The following number registers are available; they are given default values by .TH:

IN   Left margin indent relative to subheads (default is 0.5i).

LL   Line length including IN (default is 6.5i).

CAVEAT

In addition to the macros, strings, and number registers mentioned above, there are defined a number of internal macros, strings, and number registers. Except for names predefined by *troff*(1) and number registers **d**, **m**, and **y**, all such internal names are of the form XA, where X is one of),], and }, and A stands for any alphanumeric character.
