

Subject index

1975-1984

The following index includes the subjects of all papers that have been published in the *IBM Systems Journal* since 1974. Order numbers for reprints of individual papers are included in the main entry for each paper.

Indexes for 1970 through 1974 appeared in Volume 13, Number 4 (1974), and indexes for 1962 through 1969 appeared in Volume 8, Number 4 (1969). Issues and reprints of papers covered by these previously published indexes are not available from IBM.

APPLICATION DEVELOPMENT

A program generator
Hagamen, 14, 2, 102

User controlled DB/DC system
Heyne, 16, 4, 344

The management of software engineering

I Principles of software engineering
Mills, 19, 4, 414

II Software engineering program
O'Neill, 19, 4, 421

III Software design practices
Linger, 19, 4, 432

IV Software development practices
Dyer, 19, 4, 451

V Software engineering management practices
Quinnan, 19, 4, 466

Application development system: Patient Care System
Mishevich, 19, 4, 478

The Modular Application Customizing System
Gordon, 19, 4, 521

System Productivity Facility
Joslin, 20, 4, 388

Strategies for information requirements determination
Davis, 21, 1, 4

Business Systems Planning and Business Information Control
Study: A comparison
Zachman, 21, 1, 31

Towards an integrated development environment
Newman, 21, 1, 81

How data flow can improve application development
Stevens, 21, 2, 162

Technique for assessing external design of software
Pearsall, 21, 2, 211

A perspective on communications and computing
Scherr, 22, 1/2, 5

NIL: A high-level language for distributed systems programming
Parr, 22, 1/2, 111

Abstract design and program translator: New tools for software design
Archibald, 22, 3, 170

The system architecture of EAS-E: An integrated programming and data design language
Pazel, 22, 3, 188

A simple architecture for consistent application program design
Rogers, 22, 3, 199

The Projected Automated Librarian
Prager, 22, 3, 214

Automatic generation of random self-checking test cases
Bird, 22, 3, 229

Full-screen testing of interactive applications
Maurer, 22, 3, 246

Software reliability analysis
Misra, 22, 3, 262

Design and use of a program execution analyzer
Power, 22, 3, 271

Architecture prototyping in the software engineering environment
Beregi, 23, 1, 4

Factors affecting programmer productivity during application development
Thadhani, 23, 1, 19

A comparative study of system response time on program developer productivity
Lambert, 23, 1, 36

An application analyzer
Ambrosetti, 23, 4, 336

APPLICATIONS

User-oriented data-base retrieval system

Jones, 16, 1, 4

Input-output econometric model

Sarma, 16, 4, 398

Solving the installation scheduling problem

Chen, 17, 1, 82

Experiments in computer-aided graphic expression

Musgrave, 17, 3, 241

Mass storage archiving

Gravina, 17, 4, 344

Software systems for physical planning

Smedley, 17, 4, 359

Computer-assisted office work

Gruhn, 18, 3, 432

Automatic programming for energy management

Shah, 18, 3, 457

Page makeup of text with graphics

Shepherd, 19, 3, 345

User-definable software applied to a real-time ambient air quality monitoring system

Halpern, 20, 1, 86

JANUS: An interactive document formatter based on declarative tags

Chamberlin, 21, 3, 250

The EPISTLE text-critiquing system

Heidorn, 21, 3, 305

OPAS: An office procedure automation system

Lum, 21, 3, 327

The design rationale of the System/38 user interface

Botterill, 21, 4, 384

How a computer should talk to people

Dean, 21, 4, 424

A Satellite Communications Controller

Fennel, 22, 1/2, 81

Series/1-based videoconferencing system

Anastassiou, 22, 1/2, 97

Speech filing—An office system for principals

Gould, 23, 1, 65

CAPACITY PLANNING

Performance model of MVS

Chiu, 17, 4, 444

Overview of the capacity planning process

Bronner, 19, 1, 4

Capacity planning methodology

Cooper, 19, 1, 28

System capacity and performance evaluation

Schiller, 19, 1, 46

Predicting performance of CICS/VS systems

Seaman, 19, 1, 68

Role of detailed simulation in capacity planning

Nguyen, 19, 1, 81

Processor, I/O path, and DASD configuration capacity

Major, 20, 1, 104

Capacity analysis of the Mass Storage System

Misra, 20, 3, 346

The VM/370 Resource Limiter

Chess, 20, 4, 424

Analytic queuing model for CICS capacity planning

Deitch, 21, 4, 454

COMMUNICATION SYSTEMS MANAGEMENT

Enhanced problem determination capability

Ford, 17, 3, 276

Centralized communications network management

Weingarten, 18, 4, 184

Sidestream approach for managing communication systems

Leach, 19, 1, 120

Systems management

Bird, 19, 1, 140

SNA flow control: Architecture and implementation

George, 21, 2, 179

The Document Interchange Architecture: A member of a family of architectures in the SNA environment

Schick, 21, 2, 220

A perspective on communications and computing

Scherr, 22, 1/2, 5

X.25 and related recommendations in IBM products

Deaton, 22, 1/2, 11

Teletex—A worldwide link among office systems for electronic document exchange

Moore, 22, 1/2, 30

A token-ring network for local data communications

Dixon, 22, 1/2, 47

Reflections on VM/Pass-Through: A facility for interactive networking

Mendelsohn, 22, 1/2, 63

Communications Network Management enhancements for SNA networks: An overview

Sullivan, 22, 1/2, 129

An application of network management at a large computing service

Garrigues, 22, 1/2, 143

Advanced program-to-program communication in SNA

Gray, 22, 4, 298

SNA Distribution Services

Housel, 22, 4, 319

Interconnecting SNA networks

Benjamin, 22, 4, 344

An experimental address space isolation technique for SNA networks

Ryder, 22, 4, 367

Logical problem determination for SNA networks

Weingarten, 22, 4, 387

Performance and availability measurement of the IBM Information Network

Bailey, 22, 4, 404

SNA routing: Past, present, and possible future

Jaffe, 22, 4, 417

Defining routing tables for SNA networks

Maruyama, 22, 4, 435

Windows in the sky—Flow control in SNA networks with satellite links

Grover, 22, 4, 451

TSO Attach: A multipurpose communication channel to IBM Database 2

Hammond, 23, 2, 151

COMPUTER SYSTEMS

Overview of Supermarket and Retail Store Systems

McEnroe, 14, 1, 3

Supermarket System performance studies

Metz, 14, 1, 46

Retail Store System design and performance

Berk, 14, 1, 64

Reliability, availability, and serviceability for store systems

Hippert, 14, 1, 81

The IBM 5100 and Research Device Coupler

Cole, 16, 1, 41

The Human Side of Computers

Branscomb, 20, 2, 120

A system for the automated office environment

Gardner, 20, 3, 321

The design rationale of the System/38 user interface

Botterill, 21, 4, 384

Series/1-based videoconferencing system

Anastassiou, 22, 1/2, 97

Architecture implications in the design of microprocessors

Matick, 23, 3, 264

DATA BASES/DATA COMMUNICATIONS

General audit trail requirements

Bjork, 14, 3, 229

Peterlee Relational Test Vehicle

Todd, 15, 4, 285

User-oriented data-base retrieval system

Jones, 16, 1, 4

Information management system IMS/VS

McGee, 16, 2, 84

High-performance DB/DC system (ACP)

Siwec, 16, 2, 169

Data structures and accessing in data base systems

Senko, 16, 3, 208

CICS/VS and its role in SNA

Eade, 16, 3, 258

Automated logical data base design

Raver, 16, 3, 287

Query-by-Example: a data base language

Zloof, 16, 4, 324

User controlled DB/DC system

Heyne, 16, 4, 344

Storage and access in relational data bases

Blasgen, 16, 4, 363

Design of the 8100 DTMS

Waters, 18, 4, 565

Predicting performance of CICS/VS systems

Seaman, 19, 1, 68

Data base security

Wood, 19, 2, 229

System R: An architectural overview

Blasgen, 20, 1, 41

A primer on relational data base concepts

Sandberg, 20, 1, 23

Supporting Business Systems Planning studies with the DB/DC

Data Dictionary

Sakamoto, 21, 1, 54

Towards an integrated development environment

Newman, 21, 1, 81

Enterprise information analysis: Cost-benefit analysis and the data-managed system

Parker, 21, 1, 108

SNA flow control: Architecture and implementation

George, 21, 2, 179

The Document Interchange Architecture: A member of a family of architectures in the SNA environment

Schick, 21, 2, 220

A case study of office workstation use

Bullen, 21, 3, 351

Analytic queuing model for CICS capacity planning

Deitch, 21, 4, 454

Modeling distributed processing across multiple CICS/VS sites

Acker, 21, 4, 471

Use of images in commercial and office systems
Somerville, 23, 3, 281

HUMAN FACTORS

Operator role in store systems
Antonelli, 14, 1, 35

Architectural design for program development
McCue, 17, 1, 4

The Human Side of Computers
Branscomb, 20, 2, 120

Procedures of the Human Factors Center at San Jose
Hirsch, 20, 2, 123

Effects of manual style on performance in education and machine maintenance
Judisch, 20, 2, 172

Natural language programming: Styles, strategies, and contrasts
Miller, 20, 2, 184

Human factors in the development of a family of plant data communication terminals
Ominsky, 20, 2, 216

Human factors in communication
Thomas, 20, 2, 237

Software simulation as a tool for usable product design
Clark, 20, 3, 272

Improving system usability for business professionals
Helander, 20, 3, 294

Improving the usability of programming publications
Bethke, 20, 3, 306

A system for the automated office environment
Gardner, 20, 3, 321

Strategies for information requirements determination
Davis, 21, 1, 4

Office-by-Example: A business language that unifies data and word processing and electronic mail
Zloof, 21, 3, 272

The design rationale of the System/38 user interface
Botterill, 21, 4, 384

How a computer should talk to people
Dean, 21, 4, 424

Series/1-based videoconferencing system
Anastassiou, 22, 1/2, 97

Speech filing—An office system for principals
Gould, 23, 1, 65

Playback: A method for evaluating the usability of software and its documentation
Neal, 23, 1, 82

Ease of use: A system design challenge
Branscomb, 23, 3, 224

INFORMATION SYSTEMS

The VM/370 Resource Limiter
Chess, 20, 4, 424

Management considerations for an Information Center
Hammond, 21, 2, 131

IMS/VS: An evolving system
Strickland, 21, 4, 490

IBM Database 2 in an Information Management System environment
Dash, 23, 2, 165

INTERACTIVE KEYBOARDS/TERMINALS

Software simulation as a tool for usable product design
Clark, 20, 3, 272

Ease of use: A system design challenge
Branscomb, 23, 3, 224

Use of images in commercial and office systems
Somerville, 23, 3, 281

INTERACTIVE SYSTEMS

Human factors in the development of a family of plant data communication terminals
Ominsky, 20, 2, 216

Improving system usability for business professionals
Helander, 20, 3, 294

Interactive user productivity

Thadhani, 20, 4, 407

JANUS: An interactive document formatter based on declarative tags

Chamberlin, 21, 3, 250

Office-by-Example: A business language that unifies data and word processing and electronic mail

Zloof, 21, 3, 272

A case study of office workstation use

Bullen, 21, 3, 351

The design rationale of the System/38 user interface

Botterill, 21, 4, 384

How a computer should talk to people

Dean, 21, 4, 424

Reflections of VM/Pass-Through: A facility for interactive networking

Mendelsohn, 22, 1/2, 63

Full-screen testing of interactive applications

Maurer, 22, 3, 246

LANGUAGES

Composite design facilities of programming languages

Myers, 15, 3, 212

APL emulator on System/370

Hassitt, 15, 4, 358

APL interpreter and system for small computers

Alfonseca, 16, 1, 18

Query-by-Example: a data base language

Zloof, 16, 4, 324

Method for time analysis of programs

de Freitas, 17, 1, 26

Extended Control Language of MPSX/370

Slate, 17, 1, 64

APL approach to presentation graphics

Niehoff, 19, 3, 367

Natural language programming: Styles, strategies, and contrasts

Miller, 20, 2, 184

Towards an integrated development environment

Newman, 21, 1, 81

Office-by-Example: A business language that utilizes data and word processing and electronic mail

Zloof, 21, 3, 272

NIL: A high-level language for distributed systems programming

Parr, 22, 1/2, 111

Abstract design and program translator: New tools for software design

Archibald, 22, 3, 170

The system architecture of EAS-E: An integrated programming and data base language

Pazel, 22, 3, 188

A simple architecture for consistent application program design

Rogers, 22, 3, 199

Automatic generation of random self-checking test cases

Bird, 22, 3, 229

Design and use of a program execution analyzer

Power, 22, 3, 271

The design of the REXX language

Cowlshaw, 23, 4, 326

MATHEMATICAL METHODS

Universal Product Code symbol

Savir, 14, 1, 16

Queuing theory for system design

Allen, 14, 2, 161

Input-output econometric model

Sarma, 16, 4, 398

Extended Control Language of MPSX/370

Slate, 17, 1, 64

Solving the installation scheduling problem

Chen, 17, 1, 82

System for constructing linear programming models

Katz, 19, 4, 505

NETWORKING

SNA flow control: Architecture and implementation

George, 21, 2, 179

A perspective on communications and computing

Scherr, 22, 1/2, 5

X.25 and related recommendations in IBM products

Deaton, 22, 1/2, 11

Teletex—A worldwide link among office systems for electronic document exchange

Moore, 22, 1/2, 30

A token-ring network for local data communications

Dixon, 22, 1/2, 47

Reflections on VM/Pass-Through: A facility for interactive networking

Mendelsohn, 22, 1/2, 63

A Satellite Communications Controller

Fennel, 22, 1/2, 81

Communications Network Management enhancements for SNA networks: An overview

Sullivan, 22, 1/2, 129

An application of network management at a large computing service

Garrigues, 22, 1/2, 143

Advanced program-to-program communication in SNA
Gray, 22, 4, 298

SNA Distribution Services
Housel, 22, 4, 319

Interconnecting SNA networks
Benjamin, 22, 4, 344

An experimental address space isolation technique for SNA networks
Ryder, 22, 4, 367

Logical problem determination for SNA networks
Weingarten, 22, 4, 387

Performance and availability measurement of the IBM Information Network
Bailey, 22, 4, 404

SNA routing: Past, present, and possible future
Jaffe, 22, 4, 417

Defining routing tables for SNA networks
Maruyama, 22, 4, 435

Windows in the sky—Flow control in SNA networks with satellite links
Grover, 22, 4, 451

OFFICE SYSTEMS

Office communications system
Engel, 18, 3, 402

Computer-assisted office work
Gruhn, 18, 3, 432

Electronic information interchange in an office environment
DeSousa, 20, 1, 4

Human factors in the development of a family of plant data communication terminals
Ominsky, 20, 2, 216

A system for the automated office environment
Gardner, 20, 3, 321

Management considerations for an Information Center
Hammond, 21, 2, 131

The Document Interchange Architecture: A member of a family of architectures in the SNA environment
Schick, 21, 2, 220

JANUS: An interactive document formatter based on declarative tags
Chamberlin, 21, 3, 250

Office-by-Example: A business language that unifies data and word processing and electronic mail
