

Authors

Leonard E. Alsop

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Alsop is manager of a group engaged in scientific computations at the Research Center. He received his Ph.D. in Physics from Columbia University in 1960. From 1960 until 1965 he worked at the Lamont Geological Observatory of Columbia University. He joined IBM in 1965 and came to the Research Center in 1967. Dr. Alsop also holds an adjunct appointment as Professor of Geology at Columbia. He is a member of the American Geophysical Union, the Seismological Society of America, and the IEEE.

W. E. Bosarge, Jr.

Data Processing Division, Scientific Center, Houston, Texas

Dr. Bosarge is an Advisory Mathematician in the Mathematics and Physics Department of the Houston Scientific Center. He joined the Federal Systems Division of IBM in Huntsville, Alabama in 1964. He received the B.S. and M.S. degrees in Applied Mathematics from the Georgia Institute of Technology in 1961 and 1963, respectively, and the Ph.D. degree in Applied Mathematics from Brown University in 1968, studying under an IBM Resident Study Graduate Fellowship. He also studied at the Eidgenössische Technische Hochschule, Zürich, under an Institute for International Education Fellowship. In 1968 he joined the IBM Scientific Center in Houston where he has been working in numerical analysis and control theory. Dr. Bosarge is a member of Sigma Xi, Phi Kappa Phi, Tau Beta Pi, and the Society for Industrial and Applied Mathematics.

Richard P. Brent

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Brent is a Special Research Agreement Employee in the Mathematics Department at the Research Center. His education includes a B.Sc. (honors I) from Monash University, Australia, 1968; an M. S. in 1970 and a Ph.D. in Computer Science in 1971 from Stanford University. Dr. Brent is a member of the Society for Industrial and Applied Mathematics, the Association for Computing Machinery, and the Mathematical Programming Society. He is author of the book *Algorithms for Minimization Without Derivatives*.

José Canosa

Data Processing Division, Scientific Center, Palo Alto, California

Dr. Canosa is a Staff Scientist in the Applied Physics Department at the Scientific Center. He received a B.S. in Physics at the University of Barcelona, Spain, 1955; an M.S. in 1961 and a Ph.D. in Applied Physics in 1964, both at Harvard University. From 1964 to 1967 he worked as a physicist at the Valleci-

tos Atomic Laboratory of the General Electric Company at Pleasanton, California, where he carried out theoretical research in nuclear reactor safety. Since joining IBM in 1967 he has been doing research in mathematical and computational physics, and more recently in plasma physics. He is a member of Sigma Xi, the American Physical Society, the American Nuclear Society, and the Society for Industrial and Applied Mathematics.

Tien Chi Chen

Research Division, San Jose, California

Dr. Chen is a member of the Systems Department at the San Jose Research Laboratory. He received his B.Sc. in Chemistry from Brown University, and his M.A. in Chemistry and Ph.D. in Physics from Duke University. He has been with IBM since 1956, and has served as visiting lecturer at Vassar College, Poughkeepsie, New York, and at the University of California at Berkeley. During 1966 he was a visiting scientist at the University of Uppsala, Sweden. His current interests include machine organization, hardware algorithms, numerical analysis, and molecular quantum theory. He is a member of the American Mathematical Society, the American Physical Society, the Association for Computing Machinery, the IEEE, Sigma Pi Sigma, Phi Lambda Upsilon, Sigma Xi, and Phi Beta Kappa.

Harlan P. Crowder

Thomas J. Watson Research Center, Yorktown Heights, New York

Mr. Crowder is a Senior Associate Programmer in the Mathematical Sciences Department at the Research Center. He joined IBM in 1968 with a B.S. from East Texas State University and is currently a graduate student at New York University.

Allan S. Goodman

Thomas J. Watson Research Center, Yorktown Heights, New York

Mr. Goodman is a Staff Member in the Mathematical Sciences Department at the Research Center. He has been with IBM since 1966. His education includes a B.E.E. from The City College of New York, 1960, and an M.S. (E.E.) from New York University, 1966. He worked at General Precision Aerospace (GPI) from 1960 to 1966. Mr. Goodman is a member of the IEEE and the Association for Computing Machinery.

Alexander R. Gourlay

World Trade Corporation, Scientific Center, Peterlee, England

Dr. Gourlay is a member of the Management Sciences Group of the United Kingdom Scientific Center. He has been with IBM since 1970. His education includes a B.Sc. in Applied

Mathematics and a Ph.D. in Numerical Analysis, both from the University of St. Andrews in Scotland. During 1966-67 he was Lecturer in Applied Mathematics at the University of St. Andrews, and from 1967 to 1970 he held a similar post at the University of Dundee. Dr. Gourlay is a member of the Association for Computing Machinery and the Institute of Management Sciences, and is an Associate Fellow of the Institute of Mathematics and Its Applications.

Monique M. Guignard

University of Lille

Dr. Guignard was a consultant at the IBM Philadelphia Scientific Center in 1971. She also worked as a consultant at the New York Scientific Center of IBM during the summers of 1967 and 1968. Dr. Guignard was an Assistant in the Computing Laboratory Department of Computer Science Electronics, Electrotechnics and Automata, University of Lille from 1965 to 1968. She has been Maitre Assistante at the university since 1968. Her education includes degrees in Licence ès sciences mathématiques pures 1962, Licence ès sciences mathématiques appliquées 1964, and a Doctorat de spécialité en mathématiques appliquées 1967. She is a member of the AFCET (Association Française pour la Cybernétique Economique) and of AMS.

Alan J. Hoffman

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Hoffman is Acting Director of the Mathematical Sciences Department at the Research Center, which he joined in 1961. He received an A.B. in 1947 and a Ph.D. in 1950 in Mathematics from New York University. He was a member of the Institute for Advanced Study, Princeton, 1950-51; Mathematician at the National Bureau of Standards, Washington, D.C., 1951-56; Scientific Liaison Officer at the Office of Naval Research, London, 1956-57; a member of Management Consultation Services, General Electric Company, 1957-61; and is currently Adjunct Professor of Mathematics at the City University of New York. He has been a member of the editorial boards of several journals and serves as Editor-in-Chief of the *Naval Research Logistics Quarterly* and *Linear Algebra and Its Applications*. He is a member of the American Mathematical Society.

Werner Liniger

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Liniger is a Staff Member in the Mathematical Sciences Department at the Research Center. He joined the Research Division of IBM in 1959. His degrees in Mathematics are a Diploma (M.S.) from the Swiss Federal Institute of Technology in Zurich (1951) and a Dr. ès Sc. (Ph.D.) from the University of Lausanne, Switzerland (1956). From 1952 through 1955 he was a Research Assistant at the University of Lausanne. Before joining IBM, Dr. Liniger spent two years with the Univac Division of Sperry Rand Corporation in Philadelphia. His main interests are numerical analysis and applied mathematics. He is a member of the Society for Industrial and Applied Mathematics, the Association for Computing Machinery, and the Gesellschaft für angewandte Mathematik und Mechanik.

Charles A. Micchelli

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Micchelli is a Staff Member in the Mathematical Sciences Department at the Research Center. He received his B.A. from Rutgers Newark College of Arts and Sciences in 1964, his M.S. in 1966 and Ph.D. in 1969 in Mathematics from Stanford University. He was a member of the Department of Computer Sciences, University of Uppsala, Sweden, during the academic year 1969-70 and joined IBM in the Research Division in 1970. Dr. Micchelli is an Adjunct Assistant Professor in the Graduate School of Business Administration, Iona College, New Rochelle, New York.

Willard L. Miranker

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Miranker is Assistant Director of the Mathematical Sciences Department at the Research Center. He has been with IBM since 1958. His B.A., 1952, M.S., 1953, and Ph.D., 1956, were obtained in Mathematics at New York University. In 1956-58 he was a member of the Mathematics Department at the Bell Telephone Laboratories. He is currently an Adjunct Professor of Mathematics at New York University. Since 1952 he has held various visiting or adjunct faculty positions at Cornell University, California Institute of Technology, the City University of New York, the Hebrew University of Jerusalem, Adelphi University, and the University of Paris. He is a lecturer in applied mathematics for the American Association for the Advancement of Science. He is a member of the American Mathematical Society and the Society for Industrial and Applied Mathematics.

John Li. Morris

Department of Mathematics, University of Dundee, Scotland.

Dr. Morris is Lecturer in Computational Science at the University of Dundee. His education includes a B.Sc. in Mathematics from the University of Leicester in 1965 and a Ph.D. in Numerical Analysis from the University of St. Andrews in 1968. From 1968-70 he was a National Cash Register post-doctoral research fellow in the Department of Mathematics at the University of Dundee, where he subsequently took up his present post. Dr. Morris is an Associate Fellow of the Institute of Mathematics and Its Applications.

Farouk M. Odeh

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Odeh is a member of the Differential Equations and Numerical Analysis Group in the Mathematical Sciences Department at the Research Center. He has been with IBM since 1960. His education includes a B.S. from Cairo University, 1955 and a Ph.D. in Applied Mathematics, 1960, from the University of California at Berkeley. He was an instructor at Teachers' College, Amman-Jordan, in 1955-56; a temporary member of the Courant Institute of Mathematical Sciences in 1962-63; and a visiting Associate Professor of Mathematics at the American University of Beirut (Lebanon) in 1967-68. Dr. Odeh is a member of the American Mathematical Society, the Mathematical Association of America, and the Society for Industrial and Applied Mathematics.

Hugo R. Penafiel

Data Processing Division, Scientific Center, Palo Alto, California

Mr. Penafiel has been a member of the Scientific Center staff since 1965 and has worked in several areas of computational physics, numerical analysis, and graphics. He joined IBM in 1960 and obtained an M.S. in Engineering and Computer Science from Stanford University in 1968. Mr. Penafiel is a member of the Association for Computing Machinery.

Jorma Rissanen

Research Division, San Jose, California

Dr. Rissanen is a member of the Systems Department in the San Jose Research Laboratory and has been with IBM since 1961. He received his Engineer's Diploma in Electrical Engineering in 1956, Licenciante of Technology in 1960, and Doctor of Technology in Control Theory and Mathematics in 1965, all from the Technical University of Helsinki, Finland. His research interests are information science, control, automata, systems theory, mathematical programming and the mathematics of computation.

Theodore J. Rivlin

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Rivlin is a Manager of Numerical Analysis in the Mathematical Sciences Department at the Research Center. He has been with IBM since 1959. He received the Ph.D. degree in Mathematics from Harvard University in 1953; was Instructor in Mathematics at the Johns Hopkins University from 1952 to 1955; and was Research Assistant in the Institute for Mathematical Sciences, New York University, during 1955-56. From 1956 to 1959 he was Senior Mathematical Analyst in a research group at Fairchild Engine and Airplane Company, Deer Park, New York. He was Visiting Professor of Computer Science at Stanford University for the academic year 1969-70, and has been Adjunct Professor of Mathematics at the City University of New York since 1966. He is a member of the Mathematical Association of America, the American Mathematical Society, and the Society for Industrial and Applied Mathematics. Dr. Rivlin's major interest is approximation theory and he is author of the book *An Introduction to Approximation Theory*.

Carl L. Smith

International Mathematical and Statistical Libraries, Inc., Houston, Texas

Dr. Smith joined the staff of the International Mathematical and Statistical Libraries after receiving a Ph.D. in Electrical Engineering from Rice University in 1971. He received his B.S. and M.S. degrees in Electrical Engineering in 1967 and 1968, respectively, from the University of Kansas. During his study at Kansas he was a teaching assistant and later held joint appointments as Lecturer in the Department of Electrical Engineering and Research Assistant at the Center for Research in Engineering Sciences. In 1968 he won a fellowship at Rice University where he continued his studies, and during the summer of 1969 he worked as a Research Assistant at the Los Alamos Scientific Laboratories. Dr. Smith is a member of the IEEE.

Kurt Spielberg

Data Processing Division, Scientific Center, Philadelphia, Pennsylvania

Dr. Spielberg is presently Manager of Management Science at the IBM Philadelphia Scientific Center. He joined IBM in 1960 and has worked on problems of approximation, weather forecasting and mathematical programming. Dr. Spielberg received a B.S. in Physics (summa cum laude) from the City College of New York in 1951 and a Ph.D. in Physics from the University of Vienna in 1954. He holds a Teaching Certificate in Mathematics and Physics from the University of Vienna which he received in 1955. He is an Associate Editor of *Mathematical Programming* and is a member of the Operations Research Society of America.

John A. Tomlin

Stanford University, Stanford, California

Dr. Tomlin is a Research Associate in the Operations Research Department at Stanford University. He gained a B.Sc. (honors) in 1963 and a Ph.D. in Mathematics in 1967, both from the University of Adelaide, South Australia. He joined Scientific Control Systems Ltd. (then CEIR Ltd.) in 1968 and was involved primarily in research and development work in integer programming and its applications. He was awarded an IBM post-doctoral fellowship at Stanford in 1970, where he worked on compact inverse schemes for the simplex method. He returned to Scientific Control Systems in late 1970 as a senior consultant and continued to work on mathematical programming and its applications and, in particular, the implementation of compact inverse methods. He took up his appointment as Research Associate at Stanford in 1972, coordinating research on large scale systems. He is a charter member of the Mathematical Programming Society.

Shmuel Winograd

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Winograd was named an IBM Fellow in 1972. This five-year appointment permits him to pursue research projects in fields of his own choice. His present interest is in the complexity of parallel computation. He joined IBM in 1961 and is currently the Director of the Mathematical Sciences Department at the Research Center. Dr. Winograd received his B.Sc. and M.Sc. in Electrical Engineering from Massachusetts Institute of Technology in 1959 and his Ph.D. in Mathematics from New York University in 1968. He is an adjunct professor at New York University and is a visiting professor at The Technion, Israel, during 1971-1972.

Philip Wolfe

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Wolfe is manager of the Optimization Group in the Department of Mathematical Sciences. He has been with IBM since 1966. He received his Ph.D. in Mathematics at the University of California at Berkeley in 1954 and was an Instructor in Mathematics at Princeton University until 1957 and a Mathematician at the RAND Corporation in Santa Monica until 1965. He has specialized in the development of computational methods for linear and nonlinear programming problems.

Contents of previous issue

May 1972

Vol. 16, No. 3

Preface to Papers on Mechanical Technology	202	An Application of White Light Interferometry in Thin Film Measurements by C. Lin and R. F. Sullivan	269
• <i>Papers:</i>		Removal of Numerical Instability in the Solution of Nonlinear Heat Exchange Equations by J. W. White	277
Mechanics of Film Adhesion: Elastic and Elastic-Plastic Behavior by W. T. Chen and T. F. Flavin	203	Design and Fabrication of Heat Transfer Surfaces from Superplastic Material by J. B. Randolph and F. K. King	283
Viscoelastic Behavior of Computer Tape Subjected to Periodic Motion by G. W. Baumann	214	Stationary Temperature Profiles and Heat Flux Distribution in a Plastic-encapsulated Circuit Package by J. A. Paivanas	292
Dynamic Control of Spring-driven Mechanisms by R. E. Bishop and C. C. Wilson	222	• <i>Communications:</i>	
IBM Copier Scanning System by D. A. Beaty, T. A. Hoskins, T. H. Richards and H. W. Simpson	231	Analytical and Experimental Thermal Analysis of Multiple Heat Sources in Integrated Semiconductor Chips by R. D. Lindsted and D. A. DiCicco	303
Some Design Considerations for a Document Sorting Machine by J. L. Zable and J. C. Yarrington	239	Monitoring Microinch Displacements in Ultrasonic Welding Equipment by F. J. Crispi, G. C. Maling, Jr. and A. W. Rzent	307
Acoustic Signal Analysis for Noise Source Identification in Mechanisms by R. H. Peterson, A. D. Ackerman and R. E. Zelenski	249	Design Considerations for a Magneto-optic Cryogenic Film Memory by A. M. Patlach	313
Holographic Interferometry Deformation Study of a Printer Type-piece by A. D. Wilson and D. H. Strobe	258		

IBM

The IBM Journal of Research and Development is abstracted by *Applied Mechanics Reviews*, *Bulletin Signalétique*, *Chemical Abstracts*, *Computer Abstracts*, *Computer & Control Abstracts*, *Computer & Information Systems*, *Computing Reviews*, *Data Processing Digest*, *Electrical & Electronics Abstracts*, *Electronics & Communications Abstracts Journal*, *(The) Engineering Index*, *Information Science Abstracts*, *International Aerospace Abstracts*, *Laser and Electro-Optics Reviews*, *Magnetohydrodynamics & Plasmas*, *Mathematical Reviews*, *Metals Abstracts*, *Operations Research/Management Science*, *Physics Abstracts*, *Physikalische Berichte*, *Referativnyi Zhurnal*, *Science Citation Index*, *Solid State Abstracts Journal*, and *Theoretical Physics Abstracts Journal*. Reproductions of the IBM Journal by years are available on positive and negative microfilm from University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106.
