

IDENTIFICATION: 5 - 8 CHANNEL CONVERSION

AUTHOR: John Odom

PURPOSE: To read in a 5 channel punched paper tape and punch out a corresponding 8 channel tape.

STORAGE: Sectors 00002 - 13702  
Sector 001 and 002 06

USE: Read in program. Place 5 channel tape in Flex Reader Transfer to program with I key, tape will then be converted character by character. When blanks are read, program stops on a HLT. Clearing parity enables program to continue. To stop conversion breakpoint may be depressed, lifting breakpoint then continues.
