

Errata

In "Coherent and Sequential Tunneling in Series Barriers" by M. Büttiker, *IBM Journal of Research and Development* **32**, No. 1, January 1988, pp. 63–75, the unit of conductance is erroneous in the abstract and in Equations (A13), (A15), (A16), and (C6). The correct value (per spin channel) is e^2/h . Figure 2(a) is labeled incorrectly; the unit of resistance is h/e^2 . The received date is incorrect; the paper was submitted on July 8, 1987.

In "Diffusion from an Entrance to an Exit" by Michael E. Fisher, *IBM Journal of Research and Development* **32**, No. 1, January 1988, pp. 76–81, the words "one half" have been omitted on page 79. The sentences before Equation (42) should read "All such walks were at $x = L - 1$ on their $(n - 1)$ th step and one half of these walks then exited. Hence we have. . . ."
