

Subject index for papers in Volume 45

Each index entry below is accompanied by an author's name and a page number; the author index contains the title of the paper and the names of coauthors, if any.

Subject	Author	Page			
<i>Algorithms</i>					
Algorithms and data structures for compressed-memory machines	Franaszek	245			
Proactive management of software aging	Castelli	311			
<i>Biology and biomedical studies</i>					
A hierarchical, building-block-based computational scheme for protein structure prediction	Tsai	513	DELPHI: A pattern-based method for detecting sequence similarity	Floratos	455
Brute force estimation of the number of human genes using EST clustering as a measure	Davison	439	Determination of optimal Chebyshev-expanded hydrophobic discrimination function for globular proteins	Fain	525
DELPHI: A pattern-based method for detecting sequence similarity	Floratos	455	DFT-based molecular dynamics as a new tool for computational biology: First applications and perspective	Andreoni	397
Determination of optimal Chebyshev-expanded hydrophobic discrimination function for globular proteins	Fain	525	Evaluating protein structure-prediction schemes using energy landscape theory	Eastwood	475
DFT-based molecular dynamics as a new tool for computational biology: First applications and perspective	Andreoni	397	Hidden Markov models in biological sequence analysis	Birney	449
Evaluating protein structure-prediction schemes using energy landscape theory	Eastwood	475	Interfacing molecular dynamics with continuum dynamics in computer simulation: Toward an application to biological membranes	Ayton	417
Hidden Markov models in biological sequence analysis	Birney	449	Model studies of the structures, reactivities, and reaction mechanisms of metalloenzymes	Morokuma	367
Protein flexibility and electrostatic interactions	Kumar	499	Multiobjective optimization of combinatorial libraries	Agrafiotis	545
<i>Biotechnology</i>					
A hierarchical, building-block-based computational scheme for protein structure prediction	Tsai	513	Protein flexibility and electrostatic interactions	Kumar	499
Brute force estimation of the number of human genes using EST clustering as a measure	Davison	439	QSAR in grossly underdetermined systems: Opportunities and issues	Platt	533
			Quantum crystallography, a developing area of computational chemistry extending to macromolecules	Huang	409
			The adaptive multilevel finite element solution of the Poisson-Boltzmann equation on massively parallel computers	Baker	427
			<i>Chemical analysis</i>		
			Chemical and physical aspects of the post-exposure baking process used for positive-tone chemically amplified resists	Hinsberg	667
			Dissolution behavior of chemically amplified resist polymers for 248-, 193-, and 157-nm lithography	Ito	683

Printing meets lithography: Soft approaches to high-resolution patterning	Michel	697	Memory Expansion Technology (MXT): Software support and performance	Abali	287
Recent progress in electron-beam resists for advanced mask-making	Medeiros	639	<i>Computer organization and design</i>		
Review of technology for 157-nm lithography	Bates	605	Adaptive Fast Path Architecture	Hu	191
<i>Chemical reaction modeling</i>			Analytical analysis of finite cache penalty and cycles per instruction of a multiprocessor memory hierarchy using miss rates and queuing theory	Matick	819
DFT-based molecular dynamics as a new tool for computational biology: First applications and perspective	Andreoni	397	Experience with building a commodity Intel-based ccNUMA system	Brock	207
Model studies of the structures, reactivities, and reaction mechanisms of metalloenzymes	Morokuma	367	High-throughput coherence control and hardware messaging in Everest	Nanda	229
<i>Chemistry and chemical engineering</i>			IBM Memory Expansion Technology (MXT)	Tremaine	271
Colloidal synthesis of nanocrystals and nanocrystal superlattices	Murray	47	Memory Expansion Technology (MXT): Software support and performance	Abali	287
Conducting polymers in microelectronics	Angelopoulos	57	On internal organization in compressed random-access memories	Franaszek	259
Organic electronics: Introduction	Shaw	3	<i>Crystallography</i>		
Organic-inorganic electronics	Mitzi	29	Quantum crystallography, a developing area of computational chemistry extending to macromolecules	Huang	409
Recent progress in electron-beam resists for advanced mask-making	Medeiros	639	<i>Crystals</i>		
<i>Codes and coding</i>			Organic-inorganic electronics	Mitzi	29
Embedding a secondary communication channel transparently within a cyclic redundancy check (CRC)	Irvin	789	<i>Data compression</i>		
<i>Coding theory</i>			Algorithms and data structures for compressed-memory machines	Franaszek	245
Embedding a secondary communication channel transparently within a cyclic redundancy check (CRC)	Irvin	789	IBM Memory Expansion Technology (MXT)	Tremaine	271
<i>Combinatorial problems</i>			Memory Expansion Technology (MXT): Software support and performance	Abali	287
Multiobjective optimization of combinatorial libraries	Agrafiotis	545	On internal organization in compressed random-access memories	Franaszek	259
<i>Communication theory</i>			<i>Data transmission</i>		
Embedding a secondary communication channel transparently within a cyclic redundancy check (CRC)	Irvin	789	Embedding a secondary communication channel transparently within a cyclic redundancy check (CRC)	Irvin	789
<i>Communications and communication networks</i>			<i>Data, structures and accessing</i>		
Embedding a secondary communication channel transparently within a cyclic redundancy check (CRC)	Irvin	789	Adaptive Fast Path Architecture	Hu	191
<i>Computation</i>			Algorithms and data structures for compressed-memory machines	Franaszek	245
Determination of fractal dimensions from equivalent L systems	Alfonseca	797	IBM Memory Expansion Technology (MXT)	Tremaine	271
<i>Computational methods</i>			Memory Expansion Technology (MXT): Software support and performance	Abali	287
Computer simulations for organic light-emitting diodes	Curioni	101	On internal organization in compressed random-access memories	Franaszek	259
<i>Computer architecture</i>			<i>Diodes, light-emitting (LEDs)</i>		
Adaptive Fast Path Architecture	Hu	191	Organic-inorganic electronics	Mitzi	29
Experience with building a commodity Intel-based ccNUMA system	Brock	207	<i>Diodes, organic light-emitting (OLEDs)</i>		
High-throughput coherence control and hardware messaging in Everest	Nanda	229	Computer simulations for organic light-emitting diodes	Curioni	101
IBM Memory Expansion Technology (MXT)	Tremaine	271	Influence of trapped and interfacial charges in organic multilayer light-emitting devices	Riess	77

Microdisplays based upon organic light-emitting diodes	Howard	115	<i>IBM AS/400</i>		
Organic electronics: Introduction	Shaw	3	Uninterruptible battery backup for IBM AS/400 systems	Steele	763
STM-excited electroluminescence and spectroscopy on organic materials for display applications	Alvarado	89	<i>Interfaces</i>		
<i>Display technology</i>			Influence of trapped and interfacial charges in organic multilayer light-emitting devices	Riess	77
Colloidal synthesis of nanocrystals and nanocrystal superlattices	Murray	47	<i>Lithography</i>		
Microdisplays based upon organic light-emitting diodes	Howard	115	Chemical and physical aspects of the post-exposure baking process used for positive-tone chemically amplified resists	Hinsberg	667
<i>Distributed processing</i>			Conducting polymers in microelectronics	Angelopoulos	57
High-throughput coherence control and hardware messaging in Everest	Nanda	229	Dissolution behavior of chemically amplified resist polymers for 248-, 193-, and 157-nm lithography	Ito	683
<i>Drug design</i>			Printing meets lithography: Soft approaches to high-resolution patterning	Michel	697
Multiobjective optimization of combinatorial libraries	Agrafiotis	545	Review of technology for 157-nm lithography	Bates	605
QSAR in grossly underdetermined systems: Opportunities and issues	Platt	533	TCAD development for lithography resolution enhancement	Liebmann	651
<i>Electrical conduction</i>			<i>Lithography, electron-beam</i>		
Organic thin-film transistors: A review of recent advances	Dimitrakopoulos	11	PREVAIL—Electron projection technology approach for next-generation lithography	Dhaliwal	615
<i>Electro-optics</i>			Recent progress in electron-beam resists for advanced mask-making	Medeiros	639
PREVAIL—Electron projection technology approach for next-generation lithography	Dhaliwal	615	<i>Magnetics—studies and structures</i>		
<i>Electroluminescence</i>			Colloidal synthesis of nanocrystals and nanocrystal superlattices	Murray	47
Influence of trapped and interfacial charges in organic multilayer light-emitting devices	Riess	77	<i>Manufacturing</i>		
Microdisplays based upon organic light-emitting diodes	Howard	115	Modular server frame with robust earthquake retention	Notohardjono	771
STM-excited electroluminescence and spectroscopy on organic materials for display applications	Alvarado	89	<i>Masks</i>		
<i>Etching</i>			Recent progress in electron-beam resists for advanced mask-making	Medeiros	639
Recent progress in electron-beam resists for advanced mask-making	Medeiros	639	Review of technology for 157-nm lithography	Bates	605
<i>Field-effect transistors</i>			TCAD development for lithography resolution enhancement	Liebmann	651
Organic-inorganic electronics	Mitzi	29	<i>Materials</i>		
<i>Films, polymer</i>			Strain measurement and numerical analysis of an epoxy adhesive subjected to thermal loads	Kuczynski	783
Conducting polymers in microelectronics	Angelopoulos	57	<i>Mathematics (applied)</i>		
<i>Finite element analysis</i>			Determination of fractal dimensions from equivalent L systems	Alfonseca	797
Modular server frame with robust earthquake retention	Notohardjono	771	Determination of optimal Chebyshev-expanded hydrophobic discrimination function for globular proteins	Fain	525
Strain measurement and numerical analysis of an epoxy adhesive subjected to thermal loads	Kuczynski	783	QSAR in grossly underdetermined systems: Opportunities and issues	Platt	533
<i>Fractals</i>			<i>Measurement</i>		
Determination of fractal dimensions from equivalent L systems	Alfonseca	797	Influence of trapped and interfacial charges in organic multilayer light-emitting devices	Riess	77
<i>Genomic and proteomic analysis</i>			Strain measurement and numerical analysis of an epoxy adhesive subjected to thermal loads	Kuczynski	783
Brute force estimation of the number of human genes using EST clustering as a measure	Davison	439			
DELPHI: A pattern-based method for detecting sequence similarity	Floratos	455			
Hidden Markov models in biological sequence analysis	Birney	449			
<i>Graphics</i>					
Determination of fractal dimensions from equivalent L systems	Alfonseca	797			

<i>Mechanical analysis</i>			<i>Nanoscale structures and devices</i>		
Strain measurement and numerical analysis of an epoxy adhesive subjected to thermal loads	Kuczynski	783	Colloidal synthesis of nanocrystals and nanocrystal superlattices	Murray	47
<i>Mechanical design</i>			<i>NUMA systems</i>		
Modular server frame with robust earthquake retention	Notohardjono	771	Experience with building a commodity Intel-based ccNUMA system	Brock	207
<i>Memory (computer) management</i>			<i>Optical science and technology</i>		
Algorithms and data structures for compressed-memory machines	Franaszek	245	Influence of trapped and interfacial charges in organic multilayer light-emitting devices	Riess	77
Experience with building a commodity Intel-based ccNUMA system	Brock	207	STM-excited electroluminescence and spectroscopy on organic materials for display applications	Alvarado	89
High-throughput coherence control and hardware messaging in Everest	Nanda	229	<i>Optics</i>		
IBM Memory Expansion Technology (MXT)	Tremaine	271	Microdisplays based upon organic light-emitting diodes	Howard	115
Memory Expansion Technology (MXT): Competitive impact	Smith	303	<i>Organic electronics</i>		
Memory Expansion Technology (MXT): Software support and performance	Abali	287	Colloidal synthesis of nanocrystals and nanocrystal superlattices	Murray	47
On internal organization in compressed random-access memories	Franaszek	259	Computer simulations for organic light-emitting diodes	Curioni	101
<i>Memory, cache</i>			Conducting polymers in microelectronics	Angelopoulos	57
Adaptive Fast Path Architecture	Hu	191	Influence of trapped and interfacial charges in organic multilayer light-emitting devices	Riess	77
IBM Memory Expansion Technology (MXT)	Tremaine	271	Microdisplays based upon organic light-emitting diodes	Howard	115
<i>Microelectromechanical systems (MEMS)</i>			Organic electronics: Introduction	Shaw	3
Conducting polymers in microelectronics	Angelopoulos	57	Organic thin-film transistors: A review of recent advances	Dimitrakopoulos	11
<i>Models and modeling</i>			Organic-inorganic electronics	Mitzi	29
Computer simulations for organic light-emitting diodes	Curioni	101	STM-excited electroluminescence and spectroscopy on organic materials for display applications	Alvarado	89
Proactive management of software aging	Castelli	311	<i>Organic materials</i>		
<i>Molecular structure modeling</i>			STM-excited electroluminescence and spectroscopy on organic materials for display applications	Alvarado	89
DFT-based molecular dynamics as a new tool for computational biology: First applications and perspective	Andreoni	397	<i>Organic-inorganic hybrids</i>		
Interfacing molecular dynamics with continuum dynamics in computer simulation: Toward an application to biological membranes	Ayton	417	Colloidal synthesis of nanocrystals and nanocrystal superlattices	Murray	47
Model studies of the structures, reactivities, and reaction mechanisms of metalloenzymes	Morokuma	367	Organic electronics: Introduction	Shaw	3
Quantum crystallography, a developing area of computational chemistry extending to macromolecules	Huang	409	Organic-inorganic electronics	Mitzi	29
The adaptive multilevel finite element solution of the Poisson-Boltzmann equation on massively parallel computers	Baker	427	<i>Packaging</i>		
<i>Multilayers</i>			Strain measurement and numerical analysis of an epoxy adhesive subjected to thermal loads	Kuczynski	783
Influence of trapped and interfacial charges in organic multilayer light-emitting devices	Riess	77	<i>Parallel processing</i>		
Organic-inorganic electronics	Mitzi	29	The adaptive multilevel finite element solution of the Poisson-Boltzmann equation on massively parallel computers	Baker	427
<i>Multiprocessors</i>			<i>Performance analysis</i>		
Experience with building a commodity Intel-based ccNUMA system	Brock	207	Analytical analysis of finite cache penalty and cycles per instruction of a multiprocessor memory hierarchy using miss rates and queuing theory	Matick	819
			Experience with building a commodity Intel-based ccNUMA system	Brock	207
			High-throughput coherence control and hardware messaging in Everest	Nanda	229

Memory Expansion Technology (MXT): Competitive impact	Smith	303	Evaluating protein structure-prediction schemes using energy landscape theory	Eastwood	475
Memory Expansion Technology (MXT): Software support and performance	Abali	287	Protein flexibility and electrostatic interactions	Kumar	499
On internal organization in compressed random-access memories	Franaszek	259	<i>Quantum computation</i> Logical reversibility	Zuliani	807
Proactive management of software aging	Castelli	311	<i>Reliability</i> Uninterruptible battery backup for IBM AS/400 systems	Steele	763
<i>Photoresists</i> Chemical and physical aspects of the post-exposure baking process used for positive-tone chemically amplified resists	Hinsberg	667	<i>Scanning tunneling microscopy</i> STM-excited electroluminescence and spectroscopy on organic materials for display applications	Alvarado	89
Dissolution behavior of chemically amplified resist polymers for 248-, 193-, and 157-nm lithography	Ito	683	<i>Semiconductors</i> Colloidal synthesis of nanocrystals and nanocrystal superlattices	Murray	47
Recent progress in electron-beam resists for advanced mask-making	Medeiros	639	Organic thin-film transistors: A review of recent advances	Dimitrakopoulos	11
Review of technology for 157-nm lithography	Bates	605	<i>Semiconductors, organic</i> Organic electronics: Introduction	Shaw	3
<i>Physical chemistry</i> Chemical and physical aspects of the post-exposure baking process used for positive-tone chemically amplified resists	Hinsberg	667	Organic thin-film transistors: A review of recent advances	Dimitrakopoulos	11
Computer simulations for organic light-emitting diodes	Curioni	101	<i>Servers</i> Adaptive Fast Path Architecture	Hu	191
Dissolution behavior of chemically amplified resist polymers for 248-, 193-, and 157-nm lithography	Ito	683	Algorithms and data structures for compressed-memory machines	Franaszek	245
STM-excited electroluminescence and spectroscopy on organic materials for display applications	Alvarado	89	Experience with building a commodity Intel-based ccNUMA system	Brock	207
<i>Physics, solid state</i> Influence of trapped and interfacial charges in organic multilayer light-emitting devices	Riess	77	High-throughput coherence control and hardware messaging in Everest	Nanda	229
Organic thin-film transistors: A review of recent advances	Dimitrakopoulos	11	IBM Memory Expansion Technology (MXT)	Tremaine	271
STM-excited electroluminescence and spectroscopy on organic materials for display applications	Alvarado	89	Memory Expansion Technology (MXT): Competitive impact	Smith	303
<i>Polymers</i> Organic electronics: Introduction	Shaw	3	Memory Expansion Technology (MXT): Software support and performance	Abali	287
<i>Power supplies</i> Uninterruptible battery backup for IBM AS/400 systems	Steele	763	On internal organization in compressed random-access memories	Franaszek	259
<i>Printing technology</i> Printing meets lithography: Soft approaches to high-resolution patterning	Michel	697	Proactive management of software aging	Castelli	311
<i>Programming, programs, and programming languages</i> Logical reversibility	Zuliani	807	<i>Simulation</i> Computer simulations for organic light-emitting diodes	Curioni	101
<i>Protein folding</i> A hierarchical, building-block-based computational scheme for protein structure prediction	Tsai	513	Interfacing molecular dynamics with continuum dynamics in computer simulation: Toward an application to biological membranes	Ayton	417
Determination of optimal Chebyshev-expanded hydrophobic discrimination function for globular proteins	Fain	525	<i>Software reliability</i> Proactive management of software aging	Castelli	311
			<i>Superlattices</i> Colloidal synthesis of nanocrystals and nanocrystal superlattices	Murray	47
			<i>Topology</i> Determination of fractal dimensions from equivalent L systems	Alfonseca	797
			<i>Transistors</i> Organic thin-film transistors: A review of recent advances	Dimitrakopoulos	11
			Organic-inorganic electronics	Mitzi	29

Transistors, organic thin film (OTFTs)

Organic thin-film transistors:

A review of recent advances

Dimitrakopoulos 11

Vibration

Modular server frame with robust
earthquake retention
