

The Authors

Morton M. Astrahan

B.S.E.E., Northwestern University, 1945; M.S.E.E., California Institute of Technology, 1946; Ph.D., Northwestern University, 1949. Joined IBM in 1949 and was in charge of Systems planning and Input-Output Development in Military Products Division at Poughkeepsie; worked on prototype test for AN/FSQ-7; is now Manager of Advanced Engineering in the IBM Research Laboratory, San Jose, California. Is member of Tau Beta Pi, Sigma Xi and Eta Kappa Nu. He is a member of AIEE and IRE and is Secretary-Treasurer of the Joint Computer Committee; was first chairman of IRE Professional Group on Electronic Computers.

Donald P. Cameron

A.B. Physics, Oberlin College, 1947 and M.S.E.E., Northwestern University, 1949. He has been engaged in electron tube development and in ferroelectric studies and is now doing analytical work with emission spectrograph and electron microscope at the Research Center, Poughkeepsie. He holds membership in Electron Microscope Society of America, New York Society of Electron Microscopists, and Society for Applied Spectroscopy.

Frank W. Chambers

Attended Georgia Institute of Technology. Employed by IBM since 1954 at the Research Center, Poughkeepsie and is engaged in research work using x-ray diffraction techniques.

Henderson Cole

B.S., MIT, 1950, and Ph.D. in Physics, 1952. Fulbright scholar, College de France, Paris, 1952. Instructor in Physics, MIT, 1953-55. His field of work at the Research Center, Poughkeepsie, is x-ray diffraction, thermal motion of atoms and interatomic forces in crystals. Is member of Physical Society and of American Crystallographic Association.

Wesley E. Dickinson

B.S.E.E., North Dakota State College, 1940; M.S., Massachusetts Institute of Technology, 1945. Joined IBM in 1952 and is presently engaged in future random-access memory studies at the Development Engineering Department, San Jose. He is an associate member of the AIEE and a member of Sigma Xi.

Helen M. Dunn

A.B., Emmanuel College; also studied at Boston University. Joined IBM in 1953 and is currently doing x-ray research with the Physical Research Department in the Poughkeepsie Research Center; is a member of American Crystallographic Association.

Clyde J. Fitch

Joined IBM in 1933 and has worked on numerous development projects, including the Radiotype used for global communication and the wireless translator used at U.N.

Now Senior Development Engineer and head of the electrostatic components development, Endicott Product Development Laboratory. He is a member of the AIEE, is Vice-Chairman of the Ithaca Section of the AIEE, and President of the Technical and Engineering Council of the Southern New York area.

Evon C. Greanias

B.S. Engineering Physics, University of Illinois, 1944, and M.S. Physics, Illinois Institute of Technology, 1951. Has been associated with IBM since 1952 and has worked on character sensing research project. Is now Development Engineer and has worked on simulation techniques, proportional parts recognition system, and automatic clipping level control circuits in the Development Engineering Department, Endicott Product Development Laboratory. Is a member of Tau Beta Pi, Pi Mu Epsilon, Sigma Tau and American Physical Society.

G. Robert Gunther-Mohr

B.S. in Chemistry, Yale University, 1943; M.A. in Physics, Columbia University, 1949; Ph.D. in Physics, Columbia University, 1954. Teaching Fellow MIT, 1943. Assistant in Physics 1947-50 and lecturer in Physics 1950, Columbia University; A.E.C. predoctoral fellow, 1951-52. Member of technical staff of Watson Research Laboratory since 1953; present field of work is semiconductor physics.

John W. Haanstra

B.S.E.E., 1949 and M.S.E.E., 1950, both from University of California at Berkeley. Was employed at IBM Engineering Laboratory in Poughkeepsie in 1950 and from 1951-52 served at U.S. Naval Air Missile Test Center, Point Mugu, California. Joined IBM Research Laboratory at San Jose in 1952 and has worked on planning, design and development of business data processing systems. He is now Senior Engineer. Is member of IRE, Sigma Xi, Eta Kappa Nu, and Tau Beta Pi.

Charles J. Hoppel

B.S. in Physics, University of Scranton, 1949; also, graduate study in physics, University of Pittsburgh. Joined IBM in 1953 and has worked in Applied Physics Laboratory and Scientific Computation Laboratory; is now Technical Assistant at the IBM Research Laboratory, San Jose, California.

John W. Horton

B.S. in Physics, Brown University, 1947; M.A. in Physics, Princeton University, 1949; Ph.D. in Physics, Princeton University, 1953. Assistant in instruction, Princeton University, 1948-53. Member of Technical Staff of Watson Research Laboratory since 1953. Research fields: nuclear physics, nuclear magnetic resonance, semiconductor electron devices.

Bennett Housman

B.S.E.E., University of Michigan, 1949; B.S. in Eng. Math., 1949; M.S.E.E., Rensselaer Polytechnic Institute, 1951. Joined IBM in 1951 and most recent work has been on Systems Planning for SAGE at the Poughkeepsie Laboratories of the Kingston Military Products Division. Was recently transferred to Advanced Development work. He is a member of Sigma Xi and associate member of IRE.

William B. Ittner III

A.B. Physics, 1947, M.A. Physics, 1948 and Ph.D. Physics, 1953 at Washington University, St. Louis. Joined IBM at Endicott in 1953 where he did electrical contact research; is now engaged in work in low temperature physics at the Research Center in Poughkeepsie. He is a member of the American Physical Society, American Institute of Physics, Phi Beta Kappa, Sigma Xi, and Pi Mu Epsilon.

John F. Jacobs

B.S.E.E., University of Detroit and Illinois Institute of Technology, 1950; S.M.E.E., Massachusetts Institute of Technology, 1952. Most recently has been in charge of Computer Programming for SAGE and Assistant Head, Division VI of the Lincoln Laboratory at MIT. He is a member of Eta Kappa Nu, Tau Beta Pi and is a Sigma Xi associate.

Martin Kloomok

B.S., University of Wisconsin, 1949; M.S., Harvard University, 1950. Joined IBM in 1951. Now Manager of Engineering Computation, World Headquarters, with location at Poughkeepsie Research Center. Manager of Scientific Computation Laboratory at Endicott Product Development Laboratory, 1954-1956. He is a member of the Association of Computing Machinery, Institute of Management Sciences and of the ASME.

Murray L. Lesser

B.S., California Institute of Technology, 1942. Joined IBM in 1954. Now Staff Advisor to the Manager of the IBM San Jose Research Laboratory. Systems analyst on RAMAC (Random Access Memory Accounting Machine), 1954-1956. He is a member of the ACM and the ASME.

Peter J. Magill

B.S. in Physics, St. Bonaventure University, 1951; M.S. in Physics, Pennsylvania State University, 1954. Joined IBM in August 1955 and is presently engaged in electromagnet development at the Endicott Product Development Laboratory.

Rollin P. Mayer

B.S.E.E., Northeastern University, 1948; joined Massachusetts Institute of Technology in 1948. His most recent area of work at the Lincoln Laboratory is the development of descriptive drawings for large-scale programs for digital computers. Holds membership in the following groups of Subcommittee 8.4 of the IRE: "Digital Com-

puter Definitions" and "Digital Computer Block Diagram and Logical Symbols."

Trigg Noyes

B.S.M.E., Massachusetts Institute of Technology, 1946. In 1953 he joined IBM at San Jose and has been on random access memory development since late 1953. He is an associate member of ASME.

John S. Osborne

B.M.E., Cornell University, 1949; joined IBM in 1949 and is engaged in design of recognition logic for character sensing systems; is now Associate Engineer at the Endicott Product Development Laboratory. Membership includes ASME, AIEE, Cornell Society of Engineers, and IRE Subcommittee on Functional Representation of Control, Computing and Switching Equipment.

Alfred G. Redfield

B.A., Harvard University, 1950; M.A., University of Illinois, 1952; Ph.D. Physics, University of Illinois, 1953. Joined IBM in 1955 and works at Watson Research Laboratory. His areas of work include nuclear and electronic spin magnetic resonance and low-temperature physics; is a member of the American Physical Society.

John A. Swanson

S.B. in Physics, 1946 and A.M. in Physics, 1947, both from Harvard University. Joined IBM in 1951 and is now engaged in basic semiconductor research at the Research Center in Poughkeepsie.

Walker H. Thomas

B.E.E.E., Vanderbilt University, 1947. In 1952 he joined IBM and is presently associated with the Air Traffic Control Development Group of the Military Products Division at Poughkeepsie. He is a member of Tau Beta Pi and of the Association for Computing Machinery.

Sol Triebwasser

A.B., Brooklyn College, 1941; M.A., Columbia University, 1948; Ph.D., Columbia University, 1952. Instructor in Physics, Brooklyn College, 1947-50; Research Assistant, Columbia Radiation Laboratory, 1951. Member of Staff, Watson Research Laboratory since 1952; now engaged in study of ferroelectrics. Member of American Physical Society of Sigma Xi.

Edwin R. Wyma

B.S.M.E., Michigan College of Mining and Technology, 1950. Joined IBM at Endicott in 1950; later work at Poughkeepsie included Product Release Engineering and studies in Physical Research Department. At present he is Project Engineer in Computer Design section of Product Development Laboratory, Poughkeepsie. Is member of Tau Beta Pi.

Sol Zaromb

B.Ch.E., Cooper Union, 1950; Ph.D., Polytechnic Institute of Brooklyn, 1954. He joined IBM as associate chemist in 1956 and is now engaged in semiconductor research at the Research Center in Poughkeepsie. Is a member of American Chemical Society and of New York Academy of Sciences.
