

Recent papers by IBM authors

Reprints of the papers listed here may usually be obtained by writing directly to the authors. The authors' IBM divisions or groups are identified as follows: CHQ is Corporate Headquarters; CPD, Communication Products Division; DSD, Data Systems Division; ESD, Entry Systems Division; FSD, Federal Systems Division; GPD, General Products Division; GTD, General Technology Division; IPD, Information Products Division; ISG, Information Systems Group; IS&CG, Information Systems & Communications Group; IS&TG, Information Systems & Technology Group; NAD, National Accounts Division; NMD, National Marketing Division; RES, Research Division; SPD, System Products Division; SRI, Systems Research Institute; and STD, Systems Technology Division.

• Papers are listed alphabetically by authors.

A

A. J. Ardell (University of California, Los Angeles) and S. Pattanaik (RES San Jose, CA), **Work-hardening of dispersion-strengthened disordered Cu₃Au-SiO₂ single crystals**, *Philosophical Magazine A* **50**, No. 3, 339-360 (1984).

D. D. Awschalom, F. P. Milliken, and K. W. Schwartz (RES Yorktown Hts., NY), **Properties of Superfluid Turbulence in a Large Channel**, *Physical Review Letters* **53**, No. 14, 1372-1375 (1984).

B

R. Badii (RES Zurich, Switzerland) and A. Politi (Istituto Nazionale di Ottica, Florence, Italy), **Intrinsic Oscillations in Measuring the Fractal Dimension**, *Physics Letters A* **104**, No. 6-7, 303-305 (1984).

S. E. Barnes (University of Miami, Coral Gables, FL), A. P. Malozemoff (RES Yorktown Hts., NY), and B. Barbara (Laboratoire Louis Néel Centre National de la Recherche Scientifique, Grenoble, France), **Scaling approach to spin-glass phenomena**, *Physical Review B* **30**, No. 5, 2765-2768 (1984).

R. J. Bartlett, D. R. Kania, W. J. Trela (Los Alamos National Laboratory, NM), E. Källne (JET Joint Undertaking, Abingdon, England), P. Lee (Ball Aerospace Systems Division, Boulder, CO), and E. Spiller (RES Yorktown Hts., NY), **Performance of multilayer dispersion elements from 80 to 500 eV**, *Optical Engineering* **23**, No. 5, 667-668 (1984).

R. G. Bayer (GTD Endicott, NY), **Abrasiveness of Electroresistive Papers**, *Tappi Journal* **67**, No. 10, 76-79 (1984).

G. Binnig, N. García, H. Rohrer (RES Zurich, Switzerland), J. M. Soler, and F. Flores (Universidad Autónoma de Madrid, Spain), **Electron metal-surface interaction potential with vacuum tunneling: Observation of the image force**, *Physical Review B* **30**, No. 8, 4816-4818 (1984).

G. K. Binnig, H. Rohrer, Ch. Gerber, and E. Stoll (RES Zurich, Switzerland), **Real-Space Observation of the Reconstruction of Au (100)**, *Surface Science* **144**, Nos. 2/3, 321-335 (1984).

O. Bisi, L. W. Chiao, and K. N. Tu (RES Yorktown Hts., NY), **Electronic structure and properties of Ni-Si (001) and Ni-Si (111) reactive interfaces**, *Physical Review B* **30**, No. 8, 4664-4674 (1984).

H. Bohlen, U. Behringer, J. Keyser, P. Nehmiz, W. Zapka, and W. Kulcke (IBM Germany, Sindelfingen), **High Throughput Submicron Lithography with Electron Beam Proximity Printing**, *Solid State Technology* **27**, No. 9, 210-217 (1984).

J. Q. Broughton (State University of New York, Stony Brook) and P. S. Bagus (RES San Jose, CA), **Self-consistent-field studies of core-level shifts in ionic crystals: LiF**, *Physical Review B* **30**, No. 8, 4761-4773 (1984).

G. Burns and F. H. Dacol (RES Yorktown Hts., NY), **Glassy polarization behavior in K₂Sr₄(NbO₃)₁₀-type ferroelectrics**, *Physical Review B* **30**, No. 7, 4012-4013 (1984).

M. Büttiker, Y. Imry (RES Yorktown Hts., NY), and M. Ya. Azbel (Tel-Aviv University, Tel-Aviv, Israel), **Quantum oscillations in one-dimensional normal-metal rings**, *Physical Review A* **30**, No. 4, 1982-1989 (1984).

C

T. C. Childers, P. Moncuse, J. J. Reiss, and S. K. Vohra (IBM Instruments Inc., Danbury, CT), **Polarographic analysis of precious metals in plating baths**, *American Laboratory* **16**, No. 10, 37-42 (1984).

B. C. Clark, S. Hama (The Ohio State University, Columbus), J. A. McNeil (Drexel University, Philadelphia, PA), R. L. Mercer (RES Yorktown Hts., NY), L. Ray (University of Texas at Austin), B. D. Serot (Indiana University, Bloomington), D. A. Sparrow, and K. Stricker-Bauer (University of Pennsylvania, Philadelphia), **Relativistic Impulse-Approximation Calculation of *p*-Nucleus Elastic Scattering**, *Physical Review Letters* **53**, No. 15, 1423-1426 (1984).

H. Coufal (RES San Jose, CA), **Photothermal spectroscopy of weakly absorbing samples using a thermal wave phase shifter**, *Applied Physics Letters* **45**, No. 5, 516-518 (1984).

D

F. de Pasquale (Università degli Studi di Roma, Italy), P. Ruggiero (Università degli Studi di Napoli, Italy), and M. Zannetti (RES Zurich, Switzerland), **Stochastic quantization of a system with quenched random fields**, *Physical Review B* **30**, No. 5, 2695-2703 (1984).

N. J. DiNardo, J. E. Demuth, W. A. Thompson, and P. G. Ledermann (RES Yorktown Hts., NY), **Ultrahigh-vacuum sample transfer device with low-temperature capability**, *Review of Scientific Instruments* **55**, No. 9, 1492-1494 (1984).

K. A. Duke and W. A. Wall (ESD Boca Raton, FL), **A professional graphics controller**, *IBM Systems Journal* **24**, No. 1, 14-25 (1985).

E

J. Economy (RES San Jose, CA), **High Temperature Polymers for Electronic Devices**, *Contemporary Topics in Polymers* **5**, 351-373 (1984).

P. D. Estridge (ESD Boca Raton, FL), **What Makes A Computer Personal**, *Creative Computing* **10**, No. 11, 194 (1984).

F

M. V. Fischetti (RES Yorktown Hts., NY), **Monte Carlo Solution to the Problem of High Field Electron Heating in SiO₂**, *Physical Review Letters* **53**, No. 18, 1755 (1984).

G

J. W. Gadzuk (National Bureau of Standards, Washington, DC) and A. C. Luntz (RES San Jose, CA), **On Vibrational Lineshapes of Adsorbed Molecules**, *Surface Science* **144**, Nos. 2/3, 429-450 (1984).

S. Getman (National Bureau of Standards, Joint Institute for Laboratory Astrophysics, Boulder, CO) and R. K. Nesbet (RES San Jose, CA), **High-energy forward elastic scattering of electrons: Born amplitudes for a pseudostate model of atomic hydrogen**, *Physical Review A* **30**, No. 4, 1636-1642 (1984).

L. Golub (Harvard-Smithsonian Center for Astrophysics, Cambridge, MA), E. Spiller (RES Yorktown Hts., NY), R. J. Bartlett, M. P. Hockaday, D. R. Kania, W. J. Trela (Los Alamos National Laboratory, NM), and R. Tatchyn (Stanford University, CA), **X-ray tests of multilayer coated optics**, *Applied Optics* **23**, No. 20, 3529-3533 (1984).

K. F. Greene (GTD East Fishkill, NY), **A High-Speed Nitric Acid Strip Solution for Electroless Nickel**, *Plating and Surface Finishing* **71**, No. 10, 64-67 (1984).

C. R. M. Grovenor, P. E. Batson, D. A. Smith, and C. Wong (RES Yorktown Hts., NY), **As segregation to grain boundaries in Si**, *Philosophical Magazine A* **50**, No. 3, 409-423 (1984).

C. R. M. Grovenor, A. P. Sutton (Oxford University, England), and D. A. Smith (RES Yorktown Hts., NY), **Epitaxy of BCC Metals on FCC (001) Substrates**, *Scripta Metallurgica* **18**, No. 9, 939-944 (1984).

H. Guggler, M. Jurich, J. D. Swalen (RES San Jose, CA), and A. J. Sievers (Cornell University, Ithaca, NY), **Observation of an index-of-refraction-induced change in the Drude parameters of Ag films**, *Physical Review B* **30**, No. 8, 4189-4195 (1984).

J

J. M. Jasinski (RES Yorktown Hts., NY), **Fourth Overtone Spectra of OH Oscillators in Simple Alcohols**, *Chemical Physics Letters* **109**, No. 5, 462-467 (1984).

K

P. A. Korn, J. P. McAdaragh, and C. L. Tondo (ESD Boca Raton, FL), **Expanded personal computing power and capability**, *IBM Systems Journal* **24**, No. 1, 26-36 (1985).

H. R. Krishna-Murthy (Indian Institute of Science, Bangalore, India) and C. Jayaprakash (RES Yorktown Hts., NY), **Thermodynamic scaling theory for impurities in metals**, *Physical Review B* **30**, No. 5, 2806-2827 (1984).

T. Kwok, P. S. Ho (RES Yorktown Hts., NY), and S. Yip (Massachusetts Institute of Technology, Cambridge), **Computer Simulation of Vacancy Migration in a fcc Tilt Boundary**, *Surface Science* **144**, No. 1, 44-52 (1984).

L

D. P. Landau (University of Georgia, Athens, GA) and R. H. Swendsen (RES Zurich, Switzerland), **Monte Carlo renormalization-group study of the rectangular Ising ferromagnet: Universality and a fixed line**, *Physical Review B* **30**, No. 5, 2787-2794 (1984).

G. Langren, R. Ludeke, J. F. Morar, Y. Jugnet, and F. J. Himpsel (RES Yorktown Hts., NY), **Oxidation of GaAs (110): New results and models**, *Physical Review B* **30**, No. 8, 4839-4841 (1984).

J. Lee, R. J. Madix (Stanford University, CA), J. E. Schlaegel, and D. J. Auerbach (RES San Jose, CA), **Molecular Beam Studies of the Dynamics of Activated Adsorption of N₂ on W (110): Dissociation Threshold and New Binding State**, *Surface Science* **143**, Nos. 2/3, 44-52 (1984).

C. J. Lobb (Harvard University, Cambridge, MA) and D. J. Frank (RES Yorktown Hts., NY), **Percolative conduction and the Alexander-Orbach conjecture in two dimensions**, *Physical Review B* **30**, No. 7, 4090-4092 (1984).

J. P. Lowe (Pennsylvania State University, University Park) and B. D. Silverman (RES Yorktown Hts., NY), **MO Theory of Ease of Formation of Carbocations Derived from Nonalternant Polycyclic Aromatic Hydrocarbons**, *Journal of the American Chemical Society* **106**, No. 20, 5955-5958 (1984).

M

B. L. Marks (IBM United Kingdom Laboratories, Winchester, England), **Taming the PL/I Syntax**, *Software Practices & Experience* **14**, No. 8, 775-789 (1984).

F. Mehran, K. W. H. Stevens, F. Holtzberg, R. L. Melcher, W. J. Fitzpatrick, and T. R. McGuire (RES Yorktown Hts., NY), **Electron Paramagnetic Resonance of the "Reentrant" Insulating Spin-Glass $\text{Eu}_x\text{Sr}_{1-x}\text{S}$** , *Solid State Communications* **52**, No. 2, 107-109 (1984).

R. Miles, R. K. S. Wong (University of Texas Medical Branch, Galveston), and R. D. Traub (RES Yorktown Hts., NY), **Synchronized Afterdischarges in the Hippocampus: Contribution of Local Synaptic Interactions**, *Neuroscience* **12**, No. 4, 1179-1190 (1984).

M. G. Moharam, T. K. Gaylord (Georgia Institute of Technology, Atlanta), G. T. Sincerbox, H. Werlich, and B. Yung (RES San Jose, CA), **Diffraction characteristics of photoresist surface-relief gratings**, *Applied Optics* **23**, No. 18, 3214-3220 (1984).

P. C. Myhre, J. D. Kruger, B. L. Hammond, S. M. Lok (Harvey Mudd College, Claremont, CA), C. S. Yannoni, V. Macho, H. H. Limbach, and H. M. Vieth (RES San Jose, CA), **Solid State ^{13}C CP/MAS Spectra of Rapidly Equilibrating Carbocations**, *Journal of the American Chemical Society* **106**, No. 20, 6079-6080 (1984).

N

R. K. Nesbet (RES San Jose, CA), **Algorithms for Regular and Irregular Coulomb and Bessel Functions**, *Computer Physics Communications* **32**, No. 4, 341-347 (1984).

R. K. Nesbet (RES San Jose, CA), **R-matrix formalism for local cells of arbitrary geometry**, *Physical Review B* **30**, No. 8, 4230-4234 (1984).

O

J. F. O'Malley (CHQ Armonk, NY), **Automation in local government: Then, now and tomorrow**, *American City or County* **99**, No. 9, 10 (1984).

P

M. Peo, J. C. Scott, and E. M. Engler (RES San Jose, CA), **Proton NMR linewidth and relaxation-rate study of an organic conductor with an antiferromagnetic ground state**, *Physical Review B* **30**, No. 7, 3639-3643 (1984).

H. C. Pfeiffer (GTD East Fishkill, NY), **Direct Write Electron Beam Lithography—A Production Line Reality**, *Solid State Technology* **27**, No. 9, 223-227 (1984).

C. L. Piechota (CHQ Armonk, NY), **Psychological Stress: The Unrecognized Health Hazard**, *American Industrial Hygiene Association Journal* **45**, No. 9, A 4 (1984).

Q

J. J. Quinn (RES Yorktown Hts., NY), **Higher Multipole Surface Plasmons, Plasmon Bands in Periodic Metallic Heterostructures, and Plasma Modes of Semiconductor Superlattices**, *Solid State Communications* **52**, No. 6, 607-609 (1984).

R

S. I. Raider and G. J. Clark (RES Yorktown Hts., NY), **Ion Implantation into Nb/Nb Oxide/PbAuIn Josephson Tunnel Junctions**, *Applied Physics Letters* **45**, No. 7, 796-798 (1984).

A. Revans (Health Center, Sheffield, England), P. J. Absolon, and G. Kaye (IBM United Kingdom Laboratories, Hursley, Winchester), **The human aspects of computers in general practice**, *Practitioner* **228**, No. 1395, 860-863 (1984).

S. J. Rothenberg (Lovelace Biomedical and Environmental Research Institute, Albuquerque, NM), C. R. Brundle (RES San Jose, CA), P. B. Denece (Solavolt International, Phoenix, AZ), R. L. Carpenter, G. J. Newton, and R. F. Henderson (Lovelace Biomedical and Environmental Research Institute, Albuquerque, NM), **Analysis of Gasifier Samples Collected with a High-Temperature/High-Pressure Cascade Impactor: Electron Spectroscopy for Chemical Analysis, Energy Dispersive X-Ray Analysis, and Scanning Electron Microscopy**, *Applied Spectroscopy* **38**, No. 5, 738-744 (1984).

G. W. Rubloff (RES Yorktown Hts., NY), **Silicide/Silicon Interface Bonding**, *Ultramicroscopy* **14**, Nos. 1-2, 107-119 (1984).

S

A. Schenzle, R. G. DeVoe, and R. G. Brewer (RES San Jose, CA), **Cumulative two-pulse photon echoes**, *Physical Review A* **30**, No. 4, 1866-1872 (1984).

W. Schmickler (Universität Düsseldorf, Federal Republic of Germany) and D. Henderson (RES San Jose, CA), **Approximate solution for the electronic density profile at the surface of jellium**, *Physical Review B* **30**, No. 6, 3081-3083 (1984).

B. A. Scott (RES Yorktown Hts., NY), **Homogeneous chemical vapor deposition**, *Semiconductors Semimetals* **21**, 123-149 (1984).

D. A. Smith, C. R. Grovenor, P. E. Batson, and C. Wong (RES Yorktown Hts., NY), **Grain Boundary-Solute Interactions in Polycrystalline Silicon and Germanium**, *Ultramicroscopy* **14**, Nos. 1/2, 131-134 (1984).

E. Spiller (RES Yorktown Hts., NY), **Phase conventions in thin film optics and ellipsometry**, *Applied Optics* **23**, No. 18, 3036-3037 (1984).

E. Spiller (RES Yorktown Hts., NY), **Totally reflecting thin-film phase retarders**, *Applied Optics* **23**, No. 20, 3544-3549 (1984).

J. W. Stasiak and R. W. Guernsey, Jr. (GTD East Fishkill, NY), **Reliable slip-on vacuum coupling for low-temperature apparatus**, *Review of Scientific Instruments* **55**, No. 9, 1504-1505 (1984).

E. Stoll (RES Zurich, Switzerland), **Resolution of the Scanning Tunnel Microscope**, *Surface Science* **143**, Nos. 2/3, L411-L416 (1984).

R. H. Swendsen (RES Zurich, Switzerland), **Monte Carlo calculation of renormalized coupling parameters. I. $d = 2$ Ising model**, *Physical Review B* **30**, No. 7, 3866-3874 (1984).

T

A. C. Tam (RES San Jose, CA), **Pulsed-laser generation of ultrashort acoustic pulses: Application for thin-film ultrasonic measurements**, *Applied Physics Letters* **45**, No. 5, 510-512 (1984).

R. Tatchyn, I. Lindau (Stanford University, CA), E. Källne (JET Joint Undertaking, Abingdon, England), and E. Spiller (RES Yorktown Hts., NY), **Derivation of the Optical Constants of Gold from Transmission Diffraction Measurements in the 280-640-eV Range**, *Physical Review Letters* **53**, No. 13, 1264-1267 (1984).

M. L. Tavera, M. Alfonseca, and J. Rojas (IBM Spain, Madrid Scientific Center), **An APL system for the IBM Personal Computer**, *IBM Systems Journal* **24**, No. 1, 61-70 (1985).

D.-W. Tcha (Korea Advanced Institute of Science & Technology, Seoul) and B.-I. Lee (RES Yorktown Hts., NY), **A Branch-and-Bound Algorithm for the Multi-Level Uncapacitated Facility Location Problem**, *European Journal of Operational Research* **18**, No. 1, 35-43 (1984).

K. Terakura, T. Oguchi (University of Tokyo, Japan), A. R. Williams (RES Yorktown Hts., NY), and J. Kübler (Institut für Festkörperphysik, Darmstadt, Federal Republic of Germany), **Band theory of insulating transition-metal monoxides: Band-structure calculations**, *Physical Review B* **30**, No. 8, 4734-4747 (1984).

R. D. Traub (RES Yorktown Hts., NY), W. D. Knowles (Neurological Institute, New York), R. Miles, and R. K. S. Wong (University of Texas Medical Branch, Galveston), **Synchronized Afterdischarges in the Hippocampus: Simulation Studies of the Cellular Mechanism**, *Neuroscience* **12**, No. 4, 1191-1200 (1984).

U

C. P. Umbach, S. Washburn, R. B. Laibowitz, and R. A. Webb (RES Yorktown Hts., NY), **Magnetoresistance of small, quasi-one-dimensional, normal-metal rings and lines**, *Physical Review B* **30**, No. 7, 4048-4051 (1984).

V

M. Vacatello and P. J. Flory (RES San Jose, CA), **Helical conformations of isotactic poly(methyl methacrylate). Energies computed with bond angle relaxation**, *Polymer Communications* **25**, No. 9, 258-259 (1984).

W

W. I. Wang, E. E. Mendez, and F. Stern (RES Yorktown Hts., NY), **High mobility hole gas and valence-band offset in modulation-doped p-AlGaAs/GaAs heterojunctions**, *Applied Physics Letters* **45**, No. 6, 639-641 (1984).
