

Volume 8 1969

Number One

Hierarchical structure for data management <i>W. R. Henry</i>	2
GPSS/360—an improved general purpose simulator <i>R. L. Gould</i>	16
A teleprocessing approach using standard equipment <i>R. D. Wade, G. P. Cawsey, and R. A. K. Veber</i>	28
Coding for error control <i>D. T. Tang and R. T. Chien</i>	48

Number Two

Some principles of time-sharing scheduler strategies <i>H. Hellerman</i>	94
An auxiliary processing system for array calculations <i>J. F. Ruggiero and D. A. Coryell</i>	118
A pseudo-random number generator for the System/360 <i>P. A. W. Lewis, A. S. Goodman, and J. M. Miller</i>	136
A network algorithm for empty freight car allocation <i>W. W. White and A. M. Bomberault</i>	147

Number Three

A three-value computer design verification system <i>J. S. Jephson, R. P. McQuarrie, and R. E. Vogelsberg</i>	178
Internal sorting with minimal comparing <i>L. J. Woodrum</i>	189
Problem formulation using APL <i>H. G. Kolsky</i>	204
Determining economic sampling plans <i>E. W. Stacy, L. E. Hunsinger, and J. F. Price</i>	220

Number Four

A perspective on system performance evaluation <i>M. E. Drummond, Jr.</i>	252
Simulating operating systems <i>P. H. Seaman and R. C. Soucy</i>	264
Trace-driven system modeling <i>P. S. Cheng</i>	280
Using system monitor output to improve performance <i>A. J. Bonner</i>	290
Measurement of system operational statistics <i>W. I. Stanley</i>	299
A synthetic job for measuring system performance <i>W. Buchholz</i>	309
Effects of storage contention on system performance <i>C. E. Skinner and J. R. Asher</i>	319
