

Authors

Roy Benedek

Argonne National Laboratory, Argonne, Illinois

Dr. Benedek is a member of the Materials Science Division at Argonne National Laboratory, which he joined in April 1974. His major research interest is the theory of lattice defects and radiation damage in metals. He received a B.S. and M.Eng. in engineering physics at Cornell University in 1966 and 1967, and a Ph.D. in physics in 1971 from Brown University. He returned to Cornell University for two years as a postdoctoral research associate in the Department of Materials Science and Engineering. Dr. Benedek is a member of the American Physical Society.

David B. Bogy

University of California, Berkeley

Dr. Bogy is an Associate Professor of Applied Mechanics at Berkeley and since 1972 has been a consultant to the applied technology group at the IBM Research Laboratory in San Jose. His current technical interests include work in anisotropic elastic composites, and various types of contact problems on elastic media. He received a B.A. in geology and mechanical engineering and an M.S. in mechanical engineering in 1959 and 1961, both from Rice University, and a Ph.D. in applied mathematics in 1966 from Brown University. After postdoctoral work in elasticity at the California Institute of Technology, he joined the faculty at the University of California at Berkeley in 1967. Dr. Bogy is a member of the American Society of Mechanical Engineers and Sigma Xi.

Robert G. Cain

System Products Division, Poughkeepsie, New York

Mr. Cain is an engineer with the large scale processor development group and is currently working on the development of high performance associative indexing algorithms and techniques. He joined IBM in 1967 as a junior engineer and was a micro-programmer on the 370/155 and 370/158 projects. In 1972 he became associated with an advanced technology group studying array logic. Mr. Cain received a B.S. in electrical engineering in 1967 from the University of Illinois in Urbana.

Wen H. Chang

System Products Division, East Fishkill, New York

Dr. Chang is working on special memory products in the East Fishkill laboratory. He joined IBM in Burlington in 1968. His education includes B.S. and M.S. degrees in electrical engineering from the National Taiwan University, Taipei, and the University of California at Berkeley in 1961 and 1963, and a Ph.D. in applied physics from Harvard University in 1969. Dr. Chang is a member of the Institute of Electrical and Electronics Engineers and Sigma Xi.

Wilm E. Donath

Research Division, Yorktown Heights, New York

Dr. Donath joined IBM in 1959 and for the past ten years has worked primarily on problems connected with design automation at the Thomas J. Watson Research Center. He received a B.S. degree in chemical engineering from the Carnegie Institute of Technology in Pittsburgh and a Ph.D. in chemistry from the University of California at Berkeley. He is a member of the Institute of Electrical and Electronics Engineers, Sigma Xi, and the Society for Industrial and Applied Mathematics.

Donald P. Gaver

Naval Postgraduate School, Monterey, California

Dr. Gaver joined the Naval Postgraduate School in 1970, where he is a Professor of Operations Research and Statistics. During this time he has also been a consultant to the IBM Research Laboratory in San Jose. His technical interests are applied probability, data analysis as well as probability modeling and simulation of computer systems. He previously was employed by the U.S. Navy's Operations Evaluation Group from 1951 to 1953 and was a mathematician and later advisory mathematician at Westinghouse Research Laboratories in Pittsburgh, Pennsylvania, from 1956 to 1963. Subsequently he was a faculty member and finally Professor of Statistics at the Carnegie-Mellon University. In addition, Dr. Gaver has held visiting faculty appointments at Stanford University, Department of Statistics, and the University of California at Berkeley, Department of Operations Research. His educational background includes B.S., M.S. and Ph.D. degrees in mathematics from the Massachusetts Institute of Technology in 1950 and 1951 and Princeton University in 1956. Dr. Gaver is a member of the Operations Research Society of America and the Institute of Mathematical Statistics and a Fellow of the American Statistical Association and of the American Association for the Advancement of Science.

Sakti P. Ghosh

Research Division, San Jose, California

Dr. Ghosh is currently working on data management techniques and performance at the Research Laboratory. He initially joined IBM at the Thomas J. Watson Research Center in Yorktown Heights, New York, in 1962. He developed the balanced filing schemes based on finite geometries and the consec-

utive retrieval properties for file organizations. Dr. Ghosh's other professional experience has included a teaching position at New York University and in addition, he has also served as a Visiting Guest Lecturer at several universities in the United States and abroad. He obtained a B.S. (with honors) and an M.Sc. from Calcutta University in 1955 and 1957, and a Ph.D. in 1962 from the University of California at Berkeley—all in statistics. He is a life member of the Calcutta Statistical Association, a member of the Institute of Electrical and Electronics Engineers, the Association for Computing Machinery, the American Statistical Association, and the Institute of Mathematical Statistics.

Herm J. Greenberg

Research Division, San Jose, California

Dr. Greenberg is currently working in the mechanics and hydrodynamics group of the Exploratory Technology Department. Since joining IBM in 1971 at San Jose, his technical interests have been directed toward mathematical modeling and computer simulation of mechanical systems. Dr. Greenberg was previously a mechanical engineer with the Bechtel Corporation in San Francisco, California. He received a B.S. in engineering mechanics in 1964, an M.S. in theoretical and applied mechanics in 1965, both from the University of Illinois, and a Ph.D. in applied mechanics in 1968 from the University of California at Berkeley.

Lawrence G. Heller

Research Division, Yorktown Heights, New York

Dr. Heller is an advisory engineer in the special exploratory memory group at the Thomas J. Watson Research Center, where his current interests are in MOS devices and circuits. He joined IBM in 1960 at the Endicott laboratory. Before transferring to the Research Center in 1973, he spent four years at the Burlington laboratory, where he was involved in various CCD and MOS bucket-brigade studies. His education includes B.S., M.S. and Ph.D. degrees in electrical engineering from the Newark College of Engineering in 1964 and Iowa State University, Ames, in 1967 and 1969. Dr. Heller is a member of Sigma Xi, Eta Kappa Nu, Tau Beta Pi, and the Institute of Electrical and Electronics Engineers.

Paul S. Ho

Research Division, Yorktown Heights, New York

Dr. Ho is currently involved in the study of diffusion and electromigration in metallic films and the calculation of point-defect properties in crystalline solids in a thin film and metallurgy group at the Thomas J. Watson Research Center, where he joined IBM in 1972. From 1965 to 1972 he was affiliated with Cornell University as a Research Associate, Assistant Professor and later as Associate Professor in the Department of Materials Science and Engineering. He received a B.S. in 1957 in mechanical engineering from Chenghung University and an

M.S. in 1959 in physics from Tsinghua University, both in Taiwan, and a Ph.D. in physics in 1964 from Rensselaer Polytechnic Institute. Dr. Ho is a member of the American Physical Society and Sigma Xi.

Se June Hong

System Products Division, Poughkeepsie, New York

Dr. Hong is a Visiting Associate Professor of electrical engineering at the University of Illinois for the academic year 1974 to 1975. He joined IBM in 1969 in the reliability technology group working in the areas of system reliability, error-correcting codes, and test pattern generation. He later became engaged in research and development in efficient use of LSI, array logic and large function minimization on the staff of IBM Fellow, Dr. H. Fleisher. He received a B.Sc. in electronics engineering from Seoul National University in 1965, and an M.S. and a Ph.D. in electrical engineering from the University of Illinois in 1967 and 1969. Dr. Hong is a member and Distinguished Visitor of the Institute of Electrical and Electronics Engineers, the Mathematics Association of America, Sigma Xi, and the Korean Engineers and Scientists in America.

Peter A. W. Lewis

Naval Postgraduate School, Monterey, California

Dr. Lewis is a Professor of Operations Research and Statistics at The Naval Postgraduate School in Monterey. He is also a consultant to the IBM Research Division, of which he was a member from 1955 to 1971, as well as to other organizations. He received an A.B. degree from Columbia College, Columbia University in 1954, a B.S. and an M.S. in electronic engineering from Columbia University Engineering School in 1955 and 1957, and a Ph.D. in statistics from the University of London in 1964. From 1969 to 1970 he was an NIH Special Fellow at Imperial College, University of London. Dr. Lewis is a member of the Royal Statistical Society, the American Statistical Association, the Institute of Mathematical Statistics, the Biometric Society, and is a Fellow of the Institute of Mathematical Statistics and the American Statistical Association. He is coauthor with D. R. Cox of the book: *The Statistical Analysis of Series of Events*, and recently edited a volume entitled: *Stochastic Point Processes: Statistical Analysis, Theory and Applications*.

Daniel L. Ostapko

System Products Division, Poughkeepsie, New York

Dr. Ostapko is a member of the staff of IBM Fellow, Dr. H. Fleisher, and is investigating structures and design aids which provide more efficient use of large scale integration. Currently, his technical interests include array logic, design automation, and fault tolerant computing. He joined IBM in East Fishkill in 1968 and has since held several assignments in the development of computer hardware. He received a B.S. and a B.S.E.E. from Trinity College in 1963 and 1964, and an M.S. and a Ph.D. from Northwestern University in 1966 and 1968 in electrical engineering. During the 1973 to 1974 academic year, he was a Visiting Fellow in the Electrical Engineering Department at Johns Hopkins University. Dr. Ostapko is a member of Sigma Xi and the Institute of Electrical and Electronics Engineers.

Michael E. Senko

Research Division, Yorktown Heights, New York

Dr. Senko is a member of the Mathematical Sciences Department at the Thomas J. Watson Research Center, where his current interests include theoretical physics and the scientific analysis of functions and performance in data base systems. He joined IBM in 1956 as a member of the Research Computing Center in Poughkeepsie. He has also been manager of the technical staff for the IBM Director of Research and manager of the Information Sciences Department at San Jose. In addition, he was chairman of the initial IBM Corporate Technical Board committee to set technical strategy for the information systems area. He also initiated the generalized information system project and was responsible for it during its original development. In 1964, he was appointed as a Brookings Institution Public Affairs Fellow and worked for the Assistant Secretary of Commerce for Science and Technology. He has been an ACM National Lecturer and is currently a member of the National Research Council, U.S. National Committee for CODATA. Dr. Senko is a member of the American Chemical Society, the American Crystallographic Association, the American Society for Information Science, the American Association for the Advancement of Science, the Association for Computing Machinery, the New York Academy of Sciences, and Sigma Xi.

Gerald S. Shedler

Research Division, San Jose, California

Mr. Shedler is currently a research staff member working in the area of modeling and analysis of data base systems. During the

past year he was an Acting Associate Professor in the Department of Operations Research at Stanford University. Prior to this he was manager of system structures and manager of storage systems modeling and analysis at the San Jose Research Laboratory. Mr. Shedler's major technical interests lie in the areas of applied probability, queuing theory, stochastic point processes, and the mathematical modeling of computer systems. He joined IBM in 1965 as a member of the Computer Science Department at the Thomas J. Watson Research Center, having received a B.A. degree in mathematics from Amherst College in 1961 and an M.A. in mathematics from Tufts University in 1964. Mr. Shedler is a member of the Association for Computing Machinery.

Frank E. Talke

Research Division, San Jose, California

Dr. Talke joined IBM in 1969 at the Research Division and has been manager of the mechanics and hydrodynamics project in the applied science complex in San Jose since 1971. In this capacity he has been studying the mechanical aspects of magnetic recording technology. In 1971 he received an Outstanding Contribution Award for his investigations in friction, wear, and lubrication of disk files. In addition to his work with IBM, he has also taught graduate courses in friction, wear and lubrication at the University of Santa Clara, California. He attended the University of Stuttgart, Germany, where he received a Diplom-Ingenieur degree (MS) in applied mechanics in 1965, and the University of California at Berkeley, where he received a Ph.D. degree in mechanical engineering in 1969.
