Matrox Maevex Series

Thank you for purchasing a Matrox Maevex Series product. Matrox Maevex is a video distribution over IP solution that consists of an encoder unit and one or more decoder units capable of extending video, audio, and RS232 control signals over a standard TCP/IP network. A Maevex Decoder can also be used as a standalone video player to view video files stored in its internal memory or on a memory card.

Hardware required (sold separately)

Depending on your connection setup, you also need the following hardware:

- Network cable
- HDMI cable

Product and software information

See the Matrox Web site (**www.matrox.com/graphics**) for the latest Matrox documentation, software, and product information.

Documentation

See your user guide for information on other installation and connection options. The user guide for your product is available on the Matrox Web site (**www.matrox.com/graphics/en/support/manuals**).

Matrox software

Matrox software is available for your Maevex product on the Matrox Web site (**www.matrox.com/maevexsw**).

For software information, see the Matrox PowerStream help and *Readme* files. Be sure to check for any last-minute release notes included with your product.
