

Five-year subject index

APPLICATIONS

Algorithm for empty freight car allocation
Determining economic sampling plans
Trajectory control programs
Real-time Stenotype transcription
Interactive flight program simulator
Interactive aeronautical charting
Interactive scheduling system
A computer graphics system
Real-time traffic flow optimization
Programming for economic lot-sizes
Large-scale interactive administrative system
Interactive-batch network evaluation
Large-problem computation and display
Chief programmer team
Virtual machine computing in engineering
Numerical control for complex surfaces
Management business simulation in APL
Virtual storage in a scientific environment
Encoding verbal information
A real-time check-clearing system
Net change material requirements planning
Concepts of financial models
Financial planning tools and techniques
Planning-data systems
Financial modeling on small systems
Interactive simulation for banking
Forecasting techniques
Interactive graphics system for business decisions

White, 8, 2, 147
Stacy, 8, 3, 220
Quarles, 9, 1, 12
Newitt, 9, 1, 24
Jacobs, 9, 2, 145
Leutje, 9, 3, 219
Brewer, 10, 1, 62
Belady, 10, 2, 143
Black, 10, 3, 217
Gorenstein, 10, 3, 232
Wimbrow, 10, 4, 260
Hobgood, 11, 1, 2
Fromm, 11, 1, 41
Baker, 11, 1, 56
McGrath, 11, 2, 131
Almond, 11, 2, 150
Wahi, 11, 2, 169
Callaway, 11, 3, 200
Hagamen, 11, 4, 278
Banham, 11, 4, 329
Orlicky, 12, 1, 2
Kingston, 12, 2, 113
Dzielinski, 12, 2, 126
Lande, 12, 2, 145
Gordon, 12, 2, 161
Brown, 12, 2, 172
Aiso, 12, 2, 187
Ravin, 12, 3, 238

COMPILERS

Code-generation for large-language compilers
Compiler assignment of data items to registers
Design of a checkout compiler

Elson, 9, 3, 167
Day, 9, 4, 281
Marks, 12, 3, 315

COMPUTER SYSTEMS

Auxiliary processing system for array calculations
Readings in microprogramming
Virtual storage and machine concepts
Channel and direct access architecture
Structure of virtual storage operating systems
Influences of dynamic address translation
OS/VS2-2 concepts and philosophies
DOS/VS architecture and design

Ruggiero, 8, 2, 118
Davies, 11, 1, 16
Parmelee, 11, 2, 99
Brown, 11, 3, 186

Auslander, 12, 4, 368
Scherr, 12, 4, 382
Birch, 12, 4, 401

DATA REPRESENTATION

Hierarchical structure for data management
Real-time Stenotype transcription
A computer graphics system
Encoding verbal information
Data structures and accessing in data-base systems
Describing data in computer networks

Henry, 8, 1, 2
Newitt, 9, 1, 24
Belady, 10, 2, 143
Hagamen, 11, 4, 278
Senko, 12, 1, 30
Fredericksen, 12, 3, 257

FILE ORGANIZATION

Evaluation techniques for storage hierarchies
Authorization in shared files
Large-problem computation and display
Data structures and accessing in data-base systems
Describing data in computer networks
Data dictionary/directories
Indexing design considerations

Mattson, 9, 2, 78
Friedman, 9, 4, 258
Fromm, 11, 1, 41
Senko, 12, 1, 30
Fredericksen, 12, 3, 257
Uhrowczik, 12, 4, 332
Wagner, 12, 4, 351

GRAPHICS

- Interactive flight program simulator
 - Interactive aeronautical charting
 - A computer graphics system
 - Large-problem computation and display
 - Virtual machine computing in engineering
 - Numerical control for complex surfaces
 - Interactive graphics system for business decisions
- Jacobs, 9, 2, 145
Luetje, 9, 3, 219
Belady, 10, 2, 143
Fromm, 11, 1, 41
McGrath, 11, 2, 131
Almond, 11, 2, 150
Ravin, 12, 3, 238

INFORMATION SYSTEMS

- Interactive scheduling system
 - Large-scale interactive administrative system
 - Net change material requirements planning
- Brewer, 10, 1, 62
Wimbrow, 10, 4, 260
Orlicky, 12, 1, 2

LANGUAGES

- Problem formulation using APL
 - Code-generation for large-language compilers
 - Automatic generation of test cases
 - Formal description of programming languages
- Kolsky, 8, 3, 204
Elson, 9, 3, 167
Hanford, 9, 4, 242
Neuhold, 10, 2, 86

MANAGEMENT METHODS

- Modeling for computer center planning
 - Chief programmer team
 - Accounting control of data processing
 - Management business simulation in APL
 - Scientific computing service evaluation
 - Net change material requirements planning
 - Concepts of financial models
 - Financial planning tools and techniques
 - Planning-data systems
 - Financial modeling on small systems
 - Interactive simulation for banking
 - Forecasting techniques
 - Interactive graphics system for business decisions
 - Centralization or dispersion of computing facilities
- Hanssmann, 10, 4, 305
Baker, 11, 1, 56
Rettus, 11, 1, 74
Wahi, 11, 2, 169
Streeter, 11, 3, 219
Orlicky, 12, 1, 2
Kingston, 12, 2, 113
Dzielinski, 12, 2, 126
Lande, 12, 2, 145
Gordon, 12, 2, 161
Brown, 12, 2, 172
Aiso, 12, 2, 187
Ravin, 12, 3, 238
Streeter, 12, 3, 283

MATHEMATICAL METHODS

- Coding for error control
 - Pseudo-random number generator for System/360
 - Internal sorting with minimal comparing
 - Determining economic sampling plans
 - A model of floating buffering
 - Compiler assignment of data items to registers
 - Application of formal logic
 - FORTTRAN extended-precision library
 - Programming for economic lot-sizes
 - Analysis of free-storage algorithms
 - Large-problem computation and display
 - Numerical control for complex surfaces
 - Using a random number generator
 - Forecasting techniques
- Tang, 8, 2, 48
Lewis, 8, 2, 136
Woodrum, 8, 3, 189
Stacy, 8, 3, 220
Woodrum, 9, 2, 118
Day, 9, 4, 281
Allen, 10, 1, 2
Kuki, 10, 1, 39
Gorenstein, 10, 3, 232
Margolin, 10, 4, 283
Fromm, 11, 1, 41
Almond, 11, 2, 150
Rechtschaffen, 11, 3, 255
Aiso, 12, 2, 187

MICROPROGRAMMING

- Readings in microprogramming
- Davies, 11, 1, 16

NETWORKS

- Interactive-batch network evaluation
 - Protocol for a computer network
- Hobgood, 11, 1, 2
McKay, 12, 1, 94

Describing data in computer networks
Centralization or dispersion of computing facilities

Fredericksen, 12, 3, 257
Streeter, 12, 3, 283

OPERATING SYSTEMS

Auxiliary processing system for array calculations
On-line inquiry under small operating system
A heuristic approach to task dispatching
A virtual machine time-sharing system
Interactive-batch network evaluation
Structure of virtual storage operating systems
Influences of dynamic address translation
OS/VS2-2 concepts and philosophies
DOS/VS architecture and design

Ruggiero, 8, 2, 118
Darga, 9, 1, 2
Ryder, 9, 3, 189
Meyer, 9, 3, 199
Hobgood, 11, 1, 2

Auslander, 12, 4, 368
Scherr, 12, 4, 382
Birch, 12, 4, 401

PERFORMANCE EVALUATION

Three-value design verification system
A perspective on system evaluation
Simulating operating systems
Trace-driven modeling
Using monitor output
Measurement of operational statistics
A synthetic job for measuring system performance
Effects of storage contention
Time-sharing performance criteria and measurement
Scientific computing service evaluation
Queuing using a random number generator
User program performance in virtual storage
Experimental evaluation of system performance

Jephson, 8, 3, 178
Drummond, 8, 4, 252
Seaman, 8, 4, 264
Cheng, 8, 4, 280
Bonner, 8, 4, 290
Stanley, 8, 4, 299
Buchholz, 8, 4, 309
Skinner, 8, 4, 319
Bard, 10, 3, 193
Streeter, 11, 3, 219
Rechtschaffen, 11, 3, 255
Morrison, 12, 3, 216
Bard, 12, 3, 302

PROGRAMMING DOCUMENTATION AND TECHNIQUES

Coding for error control
Automatic generation of test cases
Formal description of programming languages
A guide to programming tools and techniques
User program performance in virtual storage

Tang, 8, 1, 48
Hanford, 9, 4, 242
Neuhold, 10, 2, 86
Pomeroy, 11, 3, 234
Morrison, 12, 3, 216

QUEUEING

Single-server queueing in computing systems
Analysis of the machine interference model
Queueing using a random number generator

Chang, 9, 1, 36
Ferdinand, 10, 2, 129
Rechtschaffen, 11, 3, 255

REAL-TIME SYSTEMS

Time-sharing scheduler strategies
Trajectory control programs
Time-sharing performance criteria and measurement
Real-time traffic flow optimization
Large-scale interactive administrative system
A real-time check-clearing system
Experimental evaluation of system performance

Hellerman, 8, 2, 94
Quarles, 9, 1, 12
Bard, 10, 3, 193
Black, 10, 3, 217
Wimbrow, 10, 4, 260
Banham, 11, 4, 329
Bard, 12, 3, 302

SIMULATION

GPSS/360—Improved general purpose simulator
Three-value design verification system
Simulating operating systems
Trace-driven system modeling
Interactive flight program simulator
Model of paging system performance
Modeling for computer center planning

Gould, 8, 1, 16
Jephson, 8, 3, 178
Seaman, 8, 4, 264
Cheng, 8, 4, 280
Jacobs, 9, 2, 145
Shedler, 10, 2, 113
Hanssmann, 10, 4, 305

Management business simulation in APL
 Channel and direct access architecture
 Queuing using a random number generator
 Techniques for developing analytic models
 Concepts of financial models
 Financial modeling on small systems
 Interactive simulation for banking
 Forecasting techniques

Wahi, 11, 2, 169
 Brown, 11, 3, 186
 Rechtschaffen, 11, 3, 255
 Anthony, 11, 4, 316
 Kingston, 12, 2, 113
 Gordon, 12, 2, 161
 Brown, 12, 2, 172
 Aiso, 12, 2, 187

SORTING AND MERGING

Internal sorting with minimal comparing
 A model of floating buffering
 Guided bibliography to sorting

Woodrum, 8, 3, 189
 Woodrum, 9, 2, 118
 Lorin, 10, 3, 244

STORAGE SYSTEMS

Time-sharing scheduler strategies
 Evaluation techniques for storage hierarchies
 A virtual machine time-sharing system
 Model of paging system performance
 Program restructuring for virtual memory
 Analysis of free-storage algorithms
 Virtual storage and machine concepts
 Virtual storage in a scientific environment
 Structure of virtual storage operating systems
 Influences of dynamic address translation
 OS/VS2-2 concepts and philosophies
 DOS/VS architecture and design

Hellerman, 8, 2, 94
 Mattson, 9, 2, 78
 Meyer, 9, 3, 199
 Shedler, 10, 2, 113
 Hatfield, 10, 3, 168
 Margolin, 10, 4, 283
 Parmelee, 11, 2, 99
 Calloway, 11, 3, 200

Auslander, 12, 4, 368
 Scherr, 12, 382
 Birch, 12, 4, 401

TELEPROCESSING

Teleprocessing using standard equipment
 Protocol for a computer network
 Describing data in computer networks
 Centralization or dispersion of computing facilities

Wade, 8, 1, 23
 McKay, 12, 1, 94
 Fredericksen, 12, 3, 257
 Streeter, 12, 3, 283
