assigns this Agreement or any of its rights or (b) neglects or fails to substantially perform or observe any of its obligations, unless the cause for termination is remedied within thirty (30) days. Notwithstanding the above, any obligations which attached prior to such termination shall survive any such termination.

10. Audits

The Purchaser shall keep accurate records of the number of copies made for each publication under the Agreement and upon request by Digital shall furnish a copy of the records certified by an authorized representative of the Purchaser.

11. Warranty

Each delivered copy of Documentation ordered shall be suitable for reproduction on conventional reproduction equipment. EXCEPT FOR THE EXPRESS WARRANTIES STATED HEREIN, DIGITAL DISCLAIMS ALL WARRANTIES ON COPYRIGHTED MATERIAL FURNISHED, INCLUDING, WITHOUT LIMITATION, ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS; and the stated express warranties are in lieu of all obligations or liabilities on the part of digital arising out of or in connection with the use of performance of the Documentation or any copies thereof.

12. Patent/Copyrighted Infringement

Digital will defend, at its own expense, any claim brought against Purchaser alleging the Documentation manufac-

tured by Digital and furnished infringe a United States patent or copyright, and will pay all costs and damages finally awarded, provided that Digital is given prompt written notice of the claim and is given information, reasonable assistance, and sole authority to defend or settle the claim. Digital will obtain for Purchaser the right to continue using the Documentation so that they become noninfringing or, if these remedies are not reasonably available, grant Purchaser a credit for the Documentation and accept their return. Digital will have no other liability for patent and copyright infringement.

13. Limitation of Liability

PURCHASER'S RIGHT TO RECOVER DAMAGES TO PROPERTY CAUSED BY DIGITAL'S FAULT OR NEGLIGENCE WILL BE LIMITED TO ONE (1) MILLION DOLLARS. DIGITAL WILL NOT BE LIABLE IN ANY EVENT FOR ANY DAMAGES RESULTING FROM LOSS OF

DATA, PROFITS, USE OF PRODUCTS OR FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE. This limitation of Digital's liability will apply regardless of the form of action, whether in contract, patent/copyrighted infringement or tort including negligence. Any action against Digital must be brought within eighteen (18) months after the cause of action accrues.

The agreement constitutes the entire Agreement between the parties with respect to the subject matter and supersedes all prior proposals, negotiations and communications, oral or written, between the parties with respect to the subject matter, and no deviation from these terms and conditions shall be binding unless in writing and signed by the party against whom the same is sought to be enforced.

DECmailer Service Provisions

1. Availability

DECmailer Service is available throughout the United States for the provision of replacement/repaired DIGITAL modules, sub-assemblies, or spare parts (hereinafter "Parts") to OWNER END USERS and DIGITAL AUTHORIZED RESELLERS of DIGITAL equipment.

2. Term

DECmailer Service shall be effective when the application is signed by both parties and a signed copy with a DECmailer number is returned to the Customer. Except as provided in Section 3.3 below. Service may be terminated by either party upon thirty (30) days prior written notice.

3. Eligible Parts

3.1 Parts listed in the then current DECmailer price list are eligible for return under DECmailer Service.

3.2 Parts in need of repair due to improper treatment or use are not eligible for return. Improper treatment includes, but is not limited to, lifted, burnt etches, or delamination due to Non-DIGITAL repair or modification; delamination due to excessive heat; or missing parts. Parts which have been defaced by removing serial numbers, etch levels, or key components are not eligible for return.

3.3 If parts are returned which are subsequently deemed ineligible or unrepairable by DIGITAL's repair source, DIGITAL may immediately terminate

Customer's DECmailer Agreement. Additionally, DIGITAL may demand return of any replacement Part(s) or bill Customer for full Maynard List Price (MLP) value of the replacement Part(s), and will return the ineligible part(s) to Customer upon receipt of payment or the replacement Part(s).

3.4 Proof of Purchase or ownership of equipment, including serial numbers may be required.

4. Responsibilities of Digital

4.1 DIGITAL will use best efforts to at its option, repair or replace eligible Parts within five (5) working days of their receipt and acceptance at DIGITAL's receiving dock. Shipment to Customer will be F.O.B. DIGITAL shipping point.

4.2 Repaired and/or replacement Parts will be at the current revision level as specified in the then current price list. Parts may be refurbished. In the event newly installed Field Engineering Change Orders (FCOs) cause an incompatibility or other interference within the customer's system, Customer accepts responsibility for such incompatibility or interference.

4.3 DIGITAL assumes all risk of loss or damage to parts in transit to Customer. Return of Parts to Customer shall be made by a second-day delivery carrier chosen by DIGITAL.

5. Responsibilities of Customer

5.1 Customer shall properly package and prepay transportation costs of Parts sent to DIGITAL. All packages must reference Customer's DECmailer account number. Packages without the appropriate DECmailer account number may be subject to delay in receipt and acceptance.

5.2 Customer assumes all risk of loss or damage to Parts in transit to DIGITAL.

5.3 Customer shall issue DIGITAL a funding authorization (Purchase Order) for a period of at least one (1) year.

6. Charges

6.1 Charges for DECmailer Service shall be as indicated in the then current DECmailer price list.

6.2 Customer has the option of (A) an open account with monthly invoicing or (B) invoicing per line item. DECmailer Service is subject to Customer's maintaining funding authorization satisfactory to DIGITAL. Otherwise, terms are cash in advance.

6.3 Payment is due thirty (30) days from the date of invoice. DIGITAL reserves the right to withhold shipment and service of any orders if Customer is in default of its payment obligations.

6.4 Charges are exclusive of and Customer is responsible for all sales, use and like taxes.

7. Warranty

7.1 All repairs are warranted against defects in workmanship and material for a period of ninety (90) days after date of shipment by DIGITAL.

7.2 THE ABOVE WARRANTIES ARE THE EXCLUSIVE WARRANTIES AND NO OTHER WARRANTY, EXPRESS OR IMPLIED, SHALL APPLY. DIGITAL SPECIFICALLY DISCLAIMS THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

8. Remedies and Limitations

8.1 DIGITAL's entire liability and Customer's remedies are set forth in this Section 8. These remedies are Customer's exclusive remedies and are in lieu of any other remedy at law or in equity.

8.2 In all situations involving performance or nonperformance of Parts furnished hereunder, Customer's remedy is repair or replacement by DIGITAL (at DIGITAL's option) of defective Parts if notified by Customer of the defect within the warranty period. (Should a repair be eligible for warranty service, please call the Customer Returns Center for a Warranty Return authorization number [RA #]). If DIGITAL determines that a Part is not defective within the terms of the warranty, Customer shall pay DIGITAL all costs of handling and transportation. If DIGITAL fails to perform its warranty of service responsibilities or if Customer has any other claim related to Parts or Services purchased from DIGITAL, Customer shall be entitled to recover only direct damages and only up to the limits set forth in Section 8.3.

8.3 DIGITAL'S LIABILITY TO CUSTOMER FOR ANY CAUSE WHATSOEVER SHALL BE LIMITED TO THE GREATER OF ONE MILLION DOLLARS (\$1,000,000.00) OR THE PURCHASE PRICE PAID TO DIGITAL FOR THE PARTS OR SERVICES THAT ARE THE SUBJECT OF CUSTOMER'S CLAIM. THIS LIMITATION WILL APPLY REGARDLESS OF THE FORM OF ACTION, WHETHER CONTRACT OR TORT INCLUDING, WITHOUT LIMITATION, NEGLIGENCE. THE FOREGOING LIMITATION DOES NOT APPLY TO DAMAGES RESULTING FROM PERSONAL INJURY CAUSED BY DIGITAL'S NEGLIGENCE.

8.4 IN NO EVENT WILL DIGITAL BE LIABLE FOR ANY DAMAGES RESULTING FROM LOSS OF DATA OR USE, LOST PROFITS OR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES.

8.5 Any action against DIGITAL must be brought within eighteen (18) months after the cause of action arises.

9. Certificate of Compliance

DIGITAL certifies that workmanship standards or materials used in the repair/replacement of Parts processed under this Agreement substantially comply with DIGITAL published specifications.

10. General

10.1 The provisions of this DECmailer Service Agreement supersede all previous DECmailer Service Agreement provisions.

10.2 The provisions of this Agreement are declared to be severable.

10.3 The provisions of this Agreement shall solely apply. Additional provisions will only be applicable if DIGITAL agrees in writing. Neither party may assign this Agreement unless mutually agreed.

10.4 This Agreement is governed by the laws of the Commonwealth of Massachusetts or the state of billing address.

10.5 Regardless of any disclosure made by Customer to DIGITAL of an ultimate destination of the repaired/replaced Part, Customer will not export, either directly or indirectly, any repaired/replaced Part of equipment incorporating any repaired/replaced Part without first obtaining a license from the United States Government, as required.

**To All Recipients of the Self-Maintenance Services Price Book:
Please Read This Important Announcement**

The U.S. price list is published periodically as a reference guide for use by Digital Equipment Corporation personnel and Digital's customers. Prices are accurate as of the date printed on the cover.

The information in this document is subject to change without advance notice and should not be construed as a commitment by Digital Equipment Corporation.
