

Volume 11 1972

Number One

Evaluation of an interactive-batch system network <i>W. S. Hobgood</i>	2
Readings in microprogramming <i>P. M. Davies</i>	16
System aspects of large-problem computation and display <i>J. E. Fromm and D. E. Schreiber</i>	41
Chief programmer team management of production programming <i>F. T. Baker</i>	56
Accounting control of data processing <i>R. C. Rettus and R. A. Smith</i>	74

Number Two

Virtual storage and virtual machine concepts <i>R. P. Parmelee, T. I. Peterson, C. C. Tillman, and D. J. Hatfield</i>	99
Virtual machine computing in an engineering environment <i>M. McGrath</i>	131
Numerical control for machining complex surfaces <i>D. B. Almond</i>	150
A general management business simulation in APL <i>P. N. Wahi</i>	169

Number Three

Channel and direct access device architecture <i>D. T. Brown, R. L. Eibsen, and C. A. Thorn</i>	186
Uses of virtual storage systems in a scientific environment <i>P. H. Callaway, J. P. Considine, and C. H. Thompson</i>	200
Cost-benefit evaluation of scientific computing services <i>D. N. Streeter</i>	219
A guide to programming tools and techniques <i>J. W. Pomeroy</i>	234
Queuing simulation using a random number generator <i>R. N. Rechtschaffen</i>	255

Number Four

Encoding verbal information as unique numbers <i>W. D. Hagamen, D. J. Linden, H. S. Long, and J. C. Weber</i>	278
Techniques for developing analytic models <i>A. L. Anthony and H. K. Watson</i>	316
Design features of a real-time check-clearing system <i>J. A. Banham and P. McClelland</i>	329
