

Get Your Hands  
On Some Extra Time  
With Concurrent CP/M

Concurrent CP/M helps you maximize the technology of your PC so that you can switch instantaneously between four programs running simultaneously. It also helps you take advantage of your IBM PC XT's hard disk. You'll be handling your entire workload in a fraction of the time it now takes.

You might be preparing a document under Concurrent CP/M and need word processing software, a spelling checker, a spreadsheet and a database manager. Concurrent CP/M can put all of these functions at your fingertips at the same time. You don't have to file away data, change disks and reboot the system. You can even be printing one document while working on another. Switch from one program to another with a single keystroke.

Applications running together under Concurrent CP/M can also exchange important information automatically, saving you additional time. For example, as you update files with one program, the same information can also be updated where it appears in other programs.

All of the software in the CP/M Applications Library can be used with this remarkable, time-saving operating system. For a limited time, you can get Concurrent CP/M free when you buy any two applications from the library. Read about our special Time Saver Offer for all the details.

The Time Saver Offer:  
Get Concurrent CP/M Free!

Here's an opportunity to receive the time-saving Concurrent CP/M operating system free! All you have to do is buy any two programs from the CP/M Applications Library.

Here's how the time saver offer works.

First... Purchase any two programs simultaneously from the CP/M Applications Library.

Second... Fill out a Time Saver Offer coupon.

You'll find one inside every CP/M Applications Library package.

Third... Send the completed coupon and cash register receipt verifying purchase of both applications to:

Time Saver Offer  
Digital Research, Inc.  
125 Main Street  
P.O. Box 306  
Half Moon Bay, CA 94019

You'll receive your copy of Concurrent CP/M within four to six weeks.

To qualify for this special offer, both applications must be purchased at one time on or before January 1, 1984. Purchase date must be indicated on the sales receipt. Completed Time Saver Offer requests must be postmarked no later than February 1, 1984.

Don't miss this opportunity to get Concurrent CP/M free! It's a great way to start saving time!

## Business Software From The CP/M Applications Library™ Helps You Save Time

The CP/M Applications Library™ provides IBM PC owners with one convenient source for the answers to your business software needs.

You'll find programs for:

- Professional word processing
- Powerful financial forecasting
- Organized accounting
- Flexible database management
- Exciting business graphics
- Effortless communications

You'll recognize popular titles like WordStar® MicroPlan®, SuperCalc<sup>2</sup>™ plus many of the more than 5000 programs that have been written to operate under the industry standard CP/M Operating System.

**SpeedStart™ makes our software easier to use.**

All of the software in the CP/M Applications Library has the new SpeedStart™ version of the CP/M Operating System embedded right on the program disk. All you have to do to use these applications is slip the disk into your IBM PC, turn on the system, and you are ready to go. This eliminates the need to load a separate operating system, change disks, and boot the applications program. SpeedStart software from the CP/M Applications Library also:

- Provides you with a free run-time version of CP/M
- Eliminates the need to 'install' each new applications program
- Gives you compatibility with Digital Research's powerful 16-bit operating system, CP/M-86™ and the state-of-the-art, multi-tasking Concurrent CP/M Operating System.

**Make the most of your IBM PC with Concurrent CP/M.** Concurrent CP/M is the incredible operating system that you can use with CP/M Applications Library software to handle your entire workload in a fraction of the time it now takes.

Concurrent CP/M actually runs as many as four programs at the same time. You choose which application you want to display on the screen, switching from one to another with the ease of a single keystroke.

While your programs are running together under Concurrent CP/M, they can actually exchange data from one application to another.

You will be amazed at the amount of work you can accomplish using Concurrent CP/M, the operating system designed to let you take full advantage of the 16-bit technology of your IBM PC.

**Get Concurrent CP/M free!**

During our special Time Saver Offer, you can get a free Concurrent CP/M operating system, a \$350 value, when you purchase two programs from the CP/M Applications Library. You'll find more details on the exciting Time Saver Offer in this brochure.

## Time Saving CP/M Applications

The CP/M Applications Library is a convenient, one-stop source for your business software needs. Look for these popular titles among the time-saving programs initially offered in the library.

**WordStar®** — The high popularity of WordStar is a result of the powerful and convenient functions it provides for professionals who regularly use word processing.

**MicroPlan®** — The incredible number of functions in MicroPlan gives the serious financial analyst all the tools necessary for model building. It can be integrated with GraphPlan™ to add visual impact to your financial forecasting.

**BPI Accounting** — You'll receive a full range of accounting software, including General Ledger, Accounts Payable, Accounts Receivable and Payroll. This software will be available soon.

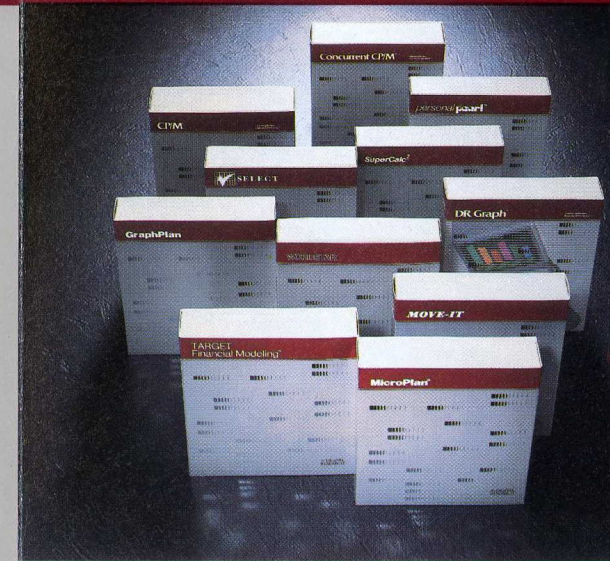

**SELECT™** — You'll have a complete, full-function word processor at your fingertips within 90 minutes. SELECT's On-Screen Tutorial eliminates the need to spend hours paging through confusing documentation before using a program.

**Personal PEARL™** — Exceptional ease-of-use makes this powerful and complete database manager an ideal tool to help you quickly organize and manage large amounts of information.

**DR Graph™** — Add impact to your business presentations by adding charts, graphs, labels, titles, legends, colors and different type styles to any document or report.

**GraphPlan™** — 'What-if' graphics provide a dramatic demonstration of changing financial assumptions using bar charts, pie charts, line graphs, words, numbers and more. GraphPlan lets you combine the power of a spreadsheet with sophisticated business graphics.

**TARGET Financial Modeling™** — Here's an easy-to-use, full function financial modeling tool to help you make accounting, marketing, finance,

and banking decisions. You can even exchange information with compatible mainframe modeling systems.

**SuperCalc<sup>2</sup>™** — This very popular spreadsheet can be helping those of you in small businesses, professional offices, and in large corporations handle complicated financial analysis within 10 minutes from the time you first take SuperCalc<sup>2</sup> out of the box.

**MOVE-IT™** — You can quickly and easily transfer programs, important documents, sales records and other data to any other micro, mini, or mainframe computer at any location that can be reached by phone.

Watch for new additions to the CP/M Applications Library. It is growing quickly with more industry-leading software to meet your needs. Soon-to-be-released programs include specialized applications to meet the specific demands of your business.
